NEMA explosion proof AC and DC Motors

Power and productivity
for a better world™

ABB

NEMA explosion proof AC and DC motors

ABB (www.abb.com) is a leader in power and automation technologies that enable utility and industry customers to improve their performance while lowering environmental impact. The ABB Group of companies operates in around 100 countries and employs about 150,000 people.

NEMA explosion proof AC and DC motors

Features

The right motor for your hazardous environment application

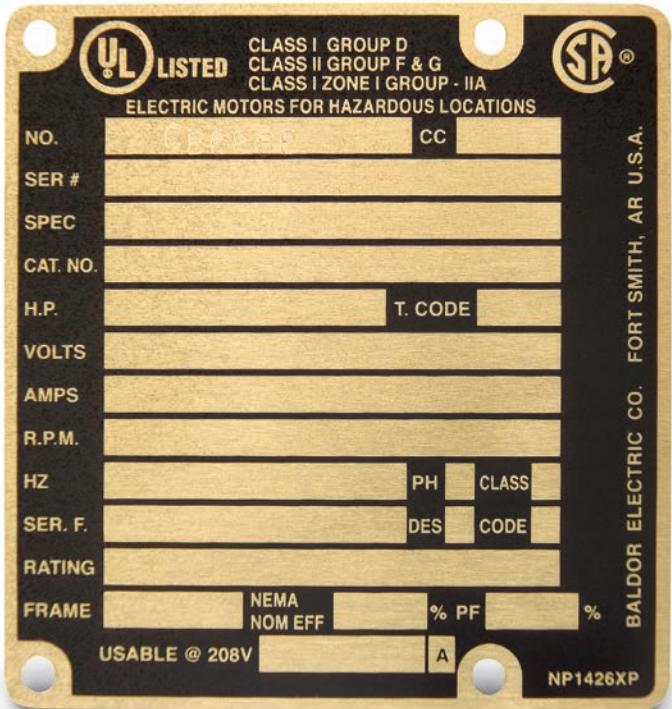

Baldor•Reliance® motors are available with a wide range of certifications for use in Hazardous Locations or potentially Hazardous Environments where concentrations of combustible gasses, vapors and or dust are present or present some of the time.

Typical customer applications that are in Class I environments (flammable gases & vapors) include:

- Spray painting and finishing areas
- Utility gas plants
- Petroleum refining plants
- Petroleum dispensing locations
- Dry cleaning facilities
- Dip tanks containing combustible or flammable fluids
- Plant facilities extracting solvents
- Inhalation anesthetic areas
- Process facilities manufacturing or using nitro-cellulose (class II as well).
- Aircraft hangars and fuel servicing areas.
- Gas stations

Typical customer applications that are in Class II environments (combustible dust) include:

- Flour mills
- Feed mills
- Grain elevators and grain handling facilities
- Fire work plants and storage areas
- Aluminum manufacturing and storage areas
- Magnesium manufacturing and storage areas.
- Coal preparation and handling facilities
- Starch manufacturing and storage areas
- Confectionary plants
- Pulverized sugar and cocoa manufacturing plants.
Packaging and storage plants.
- Spice grinding and storage plants.

Baldor•Reliance® Explosion proof motors are easily recognizable by their nameplates that include the listing agency approval logos as well as all specific Class, Group and Temperature Code information.

Leadership in premium efficiency

As countries and regions across the world establish minimum efficiency levels for motors, more companies are turning to the Baldor•Reliance Super-E®. This includes plant and processing applications, as well as OEM products for shipment overseas. Super-E motors meet or exceed the efficiency levels defined by The Energy Independence & Security Act of 2007 (EISA) in the U.S., NRC in Canada, and IEC 60034-30 IE3 level in Europe. Super-E motors meet or exceed NEMA Premium® efficiencies.

A wide selection of premium efficient motors, available from stock, manufactured and sold by a company committed to building better products for industries worldwide, and recognized as the worldwide leader in energy efficient motors and drives.

NEMA explosion proof AC and DC motors

Division 1 capabilities

Baldor•Reliance® Division 1, explosion proof motor capabilities – 1/4 hp to 800 hp

NEMA frame size capability

Division 1 enclosures: available as Class I, Group C&D and Class II, Groups F&G in all sizes. Class I, Group D and Class II, Groups E, F & G are available in cast iron frames 182T and larger.

**Single phase – 0.18 to 4 kW (1/4 to 5 hp) (48 to 215T frame), three phase
– 0.18 to 224 kW (1/4 to 300 hp) (48 to 449 frame)**

kW	Hp	3600 RPM	1800 RPM	1200 RPM	900 RPM
0.18	0.25	–	48	–	–

NEMA explosion proof AC and DC motors

North American certifications

Baldor•Reliance® explosion proof motors for the North American marketplace

In the North American marketplace, Underwriters Laboratories (U.L.) and the Canadian Standards Association (CSA) are used as certifying bodies to approve and label electric motors for use in division based hazardous locations per NFPA70 National Electric Code (NEC) and C22.1, the Canadian Electric Code. Explosion proof motors may be marked with one or more of the following:

UL Listing mark for use in the United States. Products with this mark have been evaluated to U.S. safety requirements.

