Sense 9Z Series

Magnetic Non-Contact Safety Switch

Data Sheet

Sense 9Z is a coded magnetic non-contact safety switch used for interlocking doors and hatches.

The switch is mounted on the frame and the actuator on the moving part of the guard.

Sense 9Z offers an interlocking function reaching PLe/SIL 3 with low level coding. It also has a stainless-steel housing that is designed for harsh environments and extreme temperatures, suitable for splash zones in accordance with EHEDG guidelines.

Easy to install

Compact size

Compact in size to make it easy to position and hide on gates and hatches.

Large sensing distance

With a large sensing distance and a high tolerance for misalignment makes it easy to install.

Continuous operation

Easier Troubleshooting

LED indication gives visual status of the switch reducing downtime.

No wear, no mechanical breakage

Non-contact sensing means no mechanical wear and the large sensing tolerance gives a better tolerance to vibrations, resulting in fewer unwanted process stops.

Optimum Interface

Small Design

Small footprint makes it easy to install in restricted space.

Industry Footprint

Standard industry footprint for smaller magnetic non-contact switches.
