Accessories for MCBs and RCDs Auxiliary switch S700 + H2WR	4/89

## Auxiliary elements and accessories for MCBs and RCDs

### Selection tables

Combination of auxiliary elements with S200, S200M, S200P, DDA200 + S200 or DS200  
(for S200 80-100A no combination with DDA)

<b>H</b>	Auxiliary contact	S2C-H6R
<b>H-R</b>	Auxiliary contact	S2C-H6-...R
<b>S/H</b>	Signal/Auxiliary contact	S2C-S/H6R
<b>S/H (H)</b>	Signal/Auxiliary contact used as auxiliary contact	S2C-S/H6R
<b>ST</b>	Shunt trip for S 200 MCB	S2C-A...
<b>UR</b>	Undervoltage release	S2C-UA
<b>OR</b>	Overtoltage release	S2C-OVP
<b>H-L *</b>	Auxiliary contact for S 200 MCBs to be mounted on the left	S2C-H...L
<b>H-BF</b>	Auxiliary contact for MCBs bottom fitting (1 for each pole of MCB)	S2C-H01/S2C-H10
<b>BP</b>	Mechanical tripping device	S2C-BP
<b>NT</b>	Switched neutral	S2C-Nt

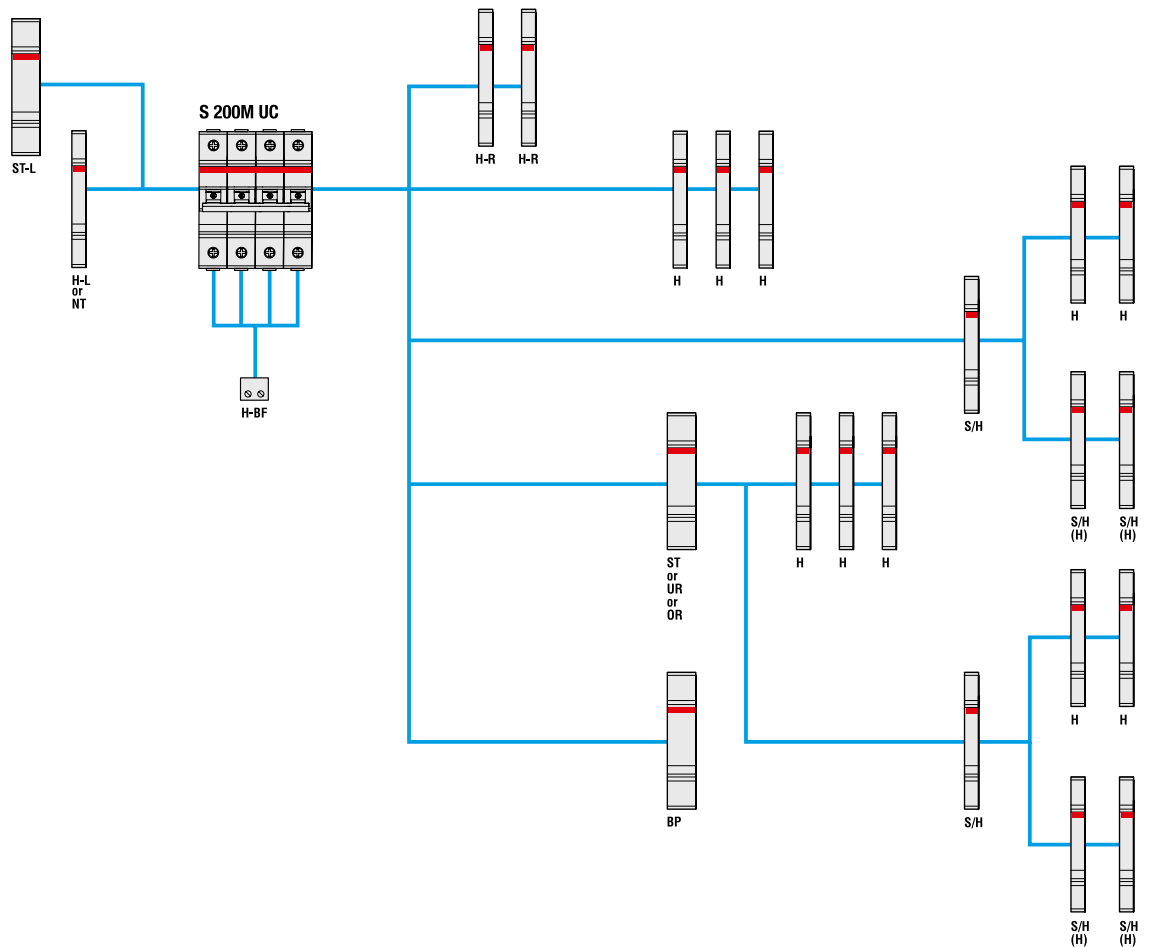

In case of using rotary operating mechanism S2C-DH (only right side mountable) the auxiliary devices left side and bottom fitting auxiliary contact could be used.

\* H-L and H-BF cannot be coupled with DS200.

## Auxiliary elements for

MCBs S 200, SN 201, RCDs F 200, DS 200, DS201-DS202C, DS203NC, DSE201 M, AFDD S-ARC1 and Switch disconnectors SD 200 series

Auxiliary elements

Auxiliary contact and signal/auxiliary contact		
S2C-S/H6R, S2C-H6R, S2C-H11L, S2C-H20L and S2C-H02L		
Utilization category		AC14 1A/400V, 2A/230V - DC12 1A/220V, 1,5A/110V - DC13 2A/60V, 4A/24V
Conventional free air thermal current	A	10
Min. operational current/voltage*		10 mA at 12 V; 5 mA at 24 V
Rated conditional short-circuit current	V	230 V AC 1,000 A with S201 K4
Overvoltage category		III
Rated impuls withstand voltage (1.2/50µs)	kV	4
