PRODUCT CATALOG

ABB drives and controls
The green guide to more profitable business

- Improving energy efficiency is the fastest, the most sustainable and the cheapest way to reduce greenhouse gas emissions
- The installed base of ABB drives saves over 310 million megawatt hours per year. This is equivalent to the amount of energy used by 75 million households
Technology is the core of our business. For over 100 years we have invested a significant proportion of our turnover in research and development. As a result, we developed the very first high-power AC drive in the 1970s, and today we offer you the most advanced range of variable speed drives in the world. Still, the cutting edge technology is not the only thing that makes us the global leader in AC and DC drives. You can expect more from us.
ABB drives and controls
The green guide to more profitable business

06–15 INTRODUCTION
06–07 What can you expect from the world’s largest drives and softstarters manufacturer?
08–09 The most effective way to a green process is also the most profitable
10 EU Ecodesign Regulation
11 ABB Value Provider network to serve your needs
12–13 Our extensive drives, softstarters and controls portfolio means the most optimal solution for you
14–15 Product positioning by applications

16–17 ABB SOFTSTARTERS
PSTX – the advanced range
PSE – the efficient range
PSR – the compact range

18–55 ABB LOW VOLTAGE AC DRIVES
20–21 Micro drives for basic applications
ACS55
ACS150
22–25 General purpose drives
ACS580
ACS480
ACS310
26–31 Machinery drives
ACS355
ACS380
ACS880-M04
ACS880 position control program (+N5700)
32–49 All-compatible industrial drives
ACS880-01, wall-mounted single drives
ACS880-07/-07LC/-07CLC, cabinet-built single drives
ACS880-11, wall-mounted regenerative single drives
ACS880-31, wall-mounted ultra-low harmonic single drives
ACS880-17/-17LC, cabinet-built regenerative single drives
ACS880-37/-37LC, cabinet-built ultra-low harmonic single drives
ACS880, multidrives
ACS880, multidrive modules
ACS880-04/-04F/-04XT/-04FXT, single drive modules
ACS880-14, regenerative single drive modules
ACS880-34, ultra-low harmonic single drive modules
ACS880-14, regenerative single drive module packages
ACS880-34, ultra-low harmonic single drive module packages
ACS880, liquid-cooled multidrives
ACS880, multidrive liquid-cooled modules

50–53 ABB industry specific drives tailored to save energy and money
51 All-compatible drives for water
ACQ580
ACQ580 Ultra-low harmonic drive

52–55 ABB drives for HVAC
ACS320
ACH480
ACH580

56–59 ABB WIND TURBINE CONVERTERS
ACS880-17, smart grid converter
ACS880-77LC/-87LC/-87CC, wind turbine converters
PCS6000, wind turbine converters
ABB MOBILE DRIVE SOLUTION FOR WORKING MACHINE AND MARINE APPLICATIONS
HES880 mobile drive modules

We keep your world turning
ABB Drives Life Cycle Management
What can you expect from the world’s largest drives and softstarters manufacturer?

Our equipment is only a part of the solution
Our attention to service matches the technological pursuits of our R&D department. This means a globally local presence, customer service, support, expertise, various tools and a technical partnership to give you added value as a system integrator, OEM or end user.

You can expect us to understand your business, your process and your needs from A to Z. We know by experience how to increase your production capacity, improve your product quality, reduce waste and lower your maintenance costs. Our dedicated experts talk your language and can offer the quickest route to a profitable solution, without forgetting personnel safety and environmental responsibility.

Buy a drive or a softstarter and you get our expertise
The world’s leading application engineering organization is at your service. We have a thorough knowledge of all applications from pumps, fans and compressors through to conveyors, extruders, winders and marine applications.

In your plant, our expertise extends across entire electrical installations from correct selection, dimensioning and installation through to operation and maintenance of drives, PLCs, motors, transformers, relays, switches and contactors and all the way to transducers and meters. Our offering is digitally enabled, combining connectivity, data analytics and data management to make your operations efficient, predictable and safe. Optimal choices not only save energy, but also reduce the application’s maintenance needs.
For instance, a combination of ABB motors and drives helps minimize the life cycle cost of pumps, fans and other driven machines as well as the entire mechanical installation.

**Wherever the equipment goes, we are there to support your business**
You can expect us to be beside you, wherever you are. Our companies and sales offices are at your service in more than 100 countries, and chances are that one of our authorized value provider companies is probably located right in your neighborhood.

If you are a machine builder, the global ABB can be a vital part of your customer service. You, and your product, are never alone.

So, what can you expect from the world’s largest drives and softstarters manufacturer? Not only the most optimal equipment, but the things you really want to be investing in: **efficiency, productivity, reliability and safety.**
The most effective way to a green process is also the most profitable

Improve your processes with softstarters and drives

INCREASED LIFE TIME – Reduced starting current decreases the electrical stress on the motor and network. Smooth ramp up to full speed also reduces mechanical wear on the equipment prolonging its life time.

INCREASED PRODUCTIVITY – Using softstarters and drives increases the productivity of the applications by reducing the number of unintended stops caused by excessive heating of the motor or sudden breakdowns of mechanical equipment due to high mechanical stress.

REDUCED NEED FOR MAINTENANCE – Being able to apply a softer starting moment and vary the speed and torque of an electric motor means there is less wear and tear on the motor and the driven machine. For example, the ability to bring a process up to speed slowly prevents the sudden shock loading that can damage the motor and the driven machine over time.

Further optimize your processes with AC drives

SUBSTANTIAL ENERGY SAVINGS – Rather than have an electric motor running continuously at full speed, an electric drive allows the user to slow down or speed up the motor depending on the demands. Reducing motor speed to meet the actual demand of the process often means substantial energy savings and reduced operating costs.

OPTIMAL PROCESS CONTROL – An electric drive enables a process to achieve the right speed and torque while maintaining its accuracy – this contributes to a more consistent quality and throughput of the end product.
EFFICIENT SYSTEM UPGRADE – An electric drive allows for the removal of valves, gears and belts. It also ensures network dimensioning based on a lower starting current.

FUNCTIONAL SAFETY – Most ABB drives offer functional safety features providing safety for machine operators. The features comply with the requirements of the European Union Machinery Directive 2006/42/EC. This directive is associated with standards like EN 62061 (IEC, defining SIL – Safety Integrity Level) and EN ISO 13849-1 (defining PL – Performance Level).

**ABB drives and softstarters common features**

**EASY TO SELECT** – You can be sure to find a right product for your application from a wide selection of ABB softstarters and drives.

**EASY TO PURCHASE** – ABB softstarters and drives are available from ABB and selected ABB partners. Please contact ABB for more details and see the following page for more details about our value provider network.

**EASY TO INSTALL AND COMMISSION** – The softstarters and drives are simple to install, featuring a variety of mounting options from wall-mounted to cabinet mounted.

