Current life cycle status
The mentioned product sub-type of ACS6000c drive is in the Classic phase since 01.01.2007 according to the ABB life cycle model outlined above.

Life cycle plan
It is planned to keep the mentioned product sub-type in the Classic phase until the end of 2020, after which it will be transferred to Limited phase.

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

Recommended actions
In Classic phase complete life cycle services are available for the mentioned product sub-type. Besides the regular maintenance actions it is highly recommended to apply Life cycle Upgrade services. Through ACS6000c Life cycle Upgrade full range of life cycle services and support is available at least up to 2027.

Further information
For more information on drives life cycle management and available services contact your local ABB organization or at www.abb.com/drives.
