NOTES:

1. WARNING!
   Using a non-factory RS232 data cable may result in damage and may void system warranty.

2. All installations in hazardous locations must comply with requirements of certification drawing 2015246-CD.

Primary setup items for Transnet 900 RS-232 radios:

1. Mode R
2. ADDR XXXX - where (xxxx) is radio’s address, which is also the same as the Master Radio’s Address.
3. SLEEP ON.
4. Port RS232.
5. BAUD 9600 8n1 - (other baud rates and parity can be used but needs to match the flow computer).

Note: Typically, all other setup items can be left in their default state.

Ref: 2101240-WI

Radio repositioned for clarity.

Totalflow Cable Assy P/N 2101238-003

Resistor is built in to factory data cable.
