The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

**Current life cycle status**
ACS800-67LC liquid-cooled Wind Turbine Converters are in the Classic life cycle phase since 1.5.2022, according to the ABB life cycle model outlined above.

**Life cycle plan**
It is planned to keep ACS800-67LC in the Classic phase until the end of 2034, after which they will be transferred to the Limited phase.

**Product availability in Classic phase**
During the Classic phase new modules are available as spare parts for the following product types, until further notice:

<table>
<thead>
<tr>
<th>Product Type</th>
<th>Supplier Code</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACS800-104LC Inverter modules</td>
<td>RB8i</td>
</tr>
<tr>
<td>ACS800-104LC IGBT supply modules</td>
<td>RB8i</td>
</tr>
</tbody>
</table>

Contact your local ABB representative for availability and factory-installed optional devices.

**Recommended actions**
It is recommended to follow the preventive maintenance program.

Full range of life cycle services and support are available during the Classic phase.
Service availability in Classic phase
See details at new.abb.com/drives/Services and contact your local ABB representative for availability.
