

## Course description

# F655

## Floor-standing cabinets and switchgear cabinets for distribution

### Course Duration

The duration is one day. This course can be extended to two days by combining it with the CombiLine-M course (NSP 8)

### Course Type

This is a classroom course led by a trainer with a maximum of 7 participants.

### Course Goal

- You are familiar with the STRIEBEL & JOHN Main Catalogue
- You have gained fundamental product knowledge
- You are able to work out detailed solutions
- You are familiar with and able to use the software tool PDC

### Student Profile

The course is intended for installers (electricians) and panel builders, and interested professionals.

### Prerequisites and Recommendations

The student must have basic electro technical knowledge.

### Main Topics

You acquire fundamental product knowledge of the STRIEBEL & JOHN floor-standing cabinet and switchgear cabinet ranges. You get to know the installation and mounting advantages as well as practical detail solutions and become familiarized with the STRIEBEL & JOHN system technology.

- Floor-standing cabinets and switchgear cabinets for distribution applications
- Supply formats
- Integration of the modular distribution panel system CombiLine-M
- Practical training in the seminar workshop
- Presentation of the PDC panel design configuration software
- Tour of the production facilities
