ABB Ekip UP
Leveraging our digital innovations

- **Monitoring**
- **Protection**
- **Control**

---

**DISTRIBUTION PROTECTION**
**GENERATOR PROTECTION**
**ADVANCED COMMUNICATIONS**

Basic switchboard with the latest protection and monitoring innovations.

**UP-date**
100% Applicable for every low-voltage scenario

Compatible with all switching devices

This digital unit upgrades low-voltage systems, transforming them into next-generation electrical distribution plants.

**UP-load**
electrical system data to the cloud-connected ABB Ability platform

50% time saving when retro-fitting, with reduced impact on switchboard design

Maximize UP-time with easy installation

---

ABB Ekip UP
transforming low-voltage systems into next-generation electrical distribution plants

**UP-date** | **UP-grade** | **UP-load** | **UP-time**

---

**MARKET TRENDS**
**MICROGRIDS**
**CONNECTIVITY**

are changing the way electrical distribution plants are managed.

New grid architectures and the power of data

4.3 connected devices per person

>350 M circuit breakers have been installed worldwide in the last 10 years which lack advanced features for resource monitoring and optimization

>1,5 GW low voltage microgrid installed worldwide
