# Innovation

The opening issue of *ABB Review* for 2014 will be dedicated to innovations. Contributions being prepared include a look at some of the challenges around giant wind turbines, how to economize fuel with the latest breakthroughs in turbocharging and how advanced physics is being used to measure current with previously unknown levels of accuracy. The issue will also explore how tomorrow's drinking water can reach consumers more efficiently, offer a taste of what is new in simulation, and much more.
