

# TALYS ASP400.

Ultra-low maintenance  
FT-NIR analyzer for the  
Refining & Petrochemical  
industries.

ABB's TALYS ASP400 series is a single-point fiber optics based industrial FT-NIR analyzer designed to make in-line monitoring and control of continuous processes easy. Its simple installation enables real-time process monitoring, determination of stream properties or physical qualities, process characterization and early troubleshooting. The embedded Ex Area purge controller (no analyzer PC required) provides full connectivity to DCS: Modbus TCP/IP, RTU and OPC. Plus, with virtually no scheduled maintenance for 5-years, it delivers a low total cost of ownership. TALYS ASP400 - Measurement made easy. [www.abb.com/analytical](http://www.abb.com/analytical)
