SiC LinPak

Hitachi Energy extends the well-established LinPak family with devices based on silicon carbide (SiC) technology.

Semiconductors from Hitachi Energy are the benchmark for quality and performance. In addition to celebrating the production of the one millionth HiPak, we were the first company to launch and ramp-up production of LinPak, the new standard for high-power IGBT & SiC modules. By enabling efficient power flow in the electric trains and trams, these devices bring people to work, by allowing a reliable operation of medium voltage drives they assist in the supply of the essential water to people as well as agriculture. To further improve the efficiency of these types of frequency converters, Hitachi Energy offers SiC based LinPaks.

SiC LinPak benefits
SiC LinPak devices deliver several benefits, including a massive reduction of switching losses, an increase in current density and higher maximum junction temperature. These enhancements mean power conversion system efficiency is improved, a smaller footprint is achieved and cooling requirements are much lower. The new SiC LinPaks enable increased switching frequency, significantly reducing filtering requirements. This makes the output wave curve much smoother, protecting the motor turned by the drive.

Features SiC LinPak

- Lowest internal stray inductance for a SiC based power module
- Easy replacement of Si LinPak similar devices – open standard
- One module for different voltage ratings, easy paralleling with one driver and excellent current sharing
- Voltage range 1700 V / 3300 V
- Unmatched power cycling capability
- Operation up to 175 °C
**Typical applications**

Typical applications for SiC LinPaks include:

- Propulsion traction converters
- Turbine starters in aviation
- String inverters in photovoltaic applications
- Battery charging systems
- Auxiliary traction converters
- Uninterruptible power supply (UPS) systems

**Availability**

SiC LinPaks rated at 1700 V and 3300 V are available. Further availability will be based on demand. Please contact us for more information.