CSA Listing mark for use in Canada and the United States. The product is certified to the applicable American and Canadian standards

CSA Listing mark for use in Canada. The product is certified to the applicable Canadian standards

Hazardous area classifications

Division - defines how often the potentially explosive materials are present during normal operating conditions.

Division 1: Ignitable concentrations are present all or most of the time

Division 2: Ignitable concentrations are not likely to be present during normal operation

Classes and groups - define the type of potentially explosive atmosphere and the specific materials it contains.

Hazard Class	Groups per NEC 500	Substance
Class I Flammable gases / vapors / liquids	Group A	Acetylene
	Group B	Hydrogen
	Group C	Ethylene
	Group D	Propane
Class II Combustible dusts	Group E	Metal Dust
	Group F	Coal Dust
	Group G	Grain Dust
Class III Ignitable fibers and flyings	Not divided into Groups. 165°C maximum temperature limit for all Class III equipment not subject to overloading. 120°C maximum temperature limit for all equipment subject to overloading	

Surface temperatures

The "T" Code identifies the maximum absolute motor surface temperature that will be developed under all conditions of operation, and is chosen to be below the ignition temperature of the potential explosive material in the hazardous area. Surface temperatures of Baldor•Reliance explosion proof motors will not exceed the following UL and CSA maximums under fault conditions.

T Code	Maximum motor surface temperature		T Code (continued)	Surface temperature	
	°C	°F		°C	°F
T1	450	842	T3A	180	356
T2	300	572	T3B	165	329
T2A	280	536	T3C	160	320
T2B	260	500	T4	135	275
T2C	230	446	T4A	120	248
T2D	215	419	T5	100	212
T3	200	392	T6	85	185

NEMA explosion proof AC and DC motors

North American certifications

Baldor•Reliance® Division 1, Class & Group stock ratings

All Division 1, stock motor ratings will have a red circle symbol next to the catalog # that indicates the explosion proof Class and Group the motor is certified to meet.

XP Class & Group Symbol	Description
1	Class I, Group D
2	Class I, Group D, Class II, Group F & G
3	Class I, Group D, Class II, Group E, F & G
4	Class I, Group C & D
5	Class I, Group C & D, Class II, Group F & G

Thermal protection

As required by UL and CSA, explosion proof motors with Class II, Group F&G approvals must have over temperature protection. Internally mounted automatic thermal overloads (ATO's) are used on motors 1.12 kW (1.5 hp) and less. Explosion proof motors 1 hp and larger without ATO's have thermostats built in for thermal protection. It is the installer's responsibility to make sure that these devices are properly connected to a suitable switching device.

Inverter duty applications

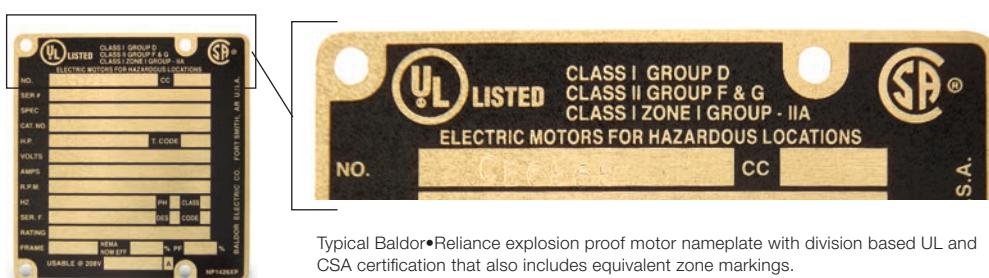

Only Explosion proof motors which are specifically approved and UL listed for use on adjustable frequency drives can be used on inverters. See Pages 27 to 30 in this brochure for more information.

Ambient temperatures

Stock explosion proof motors are suitable for applications in temperatures from -25°C (-13°F) to +40°C (+104°F). Custom motor designs are available for applications in temperatures between -25°C and -60°C and above +40°C. Contact your regional support office for further information.

Equivalent zone markings

NEC Article 505 and 506 define a North American System of Zone Classification for Gas & Dust. Most Baldor•Reliance division based explosion proof motors 50 hp and below, include these equivalent zone markings on the nameplate as standard. Equivalent zone markings can be added upon request to other ratings. Contact your regional support office for assistance.

Typical Baldor•Reliance explosion proof motor nameplate with division based UL and CSA certification that also includes equivalent zone markings.

Caution

Motors misapplied in hazardous environments can cause a fire or explosion resulting in destruction of property, serious injury or death. Only the end user or a qualified underwriter is to identify and select the proper class, group, division, and temperature code motor to meet the requirements of each installation. Baldor, A Member of the ABB Group, personnel, agents and distributors can advise what listings and approvals Baldor, A Member of the ABB Group, motors carry, but cannot evaluate nor recommend what motors may be suitable for use in hazardous environments.

NEMA explosion proof AC and DC motors

Outside North America certifications

Custom NEMA explosion proof motors for outside North America

A wide variety of custom NEMA explosion proof motors are available for use outside the US market where IEC based standards of certification are required.