Cross-section of conductors	mm <sup>2</sup>	0.75...2.5 (up to 2 x 1.5 mm <sup>2</sup> for S2C-H11L, S2C-H20L and S2C-H02L)
Tightening torque	Nm	1.2 (max. 0.8 for S2C-H11L, S2C-H20L and S2C-H02L)
Contact stability in vibration test according to IEC/EN 60 068-2-6		5g, 20 sweep cycles 5...150...5 Hz at 24 V AC/DC, 5 mA automatic reclosing < 10 ms
Mechanical service life		10000 operations
Dimensions (H x D x W)	mm	85 x 69 x 8.8

Auxiliary contact and signal/auxiliary contact		
S2C-H6-11R, S2C-H6-20R, S2C-H6-02R		
Utilization category		AC14: 1A/400V, 2A/230V DC12/DC13: 1A/50V, 2A/30V
Conventional free air thermal current	A	10
Min. rated operational current/voltage*		10 mA at 12 V; 5 mA at 24 V
Rated conditional short-circuit current	V	230 V AC 1,000 A with S201 K4
Overvoltage category		III
Rated impuls withstand voltage (1.2/50µs)	kV	4
Cross-section of conductors	mm <sup>2</sup>	0.75...2.5
Tightening torque	Nm	1.2
Contact stability in vibration test according to IEC/EN 60068-2-6		5g, 20 sweep cycles 5...150...5 Hz at 24 V AC/DC. 5mA automatic reclosing < 10 ms
Mechanical service life		10000 operations
Dimensions (H x D x W)	mm	85 x 69 x 8.8

\* ensures safe contacting without current interruption by pollution layer

## Auxiliary elements for

MCBs S 200, SN 201, RCDs F 200, DS 200, DS201-DS202C, DS203NC, DSE201 M, AFDD S-ARC1 and Switch disconnectors SD 200 series

S2C-S/H6R

### Signal/auxiliary contacts

Signal contacts indicate if a device tripped due to a failure (overcurrent/short-circuit for MCBs and RCBOs; earth fault for RCCBs and RCBOs). Auxiliary contacts indicate the position of the contacts, independent if a failure occurred or the device was operated manually.

