The latest ABB hard-bus retrofill solution

OneFit

OneFit is the latest ABB hard-bus retrofill design concept, embedding an integrally safe plug-in technology to easily connect the new breaker to a wide range of existing non-ABB panels.

OneFit retrofill solution is composed by an adaptation kit and a standard withdrawable apparatus. This approach allows having benefits both in short and long term perspective:

- equipment and spare parts are interchangeable with new ABB extension panels and additional switchgear
- apparatus are reusable in future ABB replacement switchgear providing an optimized investment to next substation renewal.

OneFit

OneFit is the latest ABB hard-bus retrofill design concept, embedding an integrally safe plug-in technology to easily connect the new breaker to a wide range of existing non-ABB panels.

OneFit range is composed by four packages at increased technological content targeting personnel safety and switchgear renewal:

- OneFit** The true retrofill solution
- OneFit Safety** Personnel protection increase with closed door racking operation
- OneFit Safety Plus** Remote control moves to a new operational safety level
- OneFit eSafety Plus** Integral equipment revamping
