The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

Current life cycle status
The mentioned product subtypes of CYCLOCONVERTER are in the Classic life cycle phase according to the ABB life cycle management model outlined above.

Life cycle plan
With the scheduled sales stop of CYCLOCONVERTER Control Upgrade (AMC34), the end of Classic life cycle phase is determined on the 31.12.2034. This schedule allows at least 10 years of Classic life cycle phase for all drives where the Control Upgrade (AMC34) service is applied.

Starting from 1.1.2035 the 3 years Limited life cycle phase will start.

Recommended actions
Besides the regular maintenance action no further actions are required. Complete life cycle services are available for the mentioned product subtypes.

Product availability in Classic life cycle phase
Those product subtypes are not available for sale. It represents drive’s installations where the recommended Life cycle upgrade services were applied.

Service availability in Classic life cycle phase