**S2C-S/H6R:** choice through a selector between signal and auxiliary contact.

**S2C-H6R and S2C-HxxR:** Auxiliary contacts with contact configuration according the following table. All right-side mounted contacts are suitable for MCBs, RCDs, AFDD and switch disconnectors SD200 according the “Selection tables” which are displayed in the beginning of chapter 4.

**S2C-HxxL:** Auxiliary contacts with contact configuration according the following table. These contacts are left-side mounted and fit to S200 MCBs and switch disconnectors SD200 according the “Selection tables” which are displayed in the beginning of chapter 4. Especially when using a motor operating device this is a possibility to add a contact as the right side mounted ones do not fit within this combination.

**S2C-Hxx:** Unique bottom-fitting contact for the S200 compact range, DS201 (2019), DSE201 M and SD200 switch disconnectors. Simple and space-saving solution. Also intended for retrofitting.

### Shunt trips

Function: remote opening of the device when a voltage is applied. Suitable for MCBs S 200 series, RCBOs DS 200 series, SD 200 switch disconnectors series.

Shunt trips use a coil like MCBs for tripping. To trip a shunt it is necessary to choose the right voltage and make sure the corresponding lbmax (as mentioned in the table above) is provided by the power supply used. If the power supply can provide higher currents the shunt trip will reduce the current to lbmax due to its internal resistance.

As soon as the shunt tripped, the contact inside is open – the electrical circuit is disconnected even if the shunt trip is still powered on. The free-tripping mechanism of the shunt trip allows a restart of the MCB only after the shunt trip gets no external release signal anymore.

### Overvoltage release

Function: monitoring voltage between the neutral and phase; when an overvoltage reaches the threshold value, the OVP device causes the tripping of the associated MCB or RCCB. Suitable for MCBs of the S200 series up to 63 A, and RCCBs of the F200 series up to 100 A and RCBOs DS201, DS201 (2019), DS202C, DSE201 M, AFDD S-ARC1 series, Suitable for SD 200 switch disconnectors series. It can be used with MCBs SN201 and RCBOs DS203NC series by means of SN201-IH interface module.

Rated current	A	max. 40
Terminal	mm <sup>2</sup>	10; cage terminal
Tightening torque	Nm	1.2
Dimensions (H x D x W)	mm	85 x 69 x 8.8

### Hand operated neutral

The hand operated neutral has to be mounted to the left side of the MCB and be snapped on the DIN rail. It is used for measuring duties where the neutral conductor must be in the open position. Due to the special design of the handle - when switching ON the MCB - the neutral will make before the MCB is closed. Suitable for SD 200 switch disconnectors series. The S2C - Nt is not to switch with a tool (screw driver).

#### Mechanical tripping device

Function: it causes the automatic tripping of the circuit-breakers which it is associated to, when the panel or the door of the electrical switchboard are opened or removed.

Suitable for MCBs S 200 series (on both sides of the devices) and for DS 200 (only on the right side, because on the left side there's RCD-block DDA 200). Suitable for SD 200 switch disconnectors series.

Instruction of installation		When cutting the busbar, ensure that the insulation profile exceeds the copper bar by approx. 10 mm on each side. Shock protection only with mounted end caps ensured. For DC applications the required increased clearance and creepage distances needs to be ensured.			When cutting the busbar, ensure that the installation profile exceeds the copper bar by approx. 10 mm on each side. Shock protection only with mounted end caps ensured.			

① In case of feed in from the middle of the busbar it needs to be ensured, that the sum of junction currents per side must not exceed the max busbar current I<sub>s</sub>/phase. Irrespective of the current carrying capacity (I<sub>s</sub>) of the busbar, the max. rated current of the devices terminal may not be exceeded.

Cutting of busbar is not permitted.

Shock protection only with mounted end caps ensured. For DC applications the required increased clearance and creepage distances needs to be ensured.

