

ABB Review 2/2008 ... for a better world

A world of difference

6

Better technology for a better world

All around the world, people are plugging in to greater comfort.

10

Value-added comfort

Intelligent building system technology is enhancing the meaning of “flipping a switch.”

Bringing technology home

15

Invisible safety

ABB is hard-wiring safety into our homes.

19

Breathing new life

A stream of innovative technologies is helping quench water shortages.

Moving ahead

25

Performance on track

ABB's transformers and converters are just the ticket for rolling comfort and flexibility into trains.

30

Going up!

ABB Review tells the uplifting story of a high performance machinery drive for elevators.

34

Smooth operator

Cranes with brains are hoisting safety and performance.

Weather and leisure

39

Watching the weather

When ABB talks about the weather, a cloud lifts over many a forecaster.

43

Moving more than goalposts

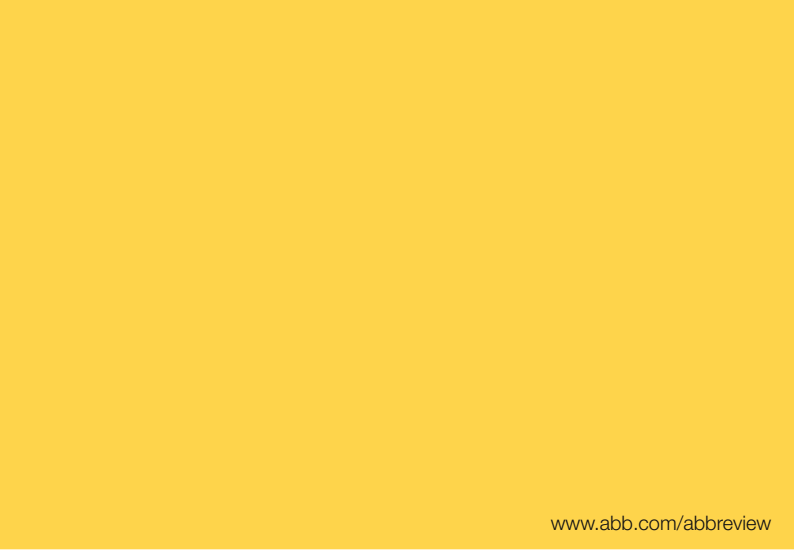

Touchdown! ABB drives and motor starters can adjust the roof of a stadium, or even take the entire playing field outside.

Simple and friendly

47

The sound of silence

Noisy transformers don't make good neighbors – ABB is teaching them not to hum.

www.abb.com/abbreview

52

Light, safe and effective

HVDC Light® cable systems are brightening the future of power transmission.

Perpetual pioneering

56

Success story

A helper in an orange coat hatched out of an egg and rebuilt entire industries: *ABB Review* explores the history of ABB robotics.
