

ABB Low Voltage Products A Major League Lineup

The Starting Lineup

Introducing ABB's Major League Lineup. This season, ABB Low Voltage Products is proud to offer one of the most comprehensive lineups of new products for the UL market. From new and improved circuit breaker and disconnect switch offerings to enclosures and connectors, ABB has every base covered. This lineup is a home run and will take your business to the post season. For additional product information, please visit: www.abbmajorleague.com.

SU200M — Next Generation Circuit Protection

- Up to 40A at 480Y/277VAC
- Reference temperature of 40° C
- Enhanced thermoplastic housing material for greater durability
- Laser printing on dome and side for easy identification
- Compatible with current UL489 S200 MCB accessories

SMISLINE TP — Finger-Safe Power Distribution

- IP20 safe power distribution
- Provides flexibility in design and maintenance
- Modularity allows for system expansion with minimal rewiring
- Efficiency in space and design

New Enclosures for Automation — SR2, SRX and Gemini UL Series

- SR2 Series, Painted Steel, UL Listed, NEMA 12 for indoor applications
- SRX Series, AISI 304 Stainless Steel, UL Listed, NEMA 4X for indoor or outdoor applications
- Gemini UL, Thermoplastic, UL Listed, NEMA 4X for indoor or outdoor applications
- All are designed for easy and flexible installation on the wall or floor with the doors hinged on the left or right side
- All offer a complete ABB solution
 - Standard optional accessories for mounting ABB low voltage components

CMS — Measuring Performance

- Measuring performance in a minimal amount of space
- Compact sensors allow for direct or Universal mounting
- Able to measure AC or DC current
- Easy and intuitive setup of sensors and control unit
- UL508 approval

PSTX Softstarts — Leading the Way in Soft-Starting

- Complete control of pumps by using torque control to start-stop and even reverse pump flow
- Built-in bypass reduces energy consumption at full speed-pre-installed and verified at the factory
- Can handle both load and network irregularities, thus offering complete motor protection

Extended Range of Fuse Holders — E90J Class J 30A & 60A

- Completes the E90 range of UL Listed ABB fuse holders for the North American Market
- 30A and 60A rated at 600VAC
- Available in 1, 2 and 3 pole versions
- “Finger safe” 90° flip hinge handle
- Fast installation and reduced maintenance time
- Vented grooves and cooling chambers for improved heat dissipation

Cam Switches — Versatility Made Simple

- Versatile mounting options
- Designed for safety and performance: touchsafe construction and up to 500,000 operations
- Most powerful and complete web configurator in the market

Tmax XT — The New Molded Case Circuit Breaker

- 4 frame sizes to 250A, 600V AC/DC
- Expanded capacities, including 200kA in the smallest frame on the market
- Extreme versatility of application options:
 - TM and Electronic MCCBs, MCP, MPCB, MCS
 - Plug in and withdrawable versions
 - Complete line of accessories

Heavy Duty Safety Switch — State of the Art Design and Performance

- Superior performance
- Enhanced safety: visible contacts, yet touchsafe
- Easy installation and savings in maintenance: spacious interior and field replaceable parts

IEC Pin and Sleeve Connecting Devices

- Watertight to IP67 and IP69K
- Self-extinguishing UV resistant thermoplastic polyester (PBT) grade Valox® 357 housings
- Ideal for high pressure washdown applications and outside use
- Self-cleaning design helps to reduce down time
- Superior cable strain relief and cable detachment prevention
