

BUSINESS AREA: PROCESS AUTOMATION

ABB Marine & Ports

Facts & Figures

ABB's Marine & Ports division supplies world-leading technologies that are driving the evolution of sustainable shipping. Electrical propulsion, data-driven decision support and integrated solutions for ship and shore from ABB are paving the way to a zero-emission marine industry, providing greater efficiency and reliability to shipowners, and preparing vessels to meet the demands of tomorrow. Our automation and electrical solutions are making port and terminal operations safer, greener and more productive. ABB Marine & Ports operates in 26 countries.

Revenues

\$750–1,250 million

Market position

No. 1 globally

Key market drivers and trends

- **Decarbonization and regulations:** International Maritime Organization's goal of halving GHG emissions from ships by 2050 is driving the demand for efficient and sustainable technologies, such as electric and hybrid vessel systems.
- **Energy transition:** energy mix shifting towards cleaner fuels and energy sources.
- **Digitalization:** leveraging new technologies for ships and container terminals.
