

BUSINESS AREA: MOTION

ABB Motion Services

Facts & Figures

ABB's Motion Services division helps customers around the globe by maximizing uptime, extending product lifecycle and enhancing the performance and energy efficiency of electrical motion solutions. We enable innovation and success through digitalization by securely connecting our customers' motors and drives, increasing operational uptime and improving efficiency. We make the difference for our customers and partners every day by keeping their operations running profitably, safely, and reliably.

Revenues

\$750–1,250 million

Market position

No. 1 globally

Key market drivers and trends

- **Growing and aging installed base:** while the installed base for electrical motion increases, aging assets offer significant energy and performance improvements
- **Growing acceptance of remote technologies:** a trend accelerated by the pandemic. Operators turn to suppliers for remote operations and monitoring
- **Sustainability, carbon neutrality and circular economy:** higher energy efficiency regulations are among the main drivers of industrial investment
- **XaaS business models & servitization:** digital technologies drive servitization enabling new outcome-based business models

Market

~\$5 billion
