

Innovation at the core of our services  
Delivering design solutions

ABB Lighting / L'Ebenoid has been supporting our customers projects for more than 90 years, providing quality solutions which respect the environment and international regulations.

**Our products**

In addition to our lighting, vandal resistant and movement detection expertises, ABB Lighting / L'Ebenoid provides made in France products to suit all of today's customers and consumers. This includes In-house LED modules, dual power supply or infra-red / hyperfrequency detection.

**Dedicated R&D team**

Our research & development team has an in-house electronic photometric laboratory based in France. Our dedicated researchers and designers aim to push the boundaries of lighting and functions.

**Calibrated products**

ABB Lighting / L'Ebenoid is committed to providing innovative solutions to reduce the costs of internal lighting (with an increased life span and a reduced need for servicing), while providing comfort, quality and energy efficiency. Every lighting product is individually tested at the factory before it's shipped.

**Innovative solutions**

ABB Lighting / L'Ebenoid uses the latest generation of LEDs (B10L80) to ensure high performance and the longevity of its products, providing uniform color temperature and quality of light. Thus, the energy consumption (A++) and the increased life span of fixtures reduces maintenance costs (no re-lamping), especially in difficult to access areas.

**Advanced technologies**

The electronic systems developed by ABB Lighting / L'Ebenoid support an unlimited number of on / off cycles. We have also designed and developed the first high-frequency movement detector - 24 GHz to complete our infrared detection technology.

**Team support**

Our teams of support staff are always available to serve your daily needs, quickly and efficiently. The sales teams closely communicate with our logistics and quality teams based in a single site in Saint-Priest, near Lyon (France).

ABB Lighting  
From stylish to functional lighting

ABB Lighting  
From stylish to functional lighting

Centre commercial ATTOL, Angers, France - Photographer Luc Boegly

ABB Lighting / L'Ebenoid is more than just a supplier, we are a true partner. The brand has built its reputation on its industrial know-how, listening to market needs and the will to always innovate.

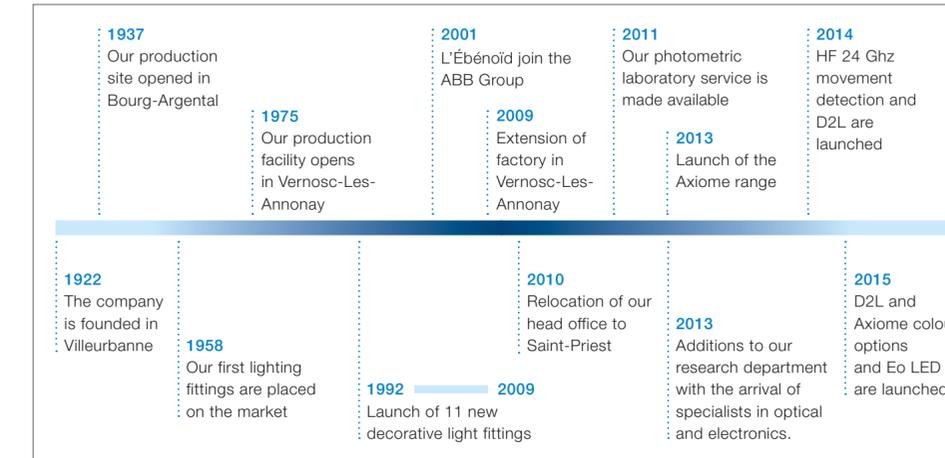

ABB Lighting  
Design & function

**Design bulkheads**  
In a wide range of contemporary styles, L'Ébenoïd / ABB lighting offers a selection of decorative luminaires, combining design and functionality. Oval, squared or rounded forms, the design ranges respond to all needs.

**Sextan**

**Sextan offers stylish aesthetics, comfort and energy savings**  
This premium lighting fitting has a curved ring and comes in a choice of two finishes - white and grey. Its polycarbonate diffuser provides a vandal resistant characteristic to this stylish bulkhead.

**Functional bulkheads**  
Customise and compliment the color of paint in your buildings entrance hall, balconies, windows and doors - a well established trend. Align your lighting to the environment thanks to the 3 new D2L and Axiome colors.

**Axiome**

**Easy to install & functional lighting**  
This vandal proof light is ideal for installers and maintenance professionals thanks to its smooth implementation. Axiome is available in 2 sizes, 3 colors and 3 lighting sources, to meet the different needs of commercial and residential living. Functional and lightweight, it is easy to install and connect without compromising on its energy savings.