**EASY TO USE** – The drives and softstarters are designed with the end user in mind, to make it as easy as possible to use our devices. Once installed and commissioned, the softstarters and drives are incredibly easy to operate. The user interface allows instant adjustments to speed or other more advanced parameters.
EU Ecodesign Regulation

The EU has agreed upon new, more demanding regulation (EU) 2019/1781, replacing regulation 640/2009. The new Ecodesign Regulation (EU) 2019/1781 sets the minimum efficiency levels not only for direct-on-line rated low voltage induction motors but now also for variable speed drives with a voltage up to 1000 V. The regulation will be implemented in two steps July 1, 2021 and July 1, 2023.

Variable speed drives

**Step 1: July 1, 2021**

IE2 efficiency level mandatory for AC drives

- Power range from 0.12 to 1000 kW.
- 3-phase drives with diode rectifier including ABB’s micro, machinery, general purpose, industrial and industry-specific drives.
- Drive manufacturers must declare power losses in percentage of the rated apparent output power at 8 different operating points as well as standby losses. The international IE level is given at the nominal point. Drives fulfilling the requirements will be CE marked.
- All the covered ABB products fulfill the requirements.

**Excluded from the regulation:**
- All drives without CE marking
- Following low voltage AC drives: regenerative drives, low-harmonic drives (THD < 10%), multiple AC-output drives and single-phase drives.
- Drive cabinets with already conformity assessed modules
- Medium voltage drives, DC drives and traction drives

**Markings on the ABB AC drives**

Unique QR codes are located on the rating plate and/or the front side of the drive.

**Step 2: July 1, 2023**

No changes for drives from July 1, 2021

For more information, see Ecodesign tool: https://ecodesign.drivesmotors.abb.com/
ABBA Value Provider network to serve your needs

ABB’s carefully selected channel partners are regularly trained, audited, officially authorized and fully supported. They are periodically assessed on the ABB offering they specialize on to ensure the customer expectations are fulfilled.

ABB Value Providers are members of the ABB channel program – the ABB Value Provider Program.

**Products and services for your specific needs**

With ABB Value Providers’ in-depth knowledge of local markets and business requirements, and their expertise in selected products and services, they can ensure speed, efficiency and consistency in daily operations.

Their work secures that ABB products are backed by the same high standards of service and support all over the world.

**Different partner profiles for different needs**

Our extensive drives, softstarters and controls portfolio means the most optimal solution for you

ABB low voltage AC drives and softstarters

The ABB low voltage AC drives product range, from 0.18 to 5600 kW, is the widest selection available from any manufacturer. These drives establish the global benchmark signifying reliability, simplicity, flexibility and ingenuity throughout the entire life cycle of the drive.

ABB softstarters

Softstarters are ideal choice when an application requires speed and torque control only during startup. The softstarters prevent large inrush currents from being drawn while starting the motor by smoothly ramping up the supply voltage. The smooth ramp up prolongs the life time of the motors because less current means also less heat in the motors.

ABB micro drives

ABB micro drives are suitable for a variety of low power applications such as pumps, fans and conveyors. The focus in the design has been the easy integration into machines, which provides flexible mounting and straightforward commissioning.

ABB general purpose drives

ABB general purpose drives are easy to install, commission and use. They are designed to offer control over a broad range of standard drive applications and have a wide range of built-in features simplifying all operations.

ABB machinery drives

ABB machinery drives can be flexibly configured to meet demands set by different machines. An order-based configuration is an integral part of the machinery drives offering. The drives have a broad range of standard and optional features. Their programming capability offers additional flexibility to meet challenging machine requirements.

ABB industrial drives

ABB industrial drives are highly flexible AC drives that can be customized to meet the precise needs of industrial applications. The drives cover a wide power and voltage range up to 5600 kW and 690 V. The drives are designed for industrial applications such as those found in pulp and paper, metals, mining, cement, power, chemical, oil and gas, water and wastewater, and food and beverage. Drives adapted and approved for use in marine environment are also included in this drives family.

ABB industry specific drives

The drives for HVAC, and water and waste water provide customers with dedicated drive solutions for virtually any type of motor control which speaks the same languages as users and their systems.

ABB mobile modules

The mobile drive solution is designed to provide dependable heavy cycle operation in very demanding conditions that are present in marine and working machine applications. The focus of these products is to help OEMs to simplify manufacturing process.

ABB wind turbine converters

ABB offers wind turbine converters for small-scale and utility-scale wind turbines. ABB wind turbine converters, suitable for any of today’s turbine concepts, deliver durable, reliable performance and are backed by a complete set of life-cycle services.

ABB servo drives

ABB servo drives offer flexible technologies and high performance motor control for a wide variety of applications. The drives enable operation with single and three-phase supplies for global markets, and have open communication options as well as real-time Ethernet technologies such as EtherCAT® and POWERLINK. In addition to drives, ABB offers complete motion control solutions, including human-machine interfaces, programmable logic controllers, safety technology and servo motors.

ABB medium voltage AC drives

ABB offers an extensive portfolio of variable speed drives and soft starters for medium voltage applications with a power range from 250 kW to over 100 MW.

ABB medium voltage drives are used in a wide range of applications in industries such as metals, marine, mining, cement, power, chemical, oil, gas, water and wastewater.

The drives are equipped with air or water cooling and with different line supply connection options. Some products come with an integrated input transformer or with the capability to operate direct-to-line without an input transformer, and therefore minimize both, weight and space.
ABB general purpose and industrial drives
ABB general purpose and industrial drives are used to control standard motors. These motors are typically used to drive applications such as pumps, fans, compressors, mixers, mills and conveyors.

ABB special purpose drives
Special purpose drives are engineered drives, typically used for high power, high speed or special performance applications such as test stands, marine propulsion and thrusters, rolling mills, SAG and ball mills, large pumps, fans and compressors.

ABB DC drives
ABB’s DC drives portfolio, from 9 to 18000 kW, provides the highest power-to-size ratio on the market. The drives are designed for most industries and applications including metals, cement, mining, pulp and paper, printing, food and beverage, wire manufacturing, and test rigs. ABB DC drives are available as complete cabinets, modules for cabinet assembly, and retrofit kits.

The DC drives feature auto-tuning capabilities. Intuitive user software minimizes startup time and improves daily operation. This helps to increase process productivity and improve production quality.

ABB standard drives
With compact dimensions and robust technology, ABB standard drives are an ideal solution for any machinery and OEM manufacturer as a new installation or a replacement for older analog devices.

ABB industrial drives
ABB industrial drives are designed for all industrial applications. The fast drive-to-drive DCS link is designed for demanding high power 12-pulse applications, as well as smart master-follower configurations. ABB industrial drives are available both as complete enclosed DC drives and as converter modules to meet the requirements of the users, OEMs and system integrators. These drives are highly flexible and can be configured to meet the precise needs of industrial applications.

