Course approval for Marine High Voltage training

Refer to Your application dated 09.05th 2013 and 11.07th 2014 regarding approval of Maritime Training Courses. The application includes education according to the STCW Convention chapter III, limited to section and table below:

- Marine High Voltage Training at the management level – STCW section A-III/2 and table A-III/2

The Norwegian Maritime Authority (NMA) approve the application from ABB Marine Academy Helsinki according to Regulations of 22 December 2011 No. 1523 concerning qualifications and certificates for seafarers.

Document of evidence must have relevant references to regulation, section and table in the STCW 78 Convention as amended, in English.

The NMA expect that the courses are carried out in compliance with the quality system of the school. Any changes in the school's activity, range of courses or other substantial change in the school's structure, which affects this approval, requires a notice to the NMA.

The school must in short notice be available for audit by the NMA. The approval is valid until 12.11.2019. The approval may be withdrawn at any time if NMA finds that the institution does not satisfy the demands of STCW as amended and/or Norwegian national legislation.

Yours faithfully,

Lars Alvestad
Acting Head of Section

Elin Kvamsøy Sjursen
Approval Engineer
