Course Description
Low Voltage Drives Train-the-Trainer School

The Train the Trainer training program provides participants with comprehensive training on the Certified start-up procedures/updates of ABB ACS550/800/H550 Drives products. Attendees will acquire an understanding of the training registration and record keeping systems. In addition a broad range of presentation skills and exercises will be practiced. This curriculum combines both web based learning modules and instructor led classroom training to maximize the benefits to participants.

These schools are held at the ABB New Berlin, Wisconsin Training Center. Schools are subject to certain limitations (i.e. pre-requisites, minimum class size, equipment availability, etc.). Access www.abb-drives.com or contact the ABB Training Coordinator for more details.

Enrollment is limited. To ensure timely processing of your enrollment, we recommend that you enroll at least 30 days prior to the class scheduled date.

Course Duration
The course duration is 2.5 days. The course includes 1.0 day of product update training & 1.5 days of training system use and presentation skills.
Monday - - Training system use, Presentations, etc.
Tuesday - ACS550/800/H 550 Product Overview/Update
Wednesday AM - Procedures, Presentations, etc.

Course Type
The course utilizes both web-based and instructor-led training with application exercises and hands-on lab activities to accomplish learning objectives.

Course Goals
Provide attendees with the necessary information, tools, and training to be able to conduct Certified start-up training.
Participants will attain an understanding how best to leverage the training system for student records and tracking. In addition a broad range of presentation skills, exercises will be practiced and demonstrated by the attendee.

Student Profile
This training is for authorized ABB Representatives and ABB employees (Regional Application Engineers).

Prerequisites and Recommendations
Students should have:
An understanding of their respective product line responsibility ACS550/800 or ACH550
Completed required web based training modules and pre-tests

A Lap Top PC (Windows-based) should be brought to class preferably with a minimum of Adobe Acrobat reader installed.

Course Objectives
Upon successful completion of this course and post-course skills evaluation, students will:

- Have an in-depth understanding of ABB’s start-up procedures.
- Be able to effectively conduct certified stat-up training courses
- Obtain working knowledge of classroom scheduling and logistics
- Understand and practice basic presentation skills
- Be authorized to conduct certified start-up training courses on behalf of ABB drives factory
