Dear customer

WRAS approval for FER and FEF Electromagnetic flowmeters has expired. **Note that the flowmeter you have received is ACS approved.** The following information describes the tests WRAS and ACS conduct to provide approvals:

- **WRAS**
  Any water fitting that, when installed, will carry or receive water from the public mains water supply in the United Kingdom, must comply with the Water Supply (Water Fittings) Regulations or Scottish Byelaws. The WRAS standard conducts odour and flavour, color and turbidity, microbial growth, leaching and pH and conductivity tests.

- **ACS**
  Attestation De Conformite Sanitaire (ACS) is the material safety approval required for materials and products in contact with drinking water in France. The standard conducts odour and flavour, chlorine consumption, pH and conductivity, COV and GC-MS screening and TOC.