Power controller
The DCT880 thyristor power controller provides precise control of resistive or inductive heaters and infrared heaters in applications for annealing, drying, melting or heating in glass, plastic or metal industry.

ABB Programmable Logic Controllers (PLCs)
ABB offers a comprehensive range of scalable, powerful PLCs and robust HMI control panels. The PLC range starts with the cost-efficient AC500-eCo. AC500 is the powerful flagship PLC, offering a wide range of performance levels. High availability configurations are easy to implement. For eXtreme Conditions like in marine, wind, solar, vibrating machines and waste water treatment, the AC500-XC series is the first choice. AC500-S is the ideal choice for simple and complex safety solutions. Automation Builder is the effortless, straightforward engineering tool for PLC, drives, HMI and internet services.

Drive modules for **OEMs** and **system integrators**
INTRODUCTION

Variable torque Pumps, Fans, Agitators

Basic constant torque Compressors, Belt conveyors, Gates

High torque requirements Mixers, Extruders, Screw conveyors, Centrifuges, Rolling mill

High precision, open or closed loop Cranes, Spindles, Winding and unwinding

High torque, precision and enhanced safety Cranes, Winches, Kilns

Position control and synchronizing Stacker cranes, Rotary tables, Converting machinery

Drive modules for OEMs and system integrators

Complete products for distribution and end-users
ABB softstarters
For full speed applications

ABB’s softstarters offer you several values and benefits. Whether you are a consultant, OEM, panel builder or end user, a softstarter will add to your business value by securing motor reliability, improving installation efficiency and increasing application productivity.
Advanced with full control and complete motor protection built-in

PSTX
The advanced range

**Highlights**
- Advanced softstarter with full control and motor protection built-in
- Supports all major communication protocols
- Detachable HMI with symbol display

**Features**
- Rated operational current: 30 to 1250 A
- Three-phase controlled
- Operational voltage: 208 – 690 VAC
- Wide rated control supply voltage: 100 – 250 V, 50/60 Hz
- Both in-line and inside-delta connection
- Coated PCBA
- Detachable keypad rated IP66 (4X outdoor)
- Graphical display with 17 languages
- Built-in bypass for energy saving and easy installation
- Built-in Modbus RTU for monitoring and control
- Support for all major communication protocols
- Analog output for measurement of current, voltage, power factor, etc.
- Complete built-in protections

General purpose with high starting capacity

PSE
The efficient range

**Highlights**
- General purpose softstarter
- Built-in communication and protections
- Language neutral display

**Features**
- Rated operational current: 18...370 A
- Operational voltage: 208...600 V AC
- Wide rated control supply voltage: 100...240 V AC, 50/60 Hz or 24 V AC/DC
- Voltage ramp and torque control for both start and stop
- Two-phase controlled
- Current limit
- Kick-start
- Built-in bypass for energy saving and easy installation
- Coated PCBA
- Illuminated display with symbols, language neutral
- External keypad rated IP66 (Type 1, 4X,12)
- Built-in modbus-RTU communication
- Fieldbus communication
- Analog output for display of motor current
- Built-in protections

Compact with basic benefits and values

PSR
The compact range

**Highlights**
- Compact and easy to use
- Basic values and benefits
- Many starts per hour

**Features**
- Rated operational current: 3...105 A
- Operational voltage: 208...600 V AC
- Wide rated control supply voltage: 100...240 V AC, 50/60 Hz or 24 V AC/DC
- Two-phase controlled
- Soft start and stop with voltage ramp
- Built-in bypass for energy saving and easy installation
- Easy set-up by three potentiometers
- Fieldbus communication with fieldbus plug adapter and the fieldbus plug
- Run and Top of Ramp relays available for monitoring
- Connection kits available for connection to ABB’s manual motor starters (MMS)

For further information, see softstarter catalog 1SFC132012C0201.
ABB low voltage AC drives

The ABB low voltage AC drives product range, from 0.18 to 5600 kW, is the widest selection available from any manufacturer.
These drives establish the global benchmark signifying reliability, simplicity, flexibility and ingenuity throughout the entire life cycle of the drive.
ABB micro drives for basic applications

ABB micro drives are very easy to install and set up. They provide flexible mounting alternatives and straightforward configuration for many basic applications. Where ever the micro drives are delivered and installed the local ABB will be there to support your business.

Little big drives easy to set up using switches

**ACS55**

**Highlights**
- The drive works with single phase power and can be used in a wide variety of simple machines such as automatic gates, solar trackers, treadmills, whirlpool baths, fans, and conveyors.
- Intuitive user interface with DIP switches and potentiometers
- DriveConfig kit enables drive set up without a power connection to the drive

**Features**
- Power range 0.18 to 0.37 kW (1-phase 100 to 120 V)
- Power range 0.18 to 2.2 kW (1-phase 200 to 240 V)
- IP20 enclosure (UL open type)
- For basic machinery applications
- Scalar control
- Entry-level product for new users
- Suitable for domestic networks as standard
- Parameter setting by switches or by PC software
- Built-in C2 EMC filter
- Options
  - DriveConfig kit PC tool, potentiometer
  - Input and output chokes

For further information, see catalog “ABB micro drives, ACS55, 0.18 to 2.2 kW”, code: 3AFE68899842 EN.

Little big drives with a wider power range and functionality

**ACS150**

**Highlights**
- The ACS150 drives are designed to be incorporated into a wide variety of machines such as mixers, conveyors, fans or pumps or anywhere where a fixed speed motor needs to run at variable speed.
- A more advanced micro drive with functions such as PID control and a built-in brake chopper
- Integrated user interface and a speed control potentiometer
- The drive is available for both single and three-phase supplies

**Features**
- Power range 0.37 to 2.2 kW (1-phase/ 3-phase 200 to 240 V)
- Power range 0.37 to 4 kW (3-phase 380 to 480 V)
- IP20 enclosure (UL open type), optional NEMA 1 kit
- For basic machinery applications
- Scalar control
- Integrated user interface and potentiometer
- Built-in brake chopper
- Built-in C3 EMC filter
- Options
  - External C2 EMC filter
  - Input and output chokes
  - FlashDrop tool for unpowered drive configuration in 2 seconds

For further information, see catalog “ABB micro drives, ACS150, 0.37 kW to 4 kW”, code: 3AFE68896114 EN.
About 70 percent of electricity consumed by industry is used to run electric motors.
General purpose drives
Streamlined automation and efficiency to improve your bottom line

The general purpose drives are designed to control a wide range of applications such as mixers, conveyors, compressors, fans, pumps, centrifuges, as well as process control in industries including material handling, food and beverage, chemical, rubber and plastics, textile and printing.

The drives are easy to select, install, configure and use, saving considerable time. They are equipped with ready-made application control logics, making it easy to fulfill your application requirements.

