The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

**Current life cycle status**
ACSM1 product types are in the Active life cycle phase according to the ABB life cycle model outlined above.

**Life cycle plan**
ACSM1 product types will be transferred to the Classic life cycle phase 1.1.2021. It is planned to keep ACSM1 in the Classic phase until the end of 2023.

**Product availability in Classic phase**
During Classic phase new modules, for the following product types, will be available as spare parts until further notice.
