

Writing the digital future takes ability.

ABB Ability™

ABB has always been a pioneering technology leader in the digital world, whether on-premise or remotely. ABB Ability™ brings together our digital offerings as one unified offer.

WHAT IS ABB ABILITY™?

- Our unified, cross-industry digital offering, from device to edge to cloud

WHAT DOES IT INCLUDE?

- **More than 210 Industrial Internet solutions**
Digitally connected devices, systems and digital-enabling services
- **An Industrial Internet technology platform and cloud infrastructure**
An open, globally available, digital-industrial ecosystem for customers, partners, suppliers and developers leveraging Microsoft Azure

WHAT MAKES ABB ABILITY™ GREAT?

EXPERTISE + CONNECTIVITY

ABB Ability combines deep domain expertise with unmatched experience in connectivity to enable customers to know more, do more, do better, together.

Deep domain expertise

- Insights across 20+ industries
- More than 40 years of experience in digital technology
- Global leadership in industrial process and automation knowledge
- Leader in control systems

Unmatched connectivity experience

- Leading installed base of 70m digitally enabled devices, 70,000 digital control systems and 6,000 enterprise software solutions
- World leader in securing and using data

WHAT IS THE BENEFIT FOR THE CUSTOMER?

KNOW MORE, DO MORE, DO BETTER, TOGETHER

- Individual consultation, support and solutions from a trusted advisor and partner
- Improved operational performance, efficiency and productivity through enhanced uptime, speed and yield
- No data or system lock-in, giving optimal flexibility
- Access to best-practice benchmarking, industry-level and cross-industry data, etc., from the network effects of a cloud-based industrial ecosystem
- Transparency into operations, from the device to enterprise level

**EXPERTISE + CONNECTIVITY
makes ABB Ability™ unique**