The copper bus has to be cut to a length that is app. 10 mm less than the corresponding length of the plastic busbar housing. Touch-safe only when used with the required end caps. Independant from the rated voltage of the devices like busbars or feeder terminals the creepage distances and distances over the air needs to be considered. This is depending on the particular application as well as on the complete assembling.

Feed in from the end of the busbar

Feed in from the middle of the busbar

### Selection table

**Short description**

ABB busbar systems enable the safe and economic cross connection of MCBs, RCCBs and RCBOs.

For a correct busbar selection the following points need to be considered:

- MCB terminal type (Twin terminal or cage terminal)
- Number of poles (1, 2, 3, 4, 1+N or 3+N)

**Device type (MCB, RCCB or RCBO)**

Combinations (e.g. RCCB + MCB or RCCB 3+N + RCCB 1+N)

Use of side mounted auxiliary elements on MCB \*)

Busbar diameter (for current carrying capacity calculation)

Number of modules (choice of standard busbar or busbar for cutting)

	PS		/		/				
	1	2	3	4	5	6	7	7	
<b>Phases</b>									
1 phase	1								
2 phases	2								
3 phases	3								
4 phases	4								
<b>Number of pins</b>									
<b>Diameter</b>									
10 mm <sup>2</sup>				-	-				
6 mm <sup>2</sup>				6	-				
16 mm <sup>2</sup>				1	6				
30 mm <sup>2</sup>				3	0				
<b>Application</b>									
Cross connection of RCCB and MCB (4th pin removed for RCCB 3+N)							F	I	
Use of neutral conductor (phase sequence e.g. L1-N-L2-N-L3-N-L1...)					N				
Space for 1 side mounted auxiliary contact					H				
Space for 2 side mounted auxiliary contacts						H	2		
Pins for breaking off									A
Cross connection of devices 3P+N + 1P+N (phase sequence L1-L2-L3-N-L1-N-L2-N-L1-N-...)							N	N	
Busbars for IT networks							I	T	
Busbars acc. to UL 489 (Branch Protection)							B	P	
Busbars acc. to UL 1077 (Supplementary Protection)							S	P	
Note: Combinations of above applications are possible									

\*) only right side mounted auxiliary elements and bottom fixed auxiliary contacts can be considered for busbar connection

### Identification system ILS

The ILS individual identification system for labels is a DIN A5 polyester film for ink jet and laser printers with high temperature resistance. (If laser printers are used, please check whether self-adhesive film with thickness of 250 µm can be fed.) Adhesive coating 3MTM9471 LE has obtained UL approval (file No. MH 11410). There are two types of sheet: uncut for making individual labels or precut with 23 stripes (6 x 191 mm each) for labelling 11 devices (1-module width) per stripe. Word template can be downloaded from [www.abb.de/stotz-kontakt](http://www.abb.de/stotz-kontakt). Can also be used as write-on labels (ink, ballpoint pen, pencil, marker).

Description	Bbn 4016779	Order details		Price 1 piece	Weight 1 piece kg	Pack unit pc.

6-50				652889	SZ-ESK 3 S	2CDL200003R5003		0.024	10

### Flexible connecting wires

Advantages: smaller dimensions for the same cross-section (more space in terminal)

nearly no transition resistances

more reliability; conductor sleeves could be loosen under specific conditions

### Locking device for MCBs and switches

Prevents unauthorised or dangerous operation of the operating lever. An adaptor makes it possible to block the operating lever whether switched ON or OFF. The lever is blocked with a padlock having a cross bar section of 3 or, as the case may be, 6 mm max. For multipole devices, one lock may be fitted per pole.

The lock adaptor can be used for all MCBs of the S 200, S 280 series, RCBOs DS201-DS202C as well as for switches E 200.

## Auxiliary elements for S750 DR

S750DR-AUX

### Auxiliary contact S750DR-AUX

Two change-over contacts indicate the contact position of the S750 DR pole(s) independently and potential-free. A test button can be used to verify the correct indication of the contact position without switching the pole(s).

