OPERATIONAL SINCE

2016

What we do in Senatobia

Senatobia's 500,000 sf facility manufactures power circuit breakers, including state-of-the-art Tmax XT and Emax 2 products, Safe Y power panel boards, TrueOne automatic transfer switch assemblies, and other enclosed control products. Senatobia is fully certified with ISO 9001, 14001, 450001, 50001 and manufactures breakers that are Build America, Buy America (BABA) compliant. Senatobia is the only facility in the U.S. that makes molded case circuit breakers, that provide the necessary protection and connections for electrical systems. In the last 4 years, Senatobia increased its volumes and revenues by 500%. ABB announced a \$40m investment at the site in the spring of 2025.

Who we serve

Circuit breakers and control products are used in a wide range of applications and can be found in industrial facilities, commercial buildings, and data centers. Our circuit breakers help protect the equipment, appliances, and devices that drive American businesses, buildings, and factories from electrical faults.

ABB in the U.S.

ABB is a global technology leader in electrification and automation, enabling a more sustainable and resource-efficient future. The United States is ABB's largest market, and we have significantly expanded our operations across the country through strategic acquisitions and investments.
