Current life cycle status

The ACS800 product types concerned are in the Classic phase since 1.7.2017 according to the ABB life cycle model outlined above.

Life cycle plan

It is planned to keep the above listed product types in Classic phase until the end of 2029.

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

Recommended actions

No actions are required. Full range of life cycle services and support are available during the Classic phase.

Further information

For more information on drives life cycle management and available services contact your local ABB organization or at www.abb.com/drives.
