Course Duration
The duration is 2 days.

Course Type
This is an instructor-led course. Approximately 50% of the course is hands-on lab activities.

Course Goal
The goal of this course is to provide a basic understanding of the Multi-Flame Ionization Detector (FID) module for the ABB Continuous Gas Analyzer (CGA).

Student Profile
This training is targeted to Service Engineers and Maintenance Technicians.

Prerequisites and Recommendations
The NA425 course is a prerequisite for this course.

Course Objectives
Upon completion of this course, students will be able to:

- Maintain the analyzer system for optimal performance
- Calibrate the Multi-FID analyzer
- Interpret Analyzer readings for desired system performance
- Identify product components/parts

Main Topics
- Troubleshooting module problems.
- Theory of operation
Course Calendar - NA430 Multi-FID CGA
