

HOTFIX RELEASE NOTE

PCM600 2.7

Hotfix Rollup 20160603

Dear PCM600 User

A hotfix rollup package for Protection and Control IED Manager PCM600 2.7 has been released.

The hotfix 20160603 for PCM600 2.7 is solving the following issues:

- Added support for additional functions (ZRWPDIS and ZGTPDIS) in Graphical Parameter setting for RER670.
- Added 64-bit support for Generic IEC 61850 Connectivity Package
- Exporting Archived projects (.pcma) failed if the project name included dot characters.
- Importing SCD files with the option 'Ignore substation section' caused an error.

This hotfix rollup includes also previously released hotfix and hotfix rollups for PCM600 2.7:

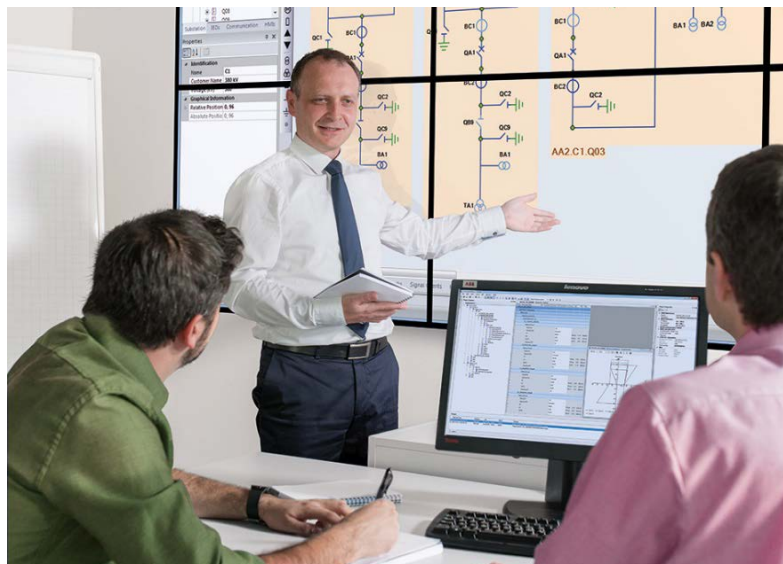

-
- Hotfix 20160311

Note: If the previously released hotfix packages for PCM600 2.7 are already installed, then only the new hotfixes will be applied. If earlier hotfix for PCM600 2.7 has not been installed, then this rollup package will apply all the updates.

The hotfix 20160603 for PCM600 2.7 is available via the PCM600 Update Manager. It contains the following file:

- PCM600 2.7 Rollup 20160603.exe

We recommend the installation of this Rollup 20160603 when using PCM600 2.7.

For more information, please contact your local ABB representative.

ABB constantly examines both operational and new software to identify possible faults or product improvements, issuing hotfixes where appropriate. We apologize for any inconvenience the identified faults have caused.
