

Reliable and efficient power system

Customer

NWT, constructor and operator of commercial-scale greenhouses

Czech Republic

Customer needs

Intelligent, efficient and reliable power systems to provide ideal conditions at all times.

1100101001

Solution offering

ABB's low-voltage products, such as circuit breakers, switchboards and power distribution solutions.

[More information](#)

“

We understand how important it is to deliver the reliability needed to keep the greenhouse productive – any downtime has an immediate impact and the speed at which the tomatoes ripen.

”

- ✓ The Bezdínek farm has the most advanced greenhouse operation in the Czech Republic. Its special silvicultural lights make it the only facility able to produce fresh, healthy vegetables for 12 months of the year.
- ✓ ABB solutions also include air and molded case circuit breakers, AF contactors, manual motor starters, InLine II fuse switch disconnectors, OT switch-disconnectors, monitoring relays, and other devices.