The change-over contacts fulfill the requirements of electrical separation of the main circuit connected to the pole(s).

The S750DR-AUX can be mounted on S750 DR 1-4 pole-devices without tools.

### S800-AUX

#### S800-AUX

##### Auxiliary contact for external display

The S800-AUX auxiliary contact is for electrical display of the operating state of the high performance MCB. Both changeover contacts always switch simultaneously with the live conductor contact and detect the following operating states:

- Manual tripping
- Tripping due to thermal overload
- Tripping due to magnetic overload (short-circuit)

##### Mode of function of the test button

The test button is operated by a tool and allows the user to simulate the mode of function of the auxiliary contact when switched on without tripping the high performance MCB itself.

##### Mode of function of the two changeover contacts

- Off position of the high performance MCB                      contacts 11–12 and 21–22 closed
- On position of the high performance MCB                      contacts 11–14 and 21–24 closed

##### Mounting ability of the auxiliary contact

- Two S800-AUX auxiliary contacts can be mounted by the user at the left on the high performance MCB.

Auxiliary contact S800-AUX		
Utilisation categories compliant to IEC 60947-5-1		AC15 400/2A, AC15 240/6A, DC13 250/0.55A, DC13 125V/1.1A, DC13 60V/2A, DC13 24V/4A
Rated values compliant to UL 489		125VAC/6A, 250VAC/5A, 24VDC/4A, 125VDC/0.3A, 250VDC/0.15A
Conventional free air thermal current $I_{th}$	A	6

## Auxiliary elements for S800

### S800-AUX/ALT

#### S800-AUX/ALT

##### Combined auxiliary and signal contact for the external display

The S800-AUX/ALT combined auxiliary and signal contact is used for electrical signaling of the operating state of the high performance MCB.

The AUX auxiliary contact always switches simultaneously with the live conductor contact and detect the following forms of tripping:

- Manual switch on/off
- Tripping due to thermal overload
- Tripping due to magnetic overload (short-circuit)
- Tripping by S800-SOR or S800-UVR

The ALT signal contact detects the following forms of tripping of the high performance MCB:

- Tripping due to thermal overload
- Tripping due to magnetic overload (short-circuit)
- Tripping by S800-SOR or S800-UVR

##### Mode of function of the test button

The test button is operated by a tool and allows the user to simulate the mode of function of the combined auxiliary and signal contact when switched on without tripping the high performance MCB itself.

##### Mode of function of the ALT reset button

The reset button, which can be used at will, resets the ALT signal contact after a tripping. The high performance MCB is switched on independent of the state of the ALT signal contact.

##### Mode of function of the AUX changeover contact

- Off position of the high performance MCB      Contact 11–12 closed
- On position of the high performance MCB      Contact 11–14 closed

##### Mode of function of the ALT changeover contact

- No ALT tripping      Contact 95–96 closed
- ALT tripping      Contact 95–98 closed

## Auxiliary elements for S800

### S800-RSU system

#### S800-RSU-H IEC version

#### S800W-RSU World version

#### Remote Switching Units for High Performance MCB

The S800-RSU makes the use of S800 even more convenient. Driven by a brushless high precision DC motor, S800-RSU ensures fast remote-controlled operation.

#### Mounting ability

The S800-RSU is mountable on any multipole S800 High Performance MCB. Wiring and operation is feasible on field. The connection has to be done by a 10-pole Micro Fit 3.0 (not included in delivery). S800-RSU operated with standard MDRC pushbuttons and indicator lights or can be done via programmable logic controllers (PLCs).

