management technology

# GasTracker

# GasTracker

## Next-generation gas management technology

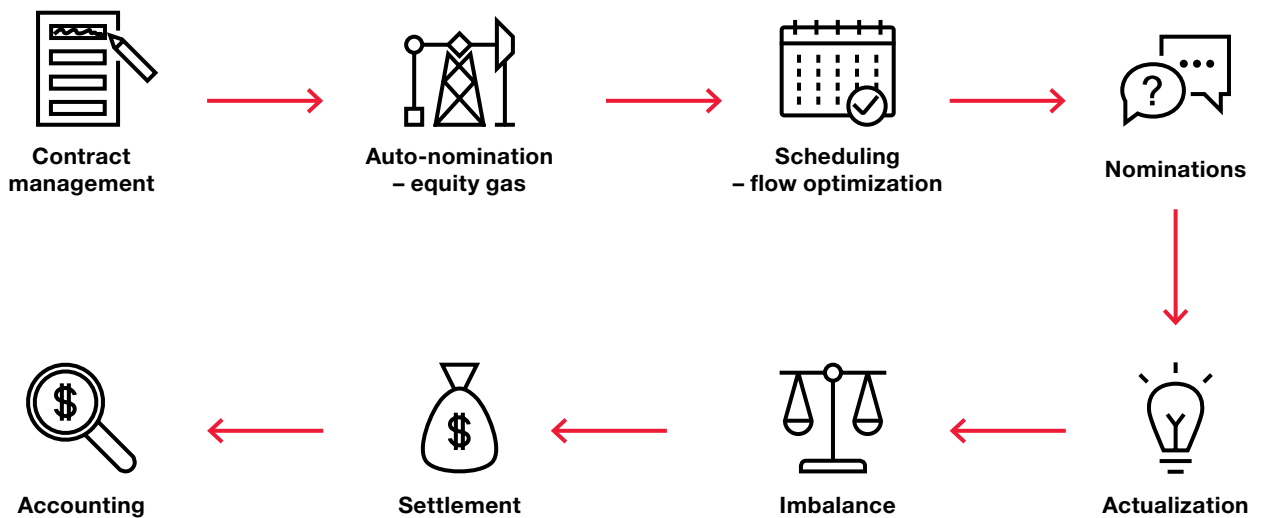

### Harness the power of GasTracker

GasTracker is a module of TRMTracker, designed to manage the entire lifecycle of gas

- Provides tight integration across all aspects of the trading and operation lifecycle
- Utilizes the core trading, risk and settlement functionalities of TRMTracker
- Contains storage module
- Effectively manages accounting

### Automates complex processes

- Auto-nomination and gas flow optimization (i.e., scheduling for equity gas and on mainline pipelines)
- Automated actualization
- EDI and automated email and texting solutions for user convenience
- Simplifies the complex confirmation process
- Streamlines allocations process

## Notifications

- The user friendly setup notifications application allows users to email or text reports based on data changes in the system
- Reports can be easily scheduled for user convenience
- Provides constant short term to real-time position updates automatically

## Customer portal

- Create/edit transportation agreements
- Create/enter nominations
- View balances
- View allocated volumes
- Set up notifications

## Create/edit transportation agreement

- Successfully maintains valid receipt and delivery points
- Service priority, transport rates and fuel charges are efficiently managed
- Supports various charge type

## ABOUT

GasTracker was formerly from Pioneer Solutions, which is now part of Hitachi Energy. We are a global software provider of next generation C/ETRM, environmental management, and regulatory compliance solutions.

Offering the latest in business processing capability with modern data structure, our products offer the user a configurable environment that allows for front-to-back automation of your business processes.

Serving some of the largest utilities and energy companies across the globe, our flexible solutions have been organically built since 2002 for rapid implementation and superior service at an overall lower cost of ownership