The general purpose drives ACS480 and ACS580 are part of ABB’s all-compatible drives portfolio, offering technically compatible drives with long-term solutions and support for users, processes, business and the environment.
Effortless process automation for a broad range of applications

ACS580

Highlights
- Wall-mounted, drive modules and cabinet-built drives to control a variety applications
- Easy to select, install and use
- All essential features built into the drive
- Straightforward settings menu and assistants for fast commissioning
- Energy efficiency features for optimal energy management and support for energy efficient motors
- Connectivity to most common automation networks and extensive selection of I/O options to match your needs
- Member of ABB’s all-compatible drives portfolio
- Adaptive programming for fine tuning and engineering the drive functionality
- ATEX certified thermistor relay for potentially explosive environment (e.g., dust areas in F&B)

Features
- Power range 0.75 to 500 kW (3-phase 380 to 415 V, 440 to 480 V, 200 to 240 V)
- Wall-mounted drives, IP21 as standard (UL type 1), IP55 as option (UL type 12 in frame sizes R1-R9)
- Drive module, IP00 as standard, IP20 as option
- Cabinet-built drives, IP21 as standard, IP42 and IP54 as options
- Assistant control panel as standard with primary settings and diagnostics menu with various assistants for effortless use of the drive
- Integrated EMC C2 filter for domestic environments as standard in wall-mounted drives and cabinet-built drives for frames R6 to R9
- Integrated EMC C3 filter for cabinet-built drives as standard
- Built-in patented 2nd generation swinging choke for frames R10 and R11
- Brake chopper as standard up to 22 kW (R3), optional for R10 - R11
- Adjustable switching frequency control reducing motor audible noise
- Options
  - Wide range of fieldbus adapters and remote monitoring
  - Relay extension, PTC-thermistor, 115/230 V DI plug-in options, ATEX-certified PTC-thermistor, bipolar analog input
  - Free entry level PC tool with USB connection on control panel
  - Supports induction motors, permanent magnet motors and synchronous reluctance motors (SynRM)

For further information, see catalog “ABB general purpose drives ACS580, 0.75 to 500 kW”, code: 3AUA0000145061 EN.
ACS480

**Highlights**
- Cabinet-optimized design and all essential features built-in offer pure ease of use for various of applications, such as pumps, compressors, conveyors and fans
- Straightforward settings menu and assistants for fast commissioning
- Energy efficiency features for optimal energy management and support for energy efficient motors
- Connectivity to most common automation networks
- Member of ABB’s all-compatible drives portfolio

**Features**
- Power range 0.75 to 22 kW (3-phase 380 to 480 V)
- Cabinet-optimized, IP20 as standard
- Assistant control panel as standard with primary settings for quick operation without a need to scroll through parameter lists
- Integrated and preprogrammed features, such as PID, pump and fan macros, timers
- Integrated EMC C2 filter as standard
- Adjustable switching frequency control reducing motor audible noise
- Built-in Safe torque off to enhance safety
- Options
  - Basic control panel, assistant control panel with Bluetooth capability, industrial assistant control panel
  - Most common fieldbus adapters available
  - Remote monitoring with NETA-21
  - Safe configuration for unpowered drives
  - Supports induction motors, permanent magnet motors and synchronous reluctance motors (SynRM)

ACS310

**Highlights**
- Designed for squared torque applications such as pumps and fans, without overload demands
- Compact dimensions with unified height and depth save space and facilitate cabinet installations
- Equipped with pump and fan control (PFC), PID control with booster functionality and pump protection functions, e.g., pump cleaning, pipefill to optimize pump or fan flow, to cut maintenance costs and to save energy

**Features**
- Power range 0.37 to 2.2 kW (1-phase 200 to 240 V), 0.37 to 11 kW (3-phase 200 to 240 V), 0.37 to 22 kW (3-phase 380 to 480 V)
- IP20 enclosure (UL open type), optional NEMA 1 kit
- Built-in pump and fan features such as multi-pump control, pump clean and soft pipe fill functions
- Built-in C3 EMC filter and Modbus EIA-485 fieldbus interface
- Motor noise smoothing
- Options
  - Basic and assistant control panels
  - Input and output chokes
  - Relay output extension module
  - External EMC C2 filter
  - FlashDrop tool for unpowered drive configuration in 2 seconds

For further information, see catalog “ABB general purpose drives ACS480, 0.75 to 22 kW”, code: 3AU00000204668 EN.

For further information, see catalog “ABB general purpose drives, ACS310, 0.37 to 22 kW”, code: 3AU0000051082 EN.
Machinery drives
Keep your machines running
The all-compatible machinery drives provide high performance, adaptability and dependability for machine building needs. The drives help machine builders improve machine performance and provide more added value for their customers, while simultaneously cutting integration and maintenance costs.

The ACS380 and ACS880 machinery drives are part of ABB’s all-compatible drives portfolio, offering technically compatible drives with long-term solutions and support for users, processes, business and the environment.
Machinery drives

ACS355

Highlights
- A compact drive with a wide range of built-in features including safety functionality
- Sequence programming provides an easy way to implement drive’s control logic
- A wide range of options for enhanced performance and flexible connectivity to different processes
- Compact dimensions with unified height and depth save space and facilitate cabinet installations

Features
- Power and voltage range: 1-phase, 0.37 to 2.2 kW, 200 to 240 V, 3-phase, 0.37 to 11 kW, 200 to 240 V
- Power and voltage range: 3-phase, 0.37 to 22 kW, 380 to 480 V
- IP20 enclosure (UL open type), optional NEMA 1 kit
- IP66, IP67 or IP69K (Nema 4X) as optional variant up to 7.5 kW
- Advanced functionality with sequence programming
- Scalar control, open and closed loop vector control
- Induction and permanent magnet motor control
- Built-in brake chopper and C3 EMC filter
- Integrated safe torque off (STO) as standard
- Product variants include solar pump drive, high speed application, and enhanced sequence programming
- Options:
  - Basic and assistant control panels
  - Potentiometer, plug-in fieldbus adapters, encoder interface, relay output extension module, input and output chokes
  - External EMC filter for 1st environment
  - FlashDrop tool for unpowered drive configuration in 2 seconds

For further information, see catalog “ABB machinery drives, ACS355, 0.37 to 22 kW”, code: 3AUA0000068569 EN.
Reliable performance and ease of integration for machine builders

ACS380

**Highlights**
- Excellent motor control for various motor types including induction, permanent magnet and synchronous reluctance motors
- Motor control performance with 3-phase current measurement meets demanding load profile requirements
- Connects with all major industrial automation systems
- Safe torque off (STO) is built-in as a standard, and can be controlled via PROFIsafe with an optional module
- Adaptive programming for customizing the drive for a wide range of applications
- Designed to last 10 years or more
- Part of ABB all-compatible drives portfolio