#### Switching times

OFF → ON <<500 ms  
from signal to contact closing

ON → OFF <<250 ms  
from signal to contact opening

TRIP → OFF → ON <<1500 ms  
from signal to contact closing

For differing requirements, please contact your local ABB partner

#### Safety Intelligence

- When detecting manual use, inputs are deactivated for 10 seconds
- If the spindle is rotated more than 360°, all outputs become active
- Manual switch off via lever is possible (S803, S804)
- Manual switch on via lever is not possible (S802)
- RSU is locked for five minutes after three switching attempts leading to a trip
- Mechanical fixation via lock slider blocking the spindle

#### S800-RSU-CP

#### S800-RSU cable incl. 10-pole Micro Fit 3.0 plug

Length of cable: 3 m  
Cross section: 10 x 0.5 mm<sup>2</sup>

#### Temperature range

moving state: -5 °C ... +70 °C  
fixed state: -30 °C ... +80 °C  
Rated voltage: 300 V  
Conductor resistance: 39.0 Ω/km  
Approvals: S+, UL

### S800-SOR

#### S800-SOR

##### Shunt opening release

The S800-SOR shunt opening release is for remote release of the S800- high performance MCB using an electrical impulse. Operation of the trigger is guaranteed at a voltage between 70% and 110% of the rated mains voltage  $U_n$  both for AC and DC.

##### Mounting ability of the S800-SOR operating current release

The S800-SOR can be mounted by the user at the left side of the high performance MCB.

#### Shunt release S800-SOR

### S800-UVR

#### S800-UVR

##### Undervoltage release

The S800-UVR undervoltage release can be used as an emergency-stop cut-as by use of suitable emergency stop buttons. The undervoltage release switches the power supply to the high performance MCB off in case of a failure or if the value falls below  $0.7 \times U_n$ . After tripping, the high performance MCB can be switched back on as soon as the voltage is over  $0.85 \times U_n$ .

##### Mounting ability of the S800-UVR undervoltage release

The S800-UVR can be mounted by the user at the left side of the high performance MCB.

## Auxiliary elements for S800

### S800-SCL

#### S803S-SCL

##### Short-circuit current limiter

The S803S used together with an S803S-SCL ensures reliable switch-off of short-circuit currents up to **100 kA**, at an operating voltage of 440 V AC and over the entire rated current range of up to 125 A.

For applications at 690 V AC, the combination of S803S-SCL ensures reliable short-circuit protection up to **50 kA**; here also, this is ensured over the entire rated current range up to 125 A, typical for the S800.

Example combinations	Rated operational voltage $U_e$	Ultimate short-circuit breaking capacity $I_{cu}$	Service short-circuit breaking capacity $I_{cs}$
S803S-SCL125 + S803S-C125	440V AC 690V AC	100 kA 50 kA	100 kA 50 kA
S803S-SCL63 + S803S-K63	440V AC 690V AC	100 kA 50 kA	100 kA 50 kA

## Auxiliary elements for S800

### S800-SCL-SR

#### S800-SCL-SR

##### Self-resetting short-circuit limiter

The S800-SCL-SR can be used together with S800S High Performance MCB or Manual Motor Starters. It limits the short-circuit current until the downstream means of protection trips. Its current continuity makes it as the ideal solution for group protection. All parallel branches remain operative.

S800-SCL-SR is available at rated voltages 400/690 Vac and 580/100 Vac acc.to the type.

Self-resetting short-circuit current limiter		S800S-SCL-SR	S803W-SCL-SR
Rated operational current $I_e$	A	32, 63, 100	
Pole		1, 2, 3	3
Rated operational voltage $U_e$ (AC) according to IEC 60947-2 50/60Hz	V	400/690	690
(AC) according to UL 508 50/60Hz	V		600
Rated insulation voltage $U_i$	V	690	690
Rated impulse withstand voltage $U_{imp}$	kV	8	8
Rated ultimate short-circuit breaking capacity $I_{cu} = I_{cs}$ according to IEC 60947-2*			
(AC) 50/60Hz 240/415V	kA	100	100
(AC) 50/60Hz 254/440V	kA	100	100
(AC) 50/60Hz 289/500V	kA	65	65
(AC) 50/60Hz 400/690V	kA	50	50
Short-circuit rating according to UL 508*			
(AC) 50/60Hz 480V	kA	65	65
(AC) 50/60Hz 600V	kA	65	65

## Auxiliary elements for S800

### S800-RD

#### S800-RD

##### Rotary drive

The rotary drive for 2–4 pole devices can be delivered for assembly on the switching field door. Switching is effortless due to the ergonomic design of the swivel lever. It is equipped with a lock for the OFF position that prevents switching on of the S800 high performance MCB.