Europe - ATEX directive

IEC standards that have been adopted by countries in Europe are known as European Norms (EN). Directives (laws) are issued by the European Union (EU) based on these EN standards. Equipment tested to EN standards bears a CE mark. The CE mark is a mandatory conformity mark for products placed on the market in the European Union. With the CE marking on a product, the manufacturer ensures that the product conforms to the essential requirements of the applicable EC directives.

Explosion proof products that are placed on the European market must be certified to the ATEX directive (ATEX 94/9/EC). The objective of ATEX is to ensure the free movement of goods that are suitable for use in explosive atmospheres throughout the European Union. Offering one harmonized compliance procedure accepted by all EU countries eradicates the need for differing national standards. Baldor•Reliance® motors use SIRA as the 3rd party Notified Body for ATEX certification.

Globally (outside Europe) – IECEx system

The IECEx Scheme is the future route to global compliance certification. Its aim is to harmonize standards to allow free movement of goods by establishing a world-wide accepted standard. The IECEx scheme significantly reduces the need for re-testing and certification by conforming to international IEC standards, and therefore makes international trade easier, quicker and more cost effective.

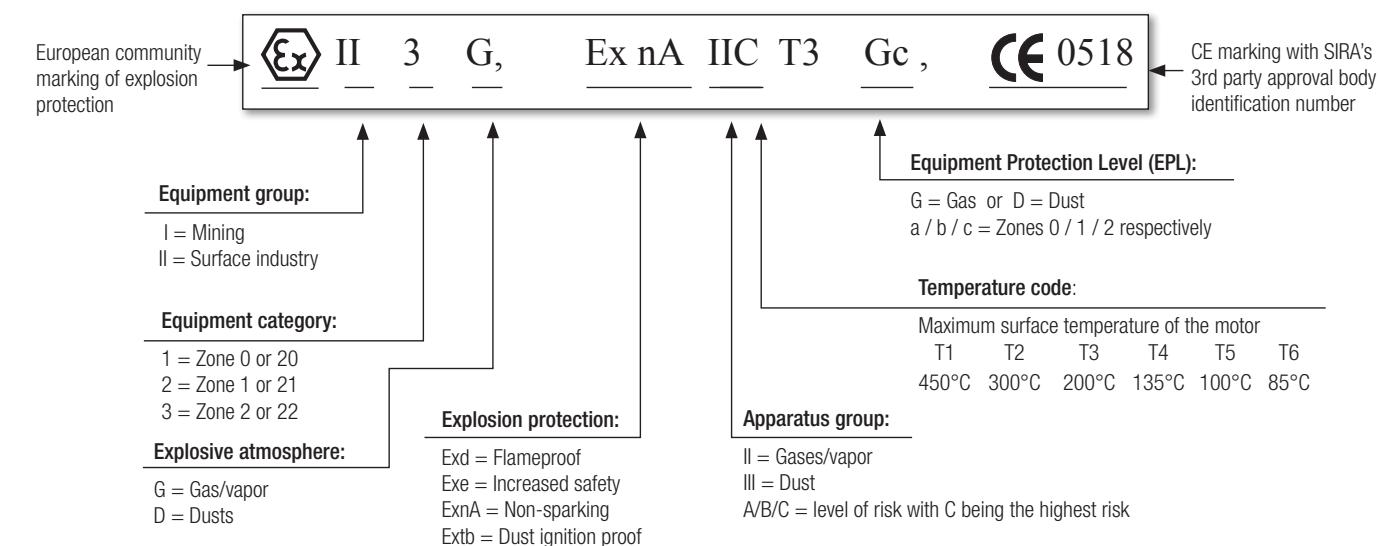

All Baldor•Reliance ATEX custom motors are dual labeled with our IECEx certification number to satisfy the broader international market.

Certificate of conformity for exports to Russia - GOST-R

GOST R certification is required for customs clearance in Russia and as an aid to sell or market the equipment within the country. Additionally, the RTN Use Permit (Rostechnadzor) allows the equipment to be installed and operated in Russia. Both of these can be provided upon request for all variants of our ATEX/IECEx flameproof product offering.

Typical ATEX markings:

NEMA explosion proof AC and DC motors

Outside North America certifications

Custom ATEX capabilities matrix - Group II (surface industry applications)

Environment	Explosion protection	Max. kW (HP)	NEMA Frame (IEC)	Max. voltage	Apparatus group	Temp code	Ambient temp. °C (°F)
Explosive gas Environments (G)	Exd (flameproof) IIB Zone 1	373kW (500HP)	143T – 449T (90M-280M)	1,000 volts	IIA & IIB	T3, T4 & T5	-20 to +40 (-4 to 104) +65 (149) Max
	ExnA (non-sparking) Zone 2	335kW (450HP)	180T – 4412T (112M-280H)	2,300 volts	IIA, IIB & IIC	T2, T3 & T4	-20 to +40 (-4 to 104) -30 (-22) Min
Explosive dust Environments (D)	Extb (dust ignition proof) IIC Zone 21	373kW (500HP)	143T – 449T (90M-280M)	1,000 volts	IIIA, IIIB & IIIC	T3, T4 & T5	-20 to +40 (-4 to 104) +65 (149) Max
	Baldor•Reliance® motors marked "Extb" for Zone 21 may be additionally labeled "suitable for Zone 22 (EPL Dc)"						
Dual protection Gas and dust Environments (G/D)	Baldor•Reliance ATEX motors can be dual labeled for "Exd" (Flameproof) and "Extb" (Dust Ignition Proof), Zones 1, 21 to meet the most hazardous explosive atmosphere applications.						
Increased safety	"Exd" motors 180-449T, 112M-280H can be supplied with an increased safety conduit box separately labeled "Exe"						

Baldor•Reliance takes pride in tailoring our custom motors to fit our customer's specific requirements. For a full range of available options, pricing and availability contact your regional support office.

