FUNCTIONAL OVERVIEW

Sound Absorbing Panels

Reduces unwanted noise in the control room environment

The Sound Absorbing Panels reduce unwanted noise in the control room on a daily basis. The panels are equipped with a cushioned material for maximum noise reducing effect. This will create a better sound climate for the operator which in turn will result in increased focus and efficiency. Operator well-being is crucial for making good and informed decisions 24/7.

The panels comes in two different shapes that can be wall-mounted in different patterns to suit custom needs. Available in a range of Standard Colours.
