

JDF200. Know what's going on — Clear, fast and rugged field indication made easy.

ABB's JDF200 universal field indicator delivers clear and easy to read flow, pressure, level, temperature, current and heat transfer rate data from your transmitter. It features a multilingual, multi-line display that makes it simple to use. Thanks to its rugged construction, vibration and corrosion resistance, as well as explosion proof certification, the JDF200 can be used all around your plant - Measurement made easy.
