How do I add a new site?
A Adding a site can be done by selecting the Profile button in the top right corner of the application. This process is fully documented in the Installation Guide.

Are there more granular forecast prices?
A Yes. ABB Advisors produce the North American Power Reference Case in May and November of each year. This product includes a comprehensive report, 25 years of hourly data if needed, and forecasts for new builds, retirements, fuel prices, load growth, electricity prices and more. This report and data can be purchased separately.

How do you determine Gross Revenue Projections?
A ABB has access to a lot of market information. To produce this revenue projection, we take a few years of LMP history for the site and we compare those to the early years of forecast prices. We then use this differential to adjust forecast prices in future years while also incorporating modeled capacity factors that we have derived and aggregated from NREL data. More information can be found in the Help Guide.

How do I buy more sites?
A Sites can be purchased at https://us.marketplace.ability.abb. Within Renewable Insights we can track how many sites you have used from each subscription, which allows for different teams within the same company to have separate subscriptions if they choose.

Can you track this site versus multiple sink nodes?
A Currently, this is only available if you add a new Source/Sink combination. If you plan to consistently analyze different sites versus different sinks then you may find value in ABB Ability Velocity Suite. This product provides a lot of the base data for the Renewable Insights tool.

Where does the data come from?
A Renewable Insights sources relevant information from a variety of data sources in ABB. Most of the data is derived from ABB Ability Velocity Suite or the ABB North American Power Reference Case.

How do I add users to access Renewable Insights?
A Once you have purchased the application you’ll be able to easily manage users and access from the marketplace. https://us.marketplace.ability.abb

Can I import my own data?
A Currently, this functionality is not available in Renewable Insights however, other offerings from ABB may allow for this functionality. Please contact us to discuss further.
