In times with high focus on productivity screwless terminal connectors are growing in popularity. Actually up sixty percent of the installation time can be saved with screwless terminals.

We are now completing our standard offering with Fast & Safe in parallel with Easy & Safe. Fast & Safe is a complete offering of 16-32A plugs and sockets, both as IP44 and IP67. Instead of a screw providing contact pressure at the terminal, Fast & Safe is built on spring technology.

More than reducing installation time spring technology has high resistance against vibrations and heat fluctuations.

Screwless terminals = quick installation.
### Industrial plugs and sockets
