ABB Robotics Service
Maintaining your robots for a sustainable future

1. Built to last
   - Some of our robots have been in use for more than 35 years, thanks to our high-quality maintenance.

2. Extended lifetime
   - Nearly all our robots used in automotive manufacturing get a second life. 10-20% even get a third.

3. Repairing and fixing
   - Over 35,000 replacement components are available from our global hubs, conveniently located where you need them.

4. Upgrade and retrofit
   - We upgrade and retrofit our robots for optimized lifecycles.

5. Buy back
   - 60-80% of a robot can be reused. The rest is sent to certified recycling partners.

6. Remanufacture and refurbish
   - Refurbishing a robot produces 75% less CO₂, versus producing a new one.