ABB IEC motors

ABB IEC motors are available in a wider range of explosion proof configurations and in larger power ratings. Information is available at www.abb.com/motors&generators or you may contact your regional support office for assistance.

Caution

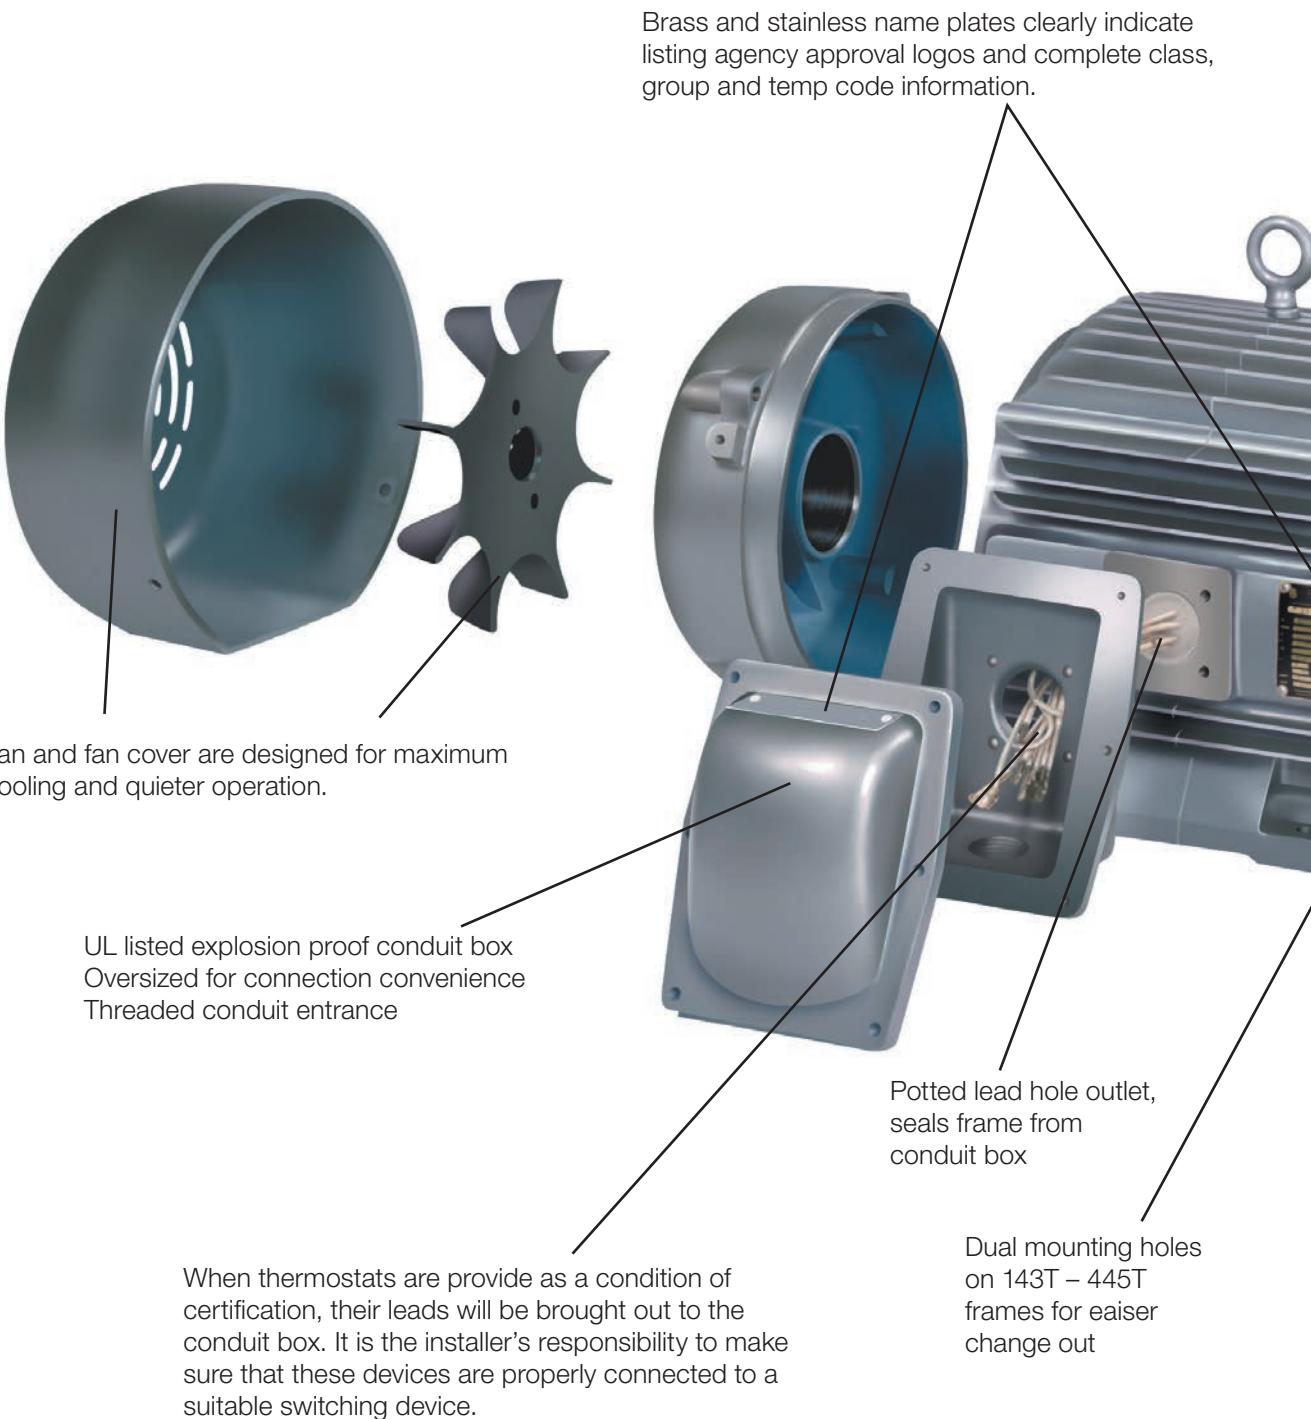

Motors misapplied in hazardous environments can cause a fire or explosion resulting in destruction of property, serious injury or death. Only the end user or a qualified underwriter is to identify and select the proper class, group, division, and temperature code motor to meet the requirements of each installation. Baldor, A Member of the ABB Group, personnel, agents and distributors can advise what listings and approvals Baldor, A Member of the ABB Group, motors carry, but cannot evaluate nor recommend what motors may be suitable for use in hazardous environments.