**Features**
- Power and voltage range: 1-phase, 0.25 to 2.2 kW, 200 to 240 V, 3-phase, 0.25 to 11 kW, 200 to 240 V
- Power and voltage range: 3-phase, 0.37 to 22 kW, 380 to 480 V
- Enclosure class: IP20 as standard (optional UL type 1 kit)
- EMC categories C2 and C3 with an internal filter
- Integrated safe torque off (STO) as standard
- Standard variant with built-in Modbus RTU and extensive I/O connection
- Integrated, icon-based control panel
- Scalar control, open and closed loop vector control
- Supports various motor types including induction, permanent magnet and synchronous reluctance motors
- Adaptive programming with function blocks and sequence programs
- Built-in braking chopper
- Common DC connection with built-in charging unit
- Options
  - Fieldbus adapter modules
  - I/O extensions, encoder interface, 24 V auxiliary power
  - PROFIsafe (STO, S51-t)
  - Input chokes, du/dt filters
  - Advanced control panel with USB or Bluetooth connectivity

For further information, see catalog “ABB machinery drives, ACS380, 0.25 to 22 kW”, code: 3AUAA0000187460 EN.
Easy to adapt and configure to machines

**ACS880-M04**

**Highlights**
- Excellent performance and compatibility with all kinds of machines
- Comprehensive connectivity
- Good possibilities for customizing the drive with IEC 61311-3 and adaptive programming
- Cost and time savings with drive-based functional safety
- Removable memory unit for fast drive replacement
- Optimized for cabinet assembly
- Top entry and bottom exit of the power cables enabling the optimal cabinet layout
- Bookshelf design

**Features**
- Power and voltage range: 3-phase, 0.37 to 22 kW, 200 to 240 V AC
- Power and voltage range: 3-phase, 0.75 to 45 kW, 380 to 500 V AC
- Enclosure class: IP20
- Integrated safe torque off (STO) as standard
- Built-in braking chopper
- Extensive I/O connectivity as standard
- Options
  - Extended connectivity to I/O
  - Speed and position feedback interfaces
  - Fieldbus adapter modules
  - Advanced control panel with USB or Bluetooth connectivity
  - Built-in/plug-in EMC filters for category C3, external EMC filters for category C2
  - Safety functions: SS1, SSE, SBC, SLS, SMS, SDI, SSM
  - PROFIsafe over PROFINET connectivity between drive and safety PLC
  - Application specific control programs including position control, tower crane, winder, etc.
  - EC61131-3 programming

For further information, see https://new.abb.com/drives/low-voltage-ac/machinery/acs880-m04.
Power and motion for any axis

**ACS880 position control program (+N5700)**

**Highlights**
- Same drive family can be used for any application of the production line – whether it is speed, torque or position controlled
- Ready-made control functions for decentralized motion systems – no need for external position controllers
- Support for virtually any type of motor, feedback device and communication protocol
- Available for any ACS880 hardware – extensive power and voltage range with extensive selection of variants and options
- Member of ABB’s all-compatible drives portfolio

**Features**
- 0.55-5600 kW
- 200-690 V
- Ready-made motion functions for point-to-point movements and axis synchronization
- Possibility to adjust with adaptive programming
- Drive modules or ready made cabinets
- Single & multi drive solutions
- Different IP classes (IP20/21/55…)
- Different cooling concepts - air, flange (push through), liquid
- Variants for regenerative and ultra-low harmonic operation
- Synchronized drive-to-drive link as standard
- Removable memory unit enabling fast drive replacement without compatibility issues

For further information, see flyer “ACS880 position control”, code: 3AUA0000232118 EN.
All-compatible industrial drives
Uncompromised productivity

The ACS880 series drives have been designed with the highest standards for demanding applications. These drives are easily adaptable to suit different customer needs and integrate into various industry solutions. The drives are part of ABB’s all-compatible drives portfolio that is designed to provide customers across industries and applications with unprecedented levels of compatibility, flexibility and ease of use. The ACS880 industrial drives are compatible with virtually all types of processes, automation systems, user groups and business requirements. Yet, despite the drives’ wide-ranging capabilities, they are remarkably easy to use and integrate.

The ACS880 drives are available as single drives, multidrives and drive modules. They also offer ultra-low harmonic and regenerative variants, as well as extensive programmability, functional safety and extension features. The ACS880 also offer different cooling options: air cooling, flange mounting and liquid cooling.
ACS880 series, all-compatible industrial drives

All-compatible wall-mounted drive with everything built-in

ACS880-01, wall-mounted single drives

Highlights
- Compact wall-mounted drives with all important features built-in the drive, saving installation space and time
- Premium motor control with direct torque control (DTC) for virtually any type of AC motor, including permanent magnet motors and synchronous reluctance motors (SynRM)
- A broad range of options offer flexibility and universal connectivity
- Built on ABB’s all-compatible drives architecture providing unprecedented levels of compatibility, flexibility and ease-of-use

Features
- Power range 0.55 to 250 kW (208 to 690 V)
- IP21 as standard (UL type 1), IP20 and IP55 (UL type 12) as options
- Supports optimized cabinet mounting (+P940 or +P944)
- Flange (push through) mounting option with separated control electronics and IP55 backside protection
- Integrated safety including safe torque off (STO) as standard with several safety functions as options
- Intuitive control panel with USB connection for PC tool and support up to 20 languages
- Common PC tool, Drive Composer for commissioning and configuration
- Drive-to-drive link for fast communication between drives including master-follower configurations without any additional software
- Removable memory unit enabling fast replacement without compatibility issues
- Drive’s energy efficiency information and the energy optimizer feature help to improve process efficiency
- Marine type approved design
- ATEX certified with ABB motors for explosive atmospheres
- Application specific control programs, e.g., for position control, cranes, winders, etc.
- Drive application programming based on IEC 61131-3
- Supports various motor types including synchronous reluctance motors and high speed motors
- Options include:
  - I/O extension modules
  - Fieldbus adapter modules
  - Integrated safety features
  - Speed feedback interfaces
  - EMC filter, braking chopper

For further information, see catalog “ABB industrial drives, ACS880, single drives, 0.55 to 6000 kW”, code: 3AUA0000098111 EN.
All-compatible drive cabinet tailored to customer needs

ACS880-07/-07LC/-07CLC, cabinet-built single drives

**Highlights**
- Cabinet-built drives with a wide range of standard and optional features all built inside the cabinet, saving installation space and time
- Premium motor control with direct torque control (DTC) for virtually any type of AC motor, including permanent magnet motors and synchronous reluctance motors (SynRM)
- Flexible connectivity and an extensive range of options for the optimum solution to different applications
- Built on ABB's all-compatible drives architecture providing unprecedented levels of compatibility, flexibility and ease-of-use
- Drive-to-drive link for fast communication between drives, including master-follower configurations without any additional software
- Removable memory unit enabling fast replacement without compatibility issues
- Drive's energy efficiency information and the energy optimizer feature help to improve process efficiency
- Marine approved design
- ATEX certified with ABB motors for explosive atmospheres
- Application specific control programs, e.g., for position control, cranes, winders, etc.
- Drive application programming based on IEC 61131-3
- Supports various motor types including synchronous reluctance motors and high speed motors
- Marine type approved design
- Options include:
  - I/O extension modules
  - Fieldbus adapter modules
  - Integrated safety features
  - Speed feedback interfaces
  - EMC filter, braking chopper

