Process Control System (PCS)

A cyclic communication can be established with all PROFIBUS compatible PCSs. Acyclic communication requires a Master Cl. 2, the communication may be established on the basis of the generic slave (to be in acc. to Profile 3.0; only standard parameters) or a TF 12 specific driver.

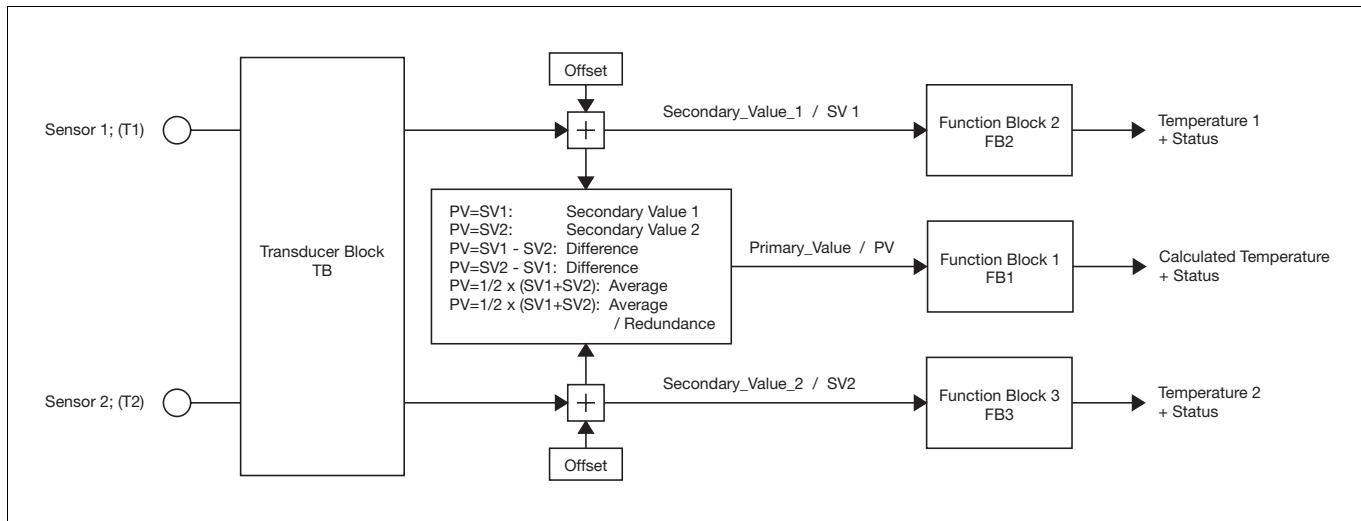

Those drivers are available for following PCSs:

- Freelance 2000/Control Builder F (DTM or template)
- Symphony (Composer via DTM)
- Siemens (via PDM)

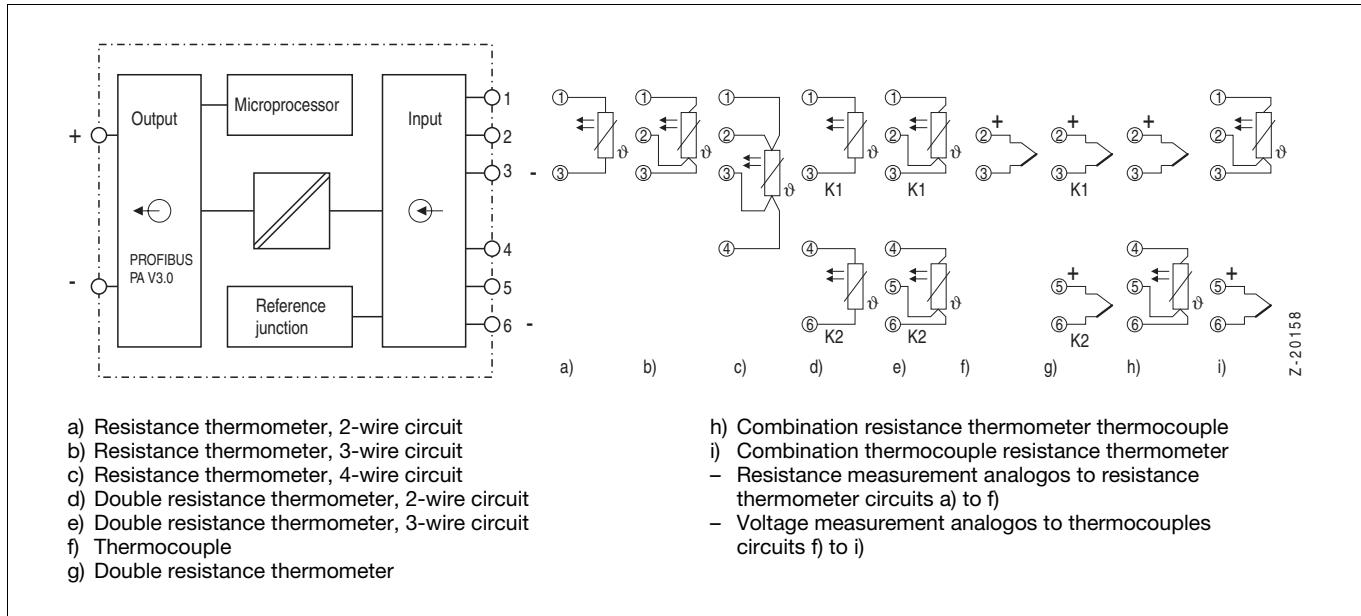

Configuration-tools

- DTM for FDT 0.98-1 and 1.2 interface and DSV401 (SMART VISION)
- Siemens Simatic PDM driver for TF12/TF212