NEMA explosion proof AC and DC motors

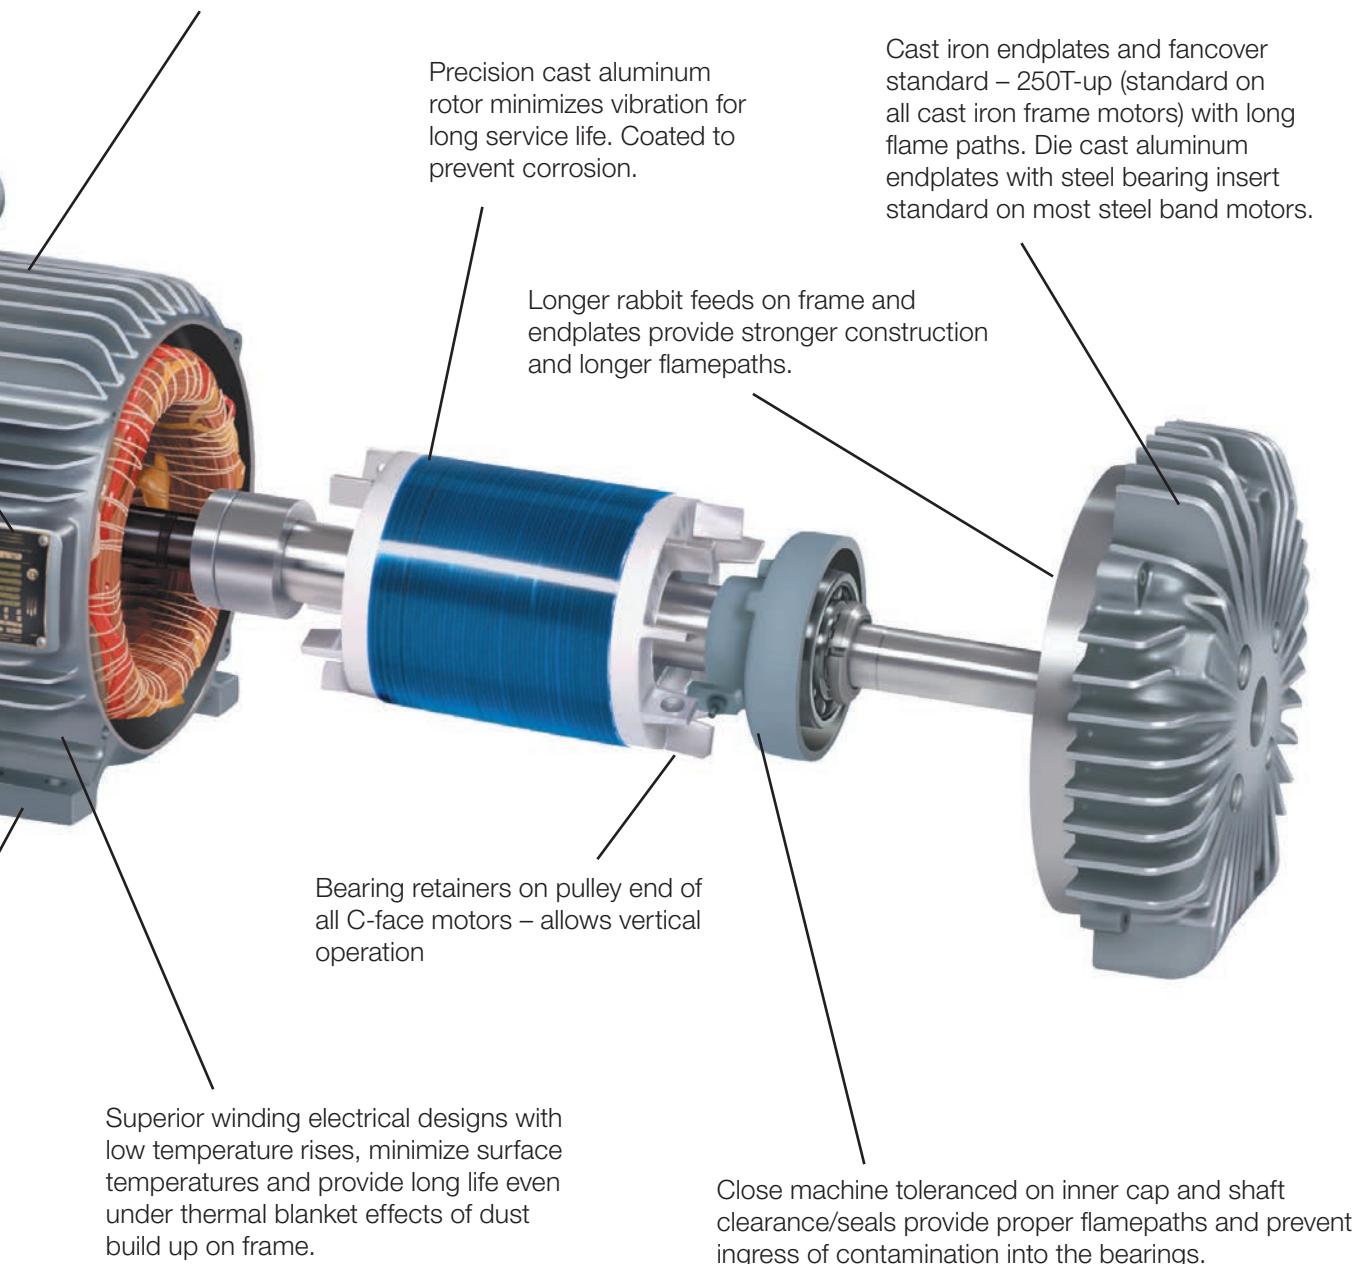

Motor performance data and dimensions

Explosion proof motors –

Reliability and performance in Division 1 applications

Heavy duty frame construction is designed to contain maximum internal explosion pressure and maintain external surface temperatures below the minimum ignition temperature of the environment.

NEMA explosion proof AC and DC motors

Motor performance data and dimensions

Single phase and three phase Explosion proof motors with rigid base

These motors are ideal for a wide variety of applications where hazardous fumes or dust may be present. Available from stock in 0.18 kW (1/4 hp) though 224 kW (300 hp), in NEMA frames 48 through 449T. U.L. and CSA approved for Division 1, Class I, Group D; Class I, Group D, Class II, Group F & G; Class I, Group C & D, Class II, Group F & G. 1.0 service factor.

(2) Class I, Group D, Class II, Group F & G

(5) Class I, Group C & D, Class II, Group F & G

Caution: These explosion proof motors are not suitable for use with adjustable speed drives.

Inverter duty explosion proof motors must be used, see page 27.

NEMA explosion proof AC and DC motors

Motor performance data and dimensions

Single and three phase Explosion proof C-face motors

Baldor•Reliance® motors for use on pumps, blowers and valves that require a NEMA C-face mounting configuration. Installed where hazardous fumes or dust may be present. Positively locked drive end bearing. 1.0 service factor. Available from stock in single and three phase, 0.25 kW (1/3 hp) through 37 kW (50 hp), in NEMA frames 56C through 326TC. UL and CSA approved for Division 1, Class I, Group D; Class I, Group D, Class II, Group F & G.

Caution: These explosion proof motors are not suitable for use with adjustable speed drives.
Inverter duty explosion proof motors must be used, see page 27.

NEMA explosion proof AC and DC motors

Motor performance data and dimensions

Severe duty, explosion proof motors

Rigid base, 1.15 service factor

These Baldor•Reliance® motors are built suitable for harsh industrial environments requiring protection against corrosion, that contain hazardous gas and vapor, dust fibers, filings or other material that may have explosive properties. 1.15 service factor, severe duty design includes rugged cast iron construction with corrosion resistant epoxy finish. Shaft slingers & inner caps installed on both ends of motor for bearing protection. Includes normally closed thermostats. UL & CSA approved for Division 1 Class I, Group D, Class II, Group E, F & G, T3C temperature code.

