Renewal Parts Bulletin

# 8000-Line/Spectra Motor Control Center

## Introduction

The 8000-Line motor control center, a quality product of the General Electric Company, has been designed and manufactured to give long and satisfactory service. This Renewal Parts Bulletin contains items which, through normal use, may require periodic maintenance and replacement. Other items may never need service or replacement during the useful life of the equipment.

We feel that you are in the best position to determine your investment in Renewal Parts, taking into consideration the total amount of 8000-Line motor control centers at your facility, your proximity to General Electric franchised distributors, and the importance of minimizing equipment downtime.

For identifying and ordering replacement parts not included in this publication, refer to the “Spares Recommendation” and “Parts List” section of the renewal parts quotation for your motor control center. If this is not available, identify the equipment as follows before contacting your local distributor or General Electric sales office:

1. Equipment-GE 8000-Line motor control center
2. Complete vertical section nameplate information (for structural and bus parts)
3. Complete plug-in unit nameplate information (for individual unit parts)

AMPS SUPPLY  SECT.  SECT.

VOLTS  PHASE  WIRE  HZ

Unit Nameplate (plug-in units-located on the right-hand vertical side barrier; Bolt-in units located in close proximity to the branch circuit overcurrent protective device)

CAT. NO.*	The General Electric, Mebane, N.C., factory catalog number
DIAGRAM NO.*	The outline summary sheet (often referred to as “record drawings”) for this section
AMPS-SUPPLY	The main (i.e. horizontal) bus rating
AMPS-SECTION	The vertical bus rating

When ordering replacement parts not identified in this bulletin, both the “CAT. NO.” and “DIAGRAM NO.” must be referenced, accompanied by a complete description of the replacement part(s) desired.

MODEL	Type of motor control center design
VOLTS TYPE	Unit power supply voltage. Unit function (as listed on outline-l summary sheet)
CONT. VOLTS	Unit control voltage.
UNIT NO.	The factory catalog number; this identifies the section and unit location within that section
DIAGRAM	The outline summary sheet and page number which contains the wiring elementary diagram for this unit
SIZE AMPS/HP	The NEMA size rating of the starter. The ampere rating of the circuit breaker or fusible switch (for feeder unit), or horsepower rating (for combination starter units)

When ordering a complete replacement unit or replacement parts not identified in this bulletin, the “MODEL”, “UNIT NO.”, and “DIAGRAM” must be referenced, accompanied by a complete description of the replacement part(s) desired.

**\* This information must be included on the order form.**

## 8000-Line/Spectra Motor Control Center Unit Parts

### Branch Overcurrent Protective Device

**Circuit Breaker:** 8000-line motor control centers utilize General Electric circuit breakers in combination starters, feeder tap units and main disconnect units. Replacement circuit breakers may be purchased through your local General Electric Distributor.

**Fusible Disconnect:** Modified versions of QMR and QMW switches are utilized in 8000-Line construction. When selecting the proper replacement switch, consideration must be given to the following:

- 1- Type of switch (QMR or QMW)
- 2- Size of starter, feeder or main
- 3- Fuse amperage and type of clip
- 4- Power supply voltage

Complete fusible disconnect switches consist of switch assembly, fuse clip base or base (as required), plus other factory modifications. Order by complete catalog number as listed in the tables on the following pages.

### Notes For Item 2 (Fusible Disconnect Switch)

- All switches listed are rated for 600 volts; for 250 volt applications, refer to Spare Recommendations.
- Installation kit must be ordered and installed with the replacement switch to obtain the complete switch assembly.
- Parts called for in individual Kit numbers must be ordered individually; do not order by kit number.
