## Magnetic Non-Contact Safety Switch

### Data Sheet

Sense 1 is a coded magnetic non-contact safety switch used for interlocking doors and hatches.

The switch is mounted on the frame and the actuator on the moving part of the guard.

Sense 1 offers an interlocking function reaching PLe/SIL 3 with low level coding.

#### Easy to install

**Compact size**

Compact in size to make it easy to position and hide on gates and hatches.

**Large sensing distance**

With a large sensing distance and a high tolerance for misalignment makes it easy to install.

#### Continuous operation

**Easier Troubleshooting**

LED indication gives visual status of the switch reducing downtime.

**No wear, no mechanical breakage**

Non-contact sensing means no mechanical wear and the large sensing tolerance gives a better tolerance to vibrations, resulting in fewer unwanted process stops.

#### Optimum Interface

**Small Design**

Small footprint makes it easy to install in restricted space.

**Industry Footprint**

Standard industry footprint for smaller magnetic non-contact switches.
