July 2006

Status on EU directive RoHS (restriction of the use of certain hazardous substances)

Dear Customer,

The European directive about RoHS involved a lot of questions. Here is further information regarding the application of the directive for **electro-mechanical time switches**.

What about the RoHS rules for the ATS?

The ATS are not in the product list covered by the RoHS Directive. But in some case they may be components of concerned equipments. Consequently customers may demand that the a.m. products will be made RoHS compliant.

Nevertheless that the ATS might be made RoHS compliant, the responsibility for the concerned equipment remains with the manufacturer of it.

What is the time schedule?

The delivery of the above listed items, in line with the RoHS Directive, will vary according to the inventory levels of the raw materials or components.

The plan is to be ready before end of the 1st **July 2006**.

The identification references / order code will not change. Information will be available when the RoHS compliance is achieved.

However, this letter does not constitute a binding commitment.

With best regards,

Quality Manager
Valter Patruno