Three phase, foot mounted

* Cast Iron Frame

(3) Class I, Group D, Class II, Group E, F & G

35 Design A, Exceeds Design B in rush limits

Caution: These explosion proof motors are not suitable for use with adjustable speed drives.

Inverter duty explosion proof motors must be used, see page 27.

NEMA explosion proof AC and DC motors

Motor performance data and dimensions

Close-coupled pump, explosion proof motors

Where close-coupled pump shaft configurations are required in hazardous locations, explosion proof motors available from stock in three phase, 2.2 kW (3 hp) through 7.5 kW (10 hp), in NEMA frames 145JM through 215JM. They are UL and CSA approved for Division 1, Class I, Group D, Class II, Group F & G, and are rated at a 1.0 service factor.

① Class I, Group D

Close-coupled pump, drill rig duty, explosion proof motors

Designed for on and off shore drill rig service, bulk fuel terminals, and transfer stations where close-coupled pump shaft configurations are required. For use in high humidity hazardous-duty applications driving pumps, compressors, blowers and fans. These motors feature labyrinth-type recessed shaft slinger for increased bearing protection. Explosion proof breather/drain to prevent build up of condensation. Class F insulation. Corrosion resistant finish with two part epoxy coating. Rated for 55° C ambient and 1.15 service factor (EJPM71170T-I has 1.0 S.F.). UL and CSA approved for Division 1, Class I, Group C & D. Available from stock 2.2 kW (3 hp) to 7.5 kW (10 hp) with 182JP to 184JP mounting.

Three phase, JP mount with rigid base

① Class I, Group D

④ Class I, Group C & D

1 Class F insulated motor with 1.15 Service Factor or higher that operates within Class "B" temperature limits at rated horsepower

19 60/50 Hertz motor. 60 Hertz data shown,

Contact your regional support office for 50 Hertz data

30 Usable at 208 volts

97 One size smaller flange and shaft

Caution: These explosion proof motors are not suitable for use with adjustable speed drives. Inverter duty explosion proof motors must be used, see page 27.

NEMA explosion proof AC and DC motors

Motor performance data and dimensions

Adjustable speed AC three phase, Inverter Drive® explosion proof motors

These TEFC motors are designed for use with inverters in hazardous locations. Ratings are available for a 10:1 constant or variable torque speed rating. They may be used with inverters manufactured by any company. 0.37 - 1.5 kW (1/2 - 2 hp) motors meet Division 1, Class I – Group D and Class II – Group F and G, with temperature rating T3C (160 degrees). The 2.2 - 56 kW (3 - 75 hp) motors meet Division 1, Class I – Group D only, with temperature code T2A (280 degrees). NEMA frames 56C through 405T. ISR® Inverter Spike Resistant wire is standard. All motors are rated at a 1.0 service factor, and have Class F insulation to meet NEMA MG 1-2011, Part 31. All ratings constant horsepower 60 to 90 Hz.

Mechanical design characteristics

Specification	Description	Frames			
		56C	143TC- 215TC	254TC- 365TC	405T
Bearing retention	Locked bearings for universal mounting	•	•	•	•
Bearings	Premium grade, double shielded	•	•	•	•
Conduit box and lid	Premium grade, open with Lube Lock®	•	•	•	•
Drive end	U. L. approved cast iron explosion proof	•	•	•	•
Drive end	C-Face for mounting flexibility on NEMA TC frames	•	•	•	•
Endplates	Aluminum with steel bearing journal	•	thru 145TC from 182TC	•	•
Explosion proof	Cast iron - rugged and durable	•	thru 145TC from 182TC	•	•
Classification	Class I, Group D, Class II, Group F & G. Temp. Rating 160°C	•	thru 145TC from 182TC	•	•
Frame	Steel band	•	thru 145TC from 182TC	•	•
Foot mounting	Cast Iron	•	thru 145TC from 182TC	•	•
Ground screw	Rigid base, dual hole foot pattern for mounting flexibility	•	•	•	•
Lifting provisions	Inside terminal box for convenience	•	•	•	•
Lubricant	Eyebolt	•	•	•	•
Nameplate	Exxon POLYREX®EM or equivalent	•	•	•	•
Rotor	UL/CSA listed nameplate. Includes base volts and frequency, connection diagram	•	•	•	•
Construction	Special high pressure aluminum die cast with low loss electrical steel and special slot configuration	•	•	•	•
Shaft material	C1035 steel	•	•	•	•
Shaft material	C1137 steel	•	•	•	•

NEMA explosion proof AC and DC motors

Motor performance data and dimensions

Explosion proof SCR drive permanent magnet and shunt wound DC motors

When it comes to explosion proof SCR drive DC motors, Baldor•Reliance® offers two choices. Permanent magnet motors are available from stock in 0.18 - 1.12kW (1/4 - 1-1/2 hp), in NEMA frames 56C and 145TC. Shunt wound motors are available from stock in 0.37- 2.2 kW (1/2 - 3 hp), in NEMA frames 182CZ to 215CY. Both types are UL and CSA approved for Division 1, Class I – Group D and Class II – Groups F and G, with a 1.0 service factor. Most models include a thermostat on the field winding.