For further information, see catalog "ABB industrial drives, ACS880, single drives, 0.55 to 6000 kW", code: 3AUA0000098111 EN.
Capture and utilize braking energy with all-compatible drives

**ACS880-11, wall-mounted regenerative single drives**

**Highlights**
- Complete and compact regenerative wall-mounted drives with all important features built-in the drive
- Regenerative drives save energy compared to other braking methods as energy is fed back to the network
- Does not need external braking devices, which makes drive installation simple
- The active supply unit is able to boost output voltage, which ensures reliable operation and guarantees full motor voltage even when the supply voltage is below nominal
- Produces exceptionally low harmonic content in the drives input, which is achieved without external filters of multi-pulse transformers
- Common PC tool, Drive Composer for commissioning and configuration
- Drive-to-drive link for fast communication between drives including master-follower configurations without any additional software
- Removable memory unit enabling fast replacement without compatibility issues
- Drive's energy efficiency information and the energy optimizer feature help to improve process efficiency
- ATEX certified with ABB motors for explosive atmospheres
- Application specific control programs, e.g., for Produces exceptionally low harmonic content in the drives input, which is achieved without external filters of multi-pulse transformers control, cranes, winders, etc.
- Drive application programming based on IEC 61131-3
- Supports various motor types including synchronous reluctance motors and high speed motors
- Options include:
  - I/O extension modules
  - Fieldbus adapter modules
  - Integrated safety features
  - Speed feedback interfaces
  - EMC filter, output filters

For further information, see catalog “ABB industrial drives, ACS880, single drives, 0.55 to 6000 kW”, code: 3AUA0000098111 EN.
Manage and control harmonics with all-compatible drives

ACS880-31, wall-mounted ultra-low harmonic single drives

Highlights
- Complete and compact wall-mounted drives producing exceptionally low harmonic content in the drives input without external filters
- The active supply unit in the drive is able to boost output voltage, which ensures reliable operation and guarantees full motor voltage even when the supply voltage is below nominal
- Extensive range of built-in features and options enable optimal solutions for different applications

Features
- Power range 3 to 110 kW (380 to 500 V)
- IP21 (UL Type 1) as standard, IP20 (UL Open Type) and IP55 (UL type 12) as options
- Supports optimized cabinet mounting (+P940)
- Flange (push through) mounting option with separated control electronics and IP55 backside protection
- Reaches unity power factor
- Integrated safety including safe torque off (STO) as standard with several safety functions as options
- Intuitive control panel with USB connection for PC tool and support up to 20 languages
- Common PC tool, Drive Composer for commissioning and configuration
- Drive-to-drive link for fast communication between drives including master-follower configurations without any additional software
- Removable memory unit enabling fast replacement without compatibility issues
- Drive’s energy efficiency information and the energy optimizer feature help to improve process efficiency
- ATEX certified with ABB motors for explosive atmospheres
- Application specific control programs, e.g., for position control, cranes, winders, etc.
- Drive application programming based on IEC 61131-3
- Supports various motor types including synchronous reluctance motors and high speed motors
- Options include:
  - I/O extension modules
  - Fieldbus adapter modules
  - Integrated safety features
  - Speed feedback interfaces
  - EMC filter, braking chopper

For further information, see catalog “ABB industrial drives, ACS880, single drives, 0.55 to 6000 kW”, code: 3AUA0000098111 EN.
Capture and utilize braking energy with all-compatible drives

**ACS880-17/-17LC, cabinet-built regenerative single drives**

**Highlights**
- Complete regenerative drive in a single, compact and customizable package
- Regenerative drives save energy compared to other braking methods as energy is fed back to the network
- Does not need external braking devices, which makes drive installation simple as less need for cabinet space is required
- Especially suitable for demanding applications with fast transition between motoring and generating that benefit from the DTC control method
- The active supply unit is able to boost output voltage, which guarantees full motor voltage even when the supply voltage is below nominal
- Produces exceptionally low harmonic content in the drives input, which is achieved without external filters of multi-pulse transformers
- Intuitive control panel with USB connection for PC tool and support up to 20 languages
- Common PC tool, Drive Composer for commissioning and configuration
- Drive-to-drive link for fast communication between drives including master-follower configurations without any additional software
- Removable memory unit enabling fast replacement without compatibility issues
- Drive’s energy efficiency information and the energy optimizer feature help to improve process efficiency
- ATEX certified with ABB motors for explosive atmospheres
- Application specific control programs, e.g., for position control, cranes, winders, etc.
- Drive application programming based on IEC 61131-3
- Supports various motor types including synchronous reluctance motors and high speed motors
- Marine type approved design
- Options include:
  - I/O extension modules
  - Fieldbus adapter modules
  - Integrated safety features
  - Speed feedback interfaces
  - EMC filter, braking chopper

For further information, see catalog “ABB industrial drives, ACS880, single drives, 0.55 to 6000 kW”, code: 3AUA0000009B111 EN.
Manage and control harmonics with all-compatible drives

**ACS880-37/-37LC, cabinet-built ultra-low harmonic single drives**

**Highlights**
- Produces exceptionally low harmonic content in the drives input, which is achieved without external filters or multi-pulse transformers
- Active supply unit in the drive is able to boost output voltage, which guarantees full motor voltage even when the supply voltage is below nominal
- Extensive range of built-in features and options enable optimal solutions for different applications

**Features**
- ACS880-37 power range 45 to 3200 kW (380 to 690 V)
- ACS880-37LC power range 250 to 6000 kW (690 V)
- IP22 as standard (UL type 1), IP42 and IP55 (UL type 12) as option; LC has IP42 as standard
- Integrated safety including safe torque off (STO) as standard with several safety functions as options
- Intuitive control panel with USB connection for PC tool and support up to 20 languages
- Common PC tool, Drive Composer for commissioning and configuration
- Drive-to-drive link for fast communication between drives including master-follower configurations without any additional software
- Removable memory unit enabling fast replacement without compatibility issues
- Drive’s energy efficiency information and the energy optimizer feature help to improve process efficiency
- ATEX certified with ABB motors for explosive atmospheres
- Application specific control programs, e.g., for position control, cranes, winders, etc.
- Drive application programming based on IEC 61131-3
- Supports various motor types including synchronous reluctance motors and high speed motors
- Marine type approved design
- Options include:
  - I/O extension modules
  - Fieldbus adapter modules
  - Integrated safety features
  - Speed feedback interfaces
  - EMC filter, braking chopper

