ABB Ability
Verification for measurement devices

Introduction
ABB Ability™ Verification for measurement devices is the next generation verification tool suite for use with a range of ABB devices. Software and Verification Definition Files (VDF) can be used to provide the best possible check of measurement accuracy, without stopping your process.

New functionality/feature

- ProcessMaster 300/500 (Premium)
- CoriolisMaster FCx1xx/4xx (Enhanced)
- LMT100/200 (Enhanced)
- FMT500 (Enhanced)
- FSx430 FSx450 VDF (Device Type 9F) (Enhanced)
- FSx430 FSx450 VDF (Device Type A3) (Enhanced)
- LLTI100 (Enhanced)
- AquaMaster4 Rev.2 HW (Premium)

System specification

- A Laptop or PC running 32- or 64-bit versions of Windows 7, 8, 8.1 or 10
- Minimum 2 GB of RAM
- 500 MB free storage space
- Minimum of two USB ports to connect

Installation

Prerequisites
Ensure .NET framework 4.5 has been installed before running setup.

Installation steps
Latest version of software and VDFs can be downloaded from ABB product page; https://new.abb.com/products/measurement-products/service/advanced-services/SRV500

Close ABB Ability Verification for measurement devices software and run ABB Ability Verification for measurement devices installer.exe

Upgrades
Supports 03.94.05 to 03.94.13 upgrade
Delete the old VDFs from software and import the latest VDFs.

Uninstallation
Uninstallation of the software (ABB Ability Verification for measurement devices software) can be performed from Add or Remove Programs in the control panel.
