Purpose and function

This system is designed for WC facilities for people with reduced mobility and others in need of assistance. In addition, the system has a light panel that can centrally detect alerts.

When the alarm button is pressed or the pullcord is pulled, the indicator light outside the WC facilities will blink and the buzzer will sound intermittently. The indicator light can detect which WC the alert is coming from and it has a buzzer that can be reset with the button. The alert remains in effect until it is reset with the button beside the WC door.

Accessible toilet alarm (FEH1001) with follow-up alarm

Special features of the system:
- The system is equipped with a signaling panel which shows centralized alerts

- The cord should be left long enough to touch the floor
- Installation above the WC door on the outside
- Control unit with reset button
- Transformer always installed in its own mounting box
- Double protective insulation between the primary and secondary coils is ensured by a insulation tube
- Buzzer with push button
- Six indicator lights
Special features of the system:
- Accessible toilet alarm (FEH1001) with follow-up alarm

Additional rooms can be connected