For further information, see catalog “ABB industrial drives, ACS880, single drives, 0.55 to 6000 kW”, code: 3AUA0000098111 EN.
ACS880 series, multidrives

**Highlights**
- Single supply and DC bus arrangement with several inverters reduce line power and system size
- Premium motor control with DTC for virtually any type of AC motor, including permanent magnet motors and synchronous reluctance motors (SynRM)
- A wide range of built-in features, flexible connectivity and an extensive range of options for the optimum solution to different applications
- Built on ABB’s all-compatible drives architecture providing unprecedented levels of compatibility, flexibility and ease-of-use

**Features**
- Power range 1.5 to 5600 kW (380 to 690 V)
- Degree of protection, IP22 as standard, IP42 and IP54 (UL type 12) as options
- Integrated safety including safe torque off (STO) as standard with several safety functions as options
- High packing density with 16 inverter units up to frame size R2! can be installed into one cabinet
- Fast connectors for motor cables located in the bottom part
- DC fuse disconnectors, DC fuses or DC fuse switch including charging circuit for inverters
- Highly efficient thermal handling – heat loss of each inverter unit is guided to the back of the cabinets
- Intuitive control panel with USB connection for PC tool and support up to 20 languages
- Common PC tool, Drive Composer for commissioning and configuration
- Drive-to-drive link for fast communication between drives including master-follower configurations without any additional software
- Removable memory unit enabling fast replacement without compatibility issues
- Drive’s energy efficiency information and the energy optimizer feature help to improve process efficiency
- ATEX certified with ABB motors for explosive atmospheres
- Application specific control programs, e.g., for position control, cranes, winders, etc.
- Drive application programming based on IEC 61131-3
- Supports various motor types including synchronous reluctance motors and high speed motors
- Marine type approved design
- Options include:
  - I/O extension modules
  - Fieldbus adapter modules
  - Integrated safety features
  - Speed feedback interfaces
  - EMC filter, braking chopper

For further information, see catalog “ABB Industrial drives, ACS880, multidrives, 1.5 to 6000 kW”, code: 3AUA0000115037 EN.
LOW VOLTAGE AC DRIVES

For further information, see catalog “ABB industrial drives, ACS880, drive modules, 0.55 to 3200 kW”, code: 3AU0000115038 EN.
All-compatible single drive modules for optimized cabinet assembly

ACS880-04/-04F/-04X/-04FXT, single drive modules

**Highlights**
- Optimized for easy and cost efficient cabinet assembly
- Compact and robust cabinet design, saves floor space and is easy to maintain and service
- Easy to integrate into automation systems
- Premium motor control with DTC for virtually any type of AC motor, including permanent magnet motors, synchronous reluctance and high speed motors
- Built on ABB’s all-compatible drives architecture providing unprecedented levels of compatibility, flexibility and ease-of-use

**Features**
- Power range 250 to 710 kW/380 to 690 V for -04/-04F single drive module
- Power range 400 to 1200 kW/380 to 690 V for -04X/-04FXT (parallel running -04) and -04/-04F single drive module packages (drives consisting of multiple modules)
- Degree of protection IP00 and IP20 (UL open type)
- Possibility for flat mounting minimizing the depth of the module
- Flange (push through) mounting variant (-04F) with separated control electronics and IP55 backside protection
- Control unit can be either external or internal
- Integrated safety including safe torque off (STO) as standard with several safety functions as options
- Intuitive control panel with USB connection for PC tool and support up to 20 languages
- Common PC tool, Drive Composer for commissioning and configuration
- Drive-to-drive link for fast communication between drives, including master-follower configurations without any additional software
- Removable memory unit enabling fast replacement without compatibility issues
- Drive’s energy efficiency information and the energy optimizer feature help to improve process efficiency
- Marine type approved design
- ATEX certified with ABB motors for explosive atmospheres
- Application specific control programs, e.g., for position control, cranes, winders, etc.
- Drive application programming based on IEC 61131-3
- Supports various motor types including synchronous reluctance and high speed motors
- Options include:
  - Fieldbus adapter modules
  - Integrated safety features
  - Speed feedback interfaces
  - EMC filter, braking chopper
  - Assembly kits for Rittal cabinets and generic cabinets

For further information, see catalog “ABB industrial drives, ACS880, drive modules, 0.55 to 3200 kW”, code: 3UA0000115038 EN.
Capture and utilize braking energy with all-compatible drive modules

ACS880-14, regenerative single drive modules

**Highlights**
- Complete and compact regenerative drive modules with all important features built-in the drive
- Regenerative drives save energy compared to other braking methods as energy is fed back to the network
- Does not need external braking devices, which makes drive installation simple
- The active supply unit is able to boost output voltage, which ensures reliable operation and guarantees full motor voltage even when the supply voltage is below nominal
- Produces exceptionally low harmonic content in the drives input, which is achieved without external filters of multi-pulse transformers

**Features**
- Power range 110 to 400 kW / 380 to 690 V
- Degree of protections IP20 (UL Open Type)
- Reaches unity power factor
- Control unit can be either internal or external
- Integrated safety including safe torque off (STO) as standard with several safety functions as options
- Intuitive control panel with USB connection for PC tool and support up to 20 languages
- Bluetooth connection for mobile connectivity
- Common PC tool, Drive Composer for commissioning and configuration
- Drive-to-drive link for fast communication between drives including master-follower configurations without any additional software
- Removable memory unit enabling fast replacement without compatibility issues
- Drive’s energy efficiency information and the energy optimizer feature help to improve process efficiency
- ATEX certified with ABB motors for explosive atmospheres
- Application specific control programs, e.g., for override control, cranes, winders, etc.
- Drive application programming based on IEC 61131-3
- Supports various motor types including synchronous reluctance motors and high speed motors
- Options include:
  - I/O extension modules
  - Fieldbus adapter modules
  - Integrated safety features
  - Speed feedback interfaces
  - EMC filter, output filters

For further information, see catalog “ABB industrial drives, ACS880, drive modules, 0.55 to 3200 kW”, code: 3AU0000115038 EN.
Manage and control harmonics with all-compatible drive modules

ACS880-34, ultra-low harmonic single drive modules

Highlights
- Complete and compact drive modules producing exceptionally low harmonic content in the drives input without external filters
- The active supply unit in the drive is able to boost output voltage, which ensures reliable operation and guarantees full motor voltage even when the supply voltage is below nominal
- Extensive range of built-in features and options enable optimal solutions for different applications

