The mentioned product sub-type of MEGADRIVE CASCADE drive is in Classic phase according to the ABB life cycle model outlined above. It represents drive’s installations where the recommended Life cycle Upgrade services were applied.

**Life cycle plan**
It is planned to keep the mentioned product sub-type in the Classic phase until further notice. After the Upgrade to this product sub-type has ceased it will remain for at least 10 years in Classic phase before it will be transferred to Limited phase.

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

**Recommended actions**
Besides the regular maintenance no actions are required. Complete life cycle services are available for the mentioned product sub-type.

**Further information**
For more information on drives life cycle management and available services contact your local ABB organization or at www.abb.com/drives.
