

ABB NORTH AMERICA

# Miramar, Florida

## Facility Overview

**Location**  
11600 Miramar Pkwy  
Miramar, FL  
33025

**Operational since**  
2005

**Number of employees**  
109

**Offering**  
Marine and Ports  
Electric Systems and  
Turbochargers

### What we do in Miramar

Miramar is home to ABB's Marine and Turbocharger businesses. ABB Marine provides energy-efficient propulsion systems and on-board and at-port electrical and automation systems. Our game-changing Azipod propulsors cut ship fuel consumption by 20% and our collaborative operations center provides 24/7 monitoring to support ships at sea. ABB's Turbochargers improve the efficiency and performance of diesel and gas engines rated up to 80+ MW. In Miramar, we focus on project execution, on-site installation, and service.

### Who we serve

ABB Marine's products are used by a variety of ships, fleets, and ports around the world including: cruise ships, icebreaking vessels, cargo tankers, and US

ports. Our port electrification and automation solutions are found in many US ports, significantly reducing harmful local emissions. ABB Turbocharging technology is used on-board trains, ships, mining and earthmoving equipment, off-shore platforms, and at power stations to increase the efficiency and performance of diesel and gas engines.

### ABB in the U.S.

ABB is a pioneering technology leader that works closely with utility, industry, transportation and infrastructure customers to write the future of industrial digitalization, increasing productivity and boosting efficiency.

~ 60 manufacturing locations

> \$14b invested since 2010

24,000 ABB employees

9 Major R&D centers
