Do you need to deliver successful projects but find them time consuming and full of hassle?

Do you need help in delivering retrofit and plant modification projects with minimum disruption to your business?

Tired of project and design organisations with inadequate functional or operational expertise?

ABB Engineering Services supplies a range of consulting services in manufacturing operations and engineering, including project implementation and management to customers in the chemical, petrochemical, oil and gas, pharmaceutical and consumer industries worldwide.

Extending your capability

Maintaining a significant in-house engineering capability is increasingly difficult to justify in today's business environment, particularly in the field of project management where requirements vary.

Engaging the right project delivery partner ensures that:

- Projects get the focus they require
- Business benefits are maximised through enhanced operational performance throughout the life of the investment
- The right projects are delivered quickly and cost-effectively

Capabilities

ABB Engineering Services has a track record in delivering projects ranging from new build to minor improvement projects, effectively and safely, working seamlessly with our customers.

We have in-house engineering, design and consultancy capability to support all aspects of projects, including:

- Business option evaluation
- Feasibility studies
- Value engineering
- Conceptual estimating
- Front end engineering
- Detailed engineering
- Procurement
- Construction
- Commissioning and start-up

We are particularly experienced in delivering successfully those projects that carry inherent risks to existing operations and safety, requiring careful management.
Do you need to deliver successful projects but find them time consuming and full of hassle?

**Project Services**

**Customer benefits**

Our capabilities and approach offer:

- Focus on delivering business benefits with an operator’s perspective
- Optimum project definition with built-in operability
- Shortest time to beneficial operation
- Optimised delivery through flexible and knowledgeable people
- Projects delivered safely and efficiently with minimum disruption to business
- A project service tailored to customer’s specific needs

**Experience**

Our project managers and engineers have many years’ experience in delivering projects in a range of process industries. Most of our staff also have operational experience:

- Petrochemicals
- Oil and Gas
- Chemicals
- Pharmaceuticals
- Food and Drink
- Utilities
- Pulp and Paper
- Metals and Minerals

**Approach**

Our established project management and design processes exploit the experience and skills of our engineers to:

- Develop optimal project definition before significant expenditure is committed
- Identify and manage all business, technical and safety risks
- Work closely and flexibly with our customers
- Minimise production disruption through all phases of the project
- Find the most cost-effective and safe solutions

ABB Engineering Services can deliver complete projects or selected services to enhance customers existing capability.
