PRODUCT LIFE CYCLE STATUS STATEMENT

PCS1000 WIND

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

Current life cycle status
The PCS1000 WIND product subtype of PCS1000 product, is in the Classic life cycle phase since 2009 according to the ABB life cycle model outlined above.

Life cycle plan
It is planned to keep the mentioned product sub-type in Classic phase until the end of 2020, after which it will be transferred to Limited phase.

ABB’s promise is to keep this product subtype at least 10 years in Classic life cycle phase after the last unit has been delivered or to provide an Upgrade service to extend the full life cycle support to at least 10 years.

Recommended actions
In Classic life cycle phase complete life cycle services are available for the mentioned product subtype.

Maintenance recommendations are presented in the PCS1000 preventive maintenance schedule document.

Product availability in Classic life cycle phase
This product subtype is not available for sale. There is the active product subtype PCS6000 WIND PF2 that acts as possible replacement and is still available for sale.

Service availability in Classic life cycle phase
See details at new.abb.com/drives/Services and contact your local ABB representative for availability.