The slot hole of the lock can accept up to 3 padlocks with lug diameters of 7 mm (not included in delivery). Operation of the trigger and a view of the characteristics are not prevented. Additionally, a rotary drive can also be supplied to switch machines; it has a red grip on a yellow background.

The rotary drive on the switching field door is comprised of the following three components:

- Rotary handle S800-RHE-H, -EM
- Axle (500 mm) S800-RHE-S

## Auxiliary elements for S800

S800-IP9, S800-PLL, S800U-PLL

### S800-IP9

#### Intermediate piece

The S800-IP9 intermediate piece fits the profile of the high performance MCB and is used to fill in empty device slots. Thanks to its width of just 9mm, the slots of all devices of the S800 range can be expanded using this intermediate piece.

	GTIN 76122712	Order details		Price 1	Weight 1 piece	Pack unit
Intermediate piece 9 mm	EAN	Type code	Order code	piece	kg	pc.
Intermediate piece 9 mm	08202	S800-IP9	2CCS800900R0031		0.01	1

### S800-PLL

#### Padlock device

The S800-PLL padlock device safely prevents unintentional switching on and off. Simply insert the lug of the padlock device through the borehole on the high performance MCB and lock with a padlock with lug diameter Ø 4 mm (not included in delivery). Even when the high performance MCB is secured with a padlock device against unintentional switching off, tripping remains possible in case of overload or short-circuit by the S800-SOR, S800-UVR and DDA800.

### S800U-PLL

#### Locking device – for the American market

The S800U-PLL locking device prevents unintentional switch-on or off of the S800U high performance MCB, or switch on/off by third parties. It is mounted at the side of the high performance MCB and can only be removed using a special tool. A standardised American padlock (not included in delivery) is hung onto the round recess on the locking device, which can be secured by max six locks. Of course, tripping is possible by the S800-SOR or S800-UVR in case of overload or short-circuit.

### S800-ILS

#### Identification labelling system

The individual identification labelling system for ILS legend plates is a DIN A5 polyester foil for inkjet and laser printers with high temperature resistance (if a laser printer is used please check whether self-sticking foils with a thickness of 250 µm can be printed with it). The 3M™9471 LE adhesive backing is UL-approved with Appl. No. MH 11410. The single plates are butt-cut on one side. Can be manually labelled with ink, pen, pencil and felt pen.

## Auxiliary elements for S800

### S800 Busbar system

#### S800 Busbar system

The S800 busbar system is comprised of:

S804-BBPC120	120 mm <sup>2</sup> feed block, 4-pole
S804-BB250	250A busbar, 4-pole and neutral with 24 contacts pins
S804-BB6	250A busbar, 4-pole with 6 contacts pins
S803-BB250	250A busbar, 3-pole with 24 terminal lugs and 2 end caps
S803-BBPC120	120 mm <sup>2</sup> feed block, 3-pole
S800-BBIC	Optional contact-protection cap for exposed terminal lugs
S800-END	Optional end cap

The busbar, which can be shortened in length by the user, ensures the safe and rational connection of the S800 high performance MCB. A cable cross-section of up to 120 mm<sup>2</sup> can be connected at the feed block.

#### Busbar S803-BB250/S804-BB250

## Auxiliary elements for S800

### 27mm wide universal adapter S800

#### 27mm wide universal adapter to mount S800 MCB on SMISLINE TP system

The universal adapter with the new 9mm dummy housing is specially designed for the High performance breaker S800. This allows to have a 27mm adapter on the SMISLINE TP busbar system. The S800 High performance MCB can be easily mounted and wired on the universal adapter. The complete unit can be clicked on to the plug-in socket system quickly and safely. The input wiring is then already finished.

