G6400e – ABB drives for water ACQ580 series offering, Internet course

**Course type**
This is a web-based training course.

**Course duration**
The course duration is approximately 20 minutes.

**Course goal**
The goal of this course is to understand the ACQ580 series drives for water.

**Student profile**
This course is intended for sales managers, sales engineers, product managers, anyone selecting or dimensioning an ACQ580, or for anyone wanting to know what options and ratings are supported for ACQ580 drives for water.

**Notes**
If you have no experience of working with drives, it is highly recommended to take a hands-on course in addition to this course, to be able to utilize the drive to its full potential.

**Prerequisites**
An Internet connection. The recommended browser is Microsoft Edge or Google Chrome.

**Course objectives**
Upon completion of this course, you will be able to:
- Describe the product positioning of drives for water.
- Describe the supported water applications.
- Recall the product range, options and frame sizes.
- Recall supported voltages and power ranges.
- Describe enclosure classes.
- Interpret the content of the type code.

**Main topics**
- Product positioning of drives for water
- Supported water applications
- Product range, options and frame sizes
- Supported voltages and power ranges
- Enclosure classes
- Content of the type code
