The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

## Product subtypes concerned

**ACS6000 (Generation 1) after Main Board Upgrade (AMC34)**

## Current life cycle status

The mentioned product subtype of ACS6000 drive is in **Classic** phase according to the ABB life cycle model outlined above.

## Life cycle plan

It is planned to transfer the mentioned product subtype to **Limited** life cycle phase on 01.01.2033.

ABB will adequately inform about life cycle phase transition from **Classic** to **Limited** life cycle phase prior to the change.

ABB’s promise is to keep this product subtype after **Active** phase at least 10 years in **Classic** life cycle phase or at least to provide a modernization service to extend the full life cycle support to at least 10 years.

## Product availability in Classic phase

This product subtype is not available for sale. It represents drive’s installations where the “ACS6000 Main Board Upgrade (AMC34)” service was applied.

## Recommended actions

In **Classic** life cycle phase complete life cycle services are available for the mentioned product subtype.

Maintenance recommendations are presented in the ACS6000 preventive maintenance schedule document.

Besides the regular maintenance it is recommended to apply the “ACS6000 Modernization with UCU-26” modernization service – preferably in combination with the 10year preventive maintenance service. Upgraded drives will get back to **Active** life cycle phase and will follow the life cycle plan of the following product subtype:

- **ACS6000 (Modernized with UCU-26)**

The life cycle plan of the drives upgraded to UCU-26 will be synchronized with the life cycle plan of product subtype **ACS6080 (UCU-26)** which represents the first generation of ACS6080 drives based on UCU-26 control hardware.
Service availability in Classic phase

- ABB Motion OneCare agreements
- Trainings (e-learnings, classroom, on-site)
- Spare parts
- ABB Ability™ Condition Monitoring for Drives
- Preventive Maintenance
- Inspection and Diagnostics
- Technical Support
- Remote Support
- On-site repair
- ACS6000 Modernized with UCU-26 (modernization service)
- Disposal and recycling