- Max. Incoming 400A (T5/XT5) rated conditional short-circuit current  $I_{cc}$  40kA (415V) with S800S
- Time-saving mounting of S800 MCB units up to 30% faster than conventional DIN rail mounting
- Input wiring is already integrated in the SMISLINE plug-in socket system

## Auxiliary elements for S800

### 27mm wide universal adapter S800

#### Unifix H

The Unifix H System with feed module up to 400A provides the user a high standardised design of energy distribution. The wide range of assembly and adapter combinations which are also available for the S800 range increase flexibility allowing for compact and cost-effective design of the electrical distribution network. See dedicated System pro E power offering

#### The following adapters are available for the S800 range:

- ED2557 L1  $\leq 32$  A
- ED2558 L2  $\leq 32$  A
- ED2559 L3  $\leq 32$  A
- ED2560 N  $\leq 32$  A
- ED2551 L1 125 A
- ED2552 L2 125 A
- ED2553 L3 125 A
- ED2554 N 125 A
- ED2550 filler

## Plug-in systems

### UNIFIX rapid wiring system

#### UNIFIX – Rapid Wiring System

UNIFIX makes bench pre-cabbling possible, with installation in the switchboard only carried out at a later time, without any limit to the types or combination of apparatus you may need to install...and this becomes even easier, thanks to the rigid coupled connectors, standardized for the different types of apparatus.

Unifix H allows modular and moulded-case circuit-breakers up to 250A to be mounted on an apparatus frame, which can be connected directly to the rear busbar system. This means many fewer conductors circulating inside the switchboard with considerable advantages in terms of space

taken up, connections needed to be checked, and cabling times, with consequent cost savings. Unifix L means traditional wire cabling on the supply side of the circuit-breakers can be replaced. It is thanks to the characteristics of its connections that cabling can be done rapidly and without any possibility of error, obtaining a more essential switchboard without conductors and cabling ducts around. Flexibility is its strong point: several independent circuits can be realized on the same DIN rail, and circuit-breakers of different types, with different polarity and characteristics can be mounted.

---

#### Customer Benefits with UNIFIX

---

##### Wiring Time

The use of Unifix reduces considerably wiring time.

##### Use of Standard Devices

Unifix can be applied to all standard versions of ABB Sace modular devices, Tmax T1 - T2 - T3 - XT1 - XT3 moulded-case circuit breakers

##### Flexible

Unifix has variable modular capacity, it is possible to place both circuit-breakers with different polarities side by side on the same line and auxiliary elements.

##### Reduce Space

Space taken up by Unifix is extremely low

## Accessories for MCBs and RCDs

### Auxiliary switch S700 + H2WR

Auxiliary switch S700 + H2WR	
2 Switch-over contacts	
Conv. thermal current I <sub>th</sub>	10 A
Min. operating voltage	24 V AC/DC
Min. switching power	5 VA ①
Short-circuit withstand capability	1000 A @ 230 V AC with S 200 K6 back-up
Isolation coordination	
– overvoltage category	III
– pollution degree	2
– surge withstand capability	4 kV (1.2/50 μs)
Wiring	up to 2 x 1.5 mm <sup>2</sup>
Contact reliability under	5 g, 20 cycles 5...150...5 Hz @ 24 V AC/DC, 5 mA -> contact

① The min. operating current under operating conditions acc. to EN 60204-1 and EN 60439-1 (indoor installation): 24 V AC/DC, 5 mA (AC 12, DC 12)

AC 14	U <sub>e</sub>	400 V	230V
	I <sub>e</sub>	2 A	6 A
DC 12	U <sub>e</sub>	220 V	110 V
	I <sub>e</sub>	1 A	1.5 A
DC 13	U <sub>e</sub>	60 V	24 V
	I <sub>e</sub>	2 A	4 A
