The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

**Current life cycle status**
ACS350 General Machinery Drives are in the Limited phase since 1.1.2017 according to the ABB life cycle model outlined above.

**Life cycle plan**
ACS350 will be transferred to the Obsolete phase 1.1.2020.

**Product availability in Obsolete phase**
The product is not available in the Obsolete phase. It is recommended to replace the ACS350 with the latest generation drives, e.g. ACS355 or ACS380.

**Service availability**
Only replacement and end-of-life service are available in the Obsolete phase.

**Further information**
For more information on drives life cycle management and available services, contact your local ABB representative or at new.abb.com/drives/Services