A-C MOTOR CONNECTION DIAGRAM

SINGLE PHASE CAPACITOR START INDUCTION RUN
SINGLE VOLTAGE SUMP PUMP MOTOR CONTROL BOX

WIRING DIAGRAM FOR SINGLE PHASE CAPACITOR START INDUCTION RUN SUMP PUMP MOTOR CONTROL BOX

SINGLE VOLTAGE CLOCKWISE AND COUNTERCLOCKWISE ROTATION (SEE NOTE 1)

THIS CONTROL BOX CONTAINS MOTOR STARTING WINDING CAPACITORS FOR ONE SPECIFIC MOTOR DESIGN AND IS NOT USABLE WITH A MOTOR HAVING A DIFFERENT DESIGN. THIS CONTROL BOX DOES NOT INCLUDE THE NECESSARY MOTOR STARTER WHICH SHOULD BE CONNECTED IN THE POWER CIRCUIT TO THIS CONTROL. ALSO, THIS CONTROL BOX DOES NOT INCLUDE THE NECESSARY INDUCTION RELAY WHICH MUST BE USED IN THE MOISTURE SENSOR CIRCUIT. CONNECT THE MOTOR AND CONTROL BOX FOR THE DESIRED ROTATION ACCORDING TO THE WIRING DIAGRAM AND NOTES BELOW.

NOTE 1: IN MOTOR AIR CHAMBER CONNECT FOR DESIRED ROTATION PER WINDING DIAGRAM BELOW.

NOTE 2: MOTOR IS PROVIDED WITH A NORMALLY CLOSED THERMOSTAT, CONNECT P1 AND P2 IN SERIES WITH STARTER HOLDING COIL. THERMOSTAT CURRENT MUST NOT EXCEED 2 AMPS AT 125 VOLTS OR 1 AMP AT 250 VOLTS.
DO NOT CONNECT P1 AND P2 IN SERIES WITH A MOTOR POWER LEAD.

NOTE 3: MOTOR IS FURNISHED WITH MULTICONDUCTOR POWER CABLE, THE COLOR CODING IS AS FOLLOWS:
T1 BLACK T4 WHITE TA RED GRD. GREEN

COUNTERCLOCKWISE ROTATION CLOCKWISE ROTATION

CONNECTION DIAGRAM**
SINGLE PHASE CAPACITOR START INDUCTION RUN
DUAL VOLTAGE SUMP PUMP MOTOR CONTROL BOX

WIRING DIAGRAM FOR SINGLE PHASE CAPACITOR START INDUCTION RUN SUMP PUMP MOTOR CONTROL BOX

DUAL VOLTAGE CLOCKWISE AND COUNTERCLOCKWISE ROTATION (SEE NOTE 2)

THIS CONTROL BOX CONTAINS MOTOR STARTING WINDING CAPACITORS FOR ONE SPECIFIC MOTOR DESIGN AND IS NOT USABLE WITH A MOTOR HAVING A DIFFERENT DESIGN. THIS CONTROL BOX DOES NOT INCLUDE THE NECESSARY MOTOR STARTER WHICH SHOULD BE CONNECTED IN THE POWER CIRCUIT TO THIS CONTROL. ALSO, THIS CONTROL BOX DOES NOT INCLUDE THE NECESSARY INDUCTION RELAY WHICH MUST BE USED IN THE MOISTURE SENSOR CIRCUIT. CONNECT THE MOTOR AND CONTROL BOX FOR THE DESIRED ROTATION ACCORDING TO THE WIRING DIAGRAM AND NOTES BELOW.

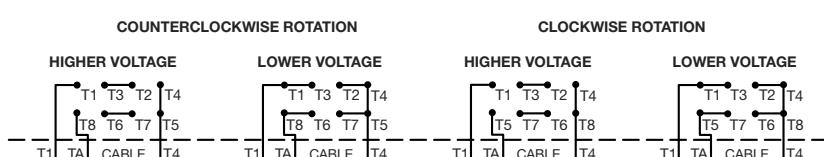

NOTE 1: CAPACITOR CONNECTIONS: CONNECT IN SERIES AS INDICATED BY SOLID LINE FOR HIGH VOLTAGE AND IN PARALLEL AS INDICATED BY BROKEN LINES FOR LOW VOLTAGE.

NOTE 2: IN MOTOR AIR CHAMBER CONNECT FOR DESIRED VOLTAGE AND ROTATION PER WINDING DIAGRAM BELOW.

NOTE 3: MOTOR IS PROVIDED WITH A NORMALLY CLOSED THERMOSTAT; CONNECT P1 AND P2 IN SERIES WITH THE MOTOR STARTER HOLDING COIL. THERMOSTAT CURRENT MUST NOT EXCEED 2 AMPS AT 125 VOLTS OR 1 AMP AT 250 VOLTS. DO NOT CONNECT P1 AND P2 IN SERIES WITH A MOTOR POWER LEAD.

NOTE 4: MOTOR IS FURNISHED WITH MULTICONDUCTOR POWER CABLE, THE COLOR CODING IS AS FOLLOWS:
T1 BLACK T4 WHITE TA RED GRD. GREEN