Features
- Power range 110 to 400 kW / 380 to 690 V
- Degree of protections IP20 (UL Open Type)
- Reaches unity power factor
- Control unit can be either internal or external
- Integrated safety including safe torque off (STO) as standard with several safety functions as options
- Intuitive control panel with USB connection for PC tool and support up to 20 languages
- Bluetooth connection for mobile connectivity
- Common PC tool, Drive Composer for commissioning and configuration
- Drive-to-drive link for fast communication between drives including master-follower configurations without any additional software
- Removable memory unit enabling fast replacement without compatibility issues
- Drive’s energy efficiency information and the energy optimizer feature help to improve process efficiency
- ATEX certified with ABB motors for explosive atmospheres
- Application specific control programs, e.g., for position control, cranes, winders, etc.
- Drive application programming based on IEC 61131-3
- Supports various motor types including synchronous reluctance motors and high speed motors
- Options include:
  - I/O extension modules
  - Fieldbus adapter modules
  - Integrated safety features
  - Speed feedback interfaces
  - EMC filter, output filters

For further information, see catalog “ABB Industrial drives, ACS880, drive modules, 0.55 to 3200 kW”, code: 3UA0000115038 EN.
Capture and utilize braking energy with all-compatible drives

**ACS880-14, regenerative single drive module packages**

**Highlights**
- Regenerative single drive modules equipped with an active supply unit and optimized for cabinet assembly
- All important features and options, including LCL line filter module(s), IGBT supply module(s), inverter module(s), common mode filters, come in the package
- Regenerative drives save energy compared to other braking methods as energy is fed back to the network
- Does not need external braking devices, which makes drive installation simple as less need for cabinet space is required
- Especially suitable for demanding applications with fast transition between motoring and generating that benefit from the DTC control method
- The active supply unit is able to boost output voltage, which guarantees full motor voltage even when the supply voltage is below nominal
- Produces exceptionally low harmonic content in the drives input, which is achieved without external filters of multi-pulse transformers
- Optimized design for cabinet assembly
- Compact and modular design allowing a wide range of variants
- Removable memory unit enabling fast replacement without compatibility issues
- Drive’s energy efficiency information and the energy optimizer feature help to improve process efficiency
- ATEX certified with ABB motors for explosive atmospheres
- Application specific control programs, e.g., for position control, cranes, winders, etc.
- Drive application programming based on IEC 61131-3
- Supports various motor types including synchronous reluctance motors and high speed motors
- Marine type approved design
- Options include:
  - I/O extension modules
  - Fieldbus adapter modules
  - Integrated safety features
  - Speed feedback interfaces
  - EMC filter, braking chopper
  - Assembly kits for Rittal cabinets and generic cabinets

For further information, see catalog “ABB industrial drives, ACS880, single drives, 0.55 to 6000 kW”, code: 3AUA0000098111 EN.
Manage and control harmonics with all-compatible drives

ACS880-34, ultra-low harmonic single drive module packages

**Highlights**
- Ultra-low harmonic single drive modules equipped with an active supply unit and optimized for cabinet assembly
- Produces exceptionally low harmonic content in the drives input, which is achieved without external filters of multi-pulse transformers
- All important features and options, including LCL line filter module(s), IGBT supply module(s), inverter module(s), common mode filters, come in the package
- Active supply unit in the drive is able to boost output voltage, which guarantees full motor voltage even when the supply voltage is below nominal
- Extensive range of built-in features and options enable optimal solutions for different applications
- Removable memory unit enabling fast replacement without compatibility issues

- ATEX certified with ABB motors for explosive atmospheres
- Application specific control programs, e.g., for position control, cranes, winders, etc.
- Drive application programming based on IEC 61131-3
- Supports various motor types including synchronous reluctance motors and high speed motors
- Marine type approved design
- Options include:
  - I/O extension modules
  - Fieldbus adapter modules
  - Integrated safety features
  - Speed feedback interfaces
  - EMC filter, braking chopper
  - Assembly kits for Rittal cabinets and generic cabinets

**Features**
- Power range 250 to 2200 kW / 380 to 690 V
- Reaches unity power factor
- Integrated safety including safe torque off (STO) as standard with several safety functions as options
- Optimized design for cabinet assembly
- Compact and modular design allowing a wide range of variants

For further information, see catalog “ABB industrial drives, ACS880, single drives, 0.55 to 6000 kW”, code: 3AUA000009B111 EN.
Liquid-cooled drives in a compact package

ACS880, liquid-cooled multidrives

**Highlights**
- Direct liquid cooling and robust design with fully enclosed cabinet for applications where space savings and silent operation is a must. No need for air conditioning in the electrical rooms.
- 98% of total losses are transferred to cooling liquid
- Coolant is commercially and globally available ready-made mixture, Antifrogen® L
- Flexible multidrive configurations for a broad range of heavy industrial processes
- Extensive programmability and optional control programs for a wide range of applications
- Designed for easy installation, commissioning and maintenance
- Considerably higher power density compared to ACS800
  - Less modules needed for high motor powers
  - Reduced footprint

**Features**
- Power range 355 to 6000 kW (525 to 690 V)
- Fully enclosed cabinet, IP42 as standard, IP54 as option
- Common DC busbar
- For harsh environments
- Silent operation
- Compact size
- Customized solutions
  - Industry and marine specific hardware and software solutions
  - Marine type approved design

**Available units**
- Inverter units, ACS880-107LC
- Regenerative IGBT supply units, ACS880-207LC
- Diode supply unit (DSU) ACS880-307LC
- DC-DC converter (DDC) ACS880-1607LC
- Liquid-cooling unit, ACS880-1007LC
- Braking unit, ACS880-607LC

For further information, see catalog “ABB industrial drives, ACS880, multidrives, 1.5 to 6000 kW”, code: 3AU0000115037 EN.
All-compatible drive modules for compact cabinet assembly

ACS880, multidrive liquid-cooled modules

Highlights
- Offering includes inverter modules, supply modules and braking choppers
- Direct liquid cooling and robust design for applications where space savings, fully enclosed cabinet or silent operation is a must. No need for air conditioning in the electrical rooms.
  - 98% of total losses are transferred to cooling liquid
  - Coolant is commercially and globally available ready-made mixture, Antifrogen® L
- High power density due to efficient liquid cooling
- Compact design for cabinet assembly with a small footprint
- Optimal solution for demanding operation environments
- Mechanical and electrical kit accessories including 3D images, assembly drawings and EPLAN electric macros
- Built on ABB’s all-compatible drives architecture providing unprecedented levels of compatibility, flexibility, compactness and ease-of-use

Features
- Power range 355 to 3000 kW (525 to 690 V)
- ABB’s multidrive modules are designed to be installed in cabinets with a common DC bus
- Integrated safety including safe torque off (STO) as standard with several safety functions as options
- Supports various motor types
- Marine type approvals from several classification societies
- Installation accessory kits for Rittal cabinets and generic cabinets

Available units
- Inverter units, ACS880-104LC
- Diode supply module ACS880-304LC+A019
- Regenerative IGBT supply units, ACS880-204LC
- DC-DC converter (DDC) ACS880-1604LC
- Liquid-cooling unit, ACS880-1007LC
- Braking unit, ACS880-604LC

For further information, see catalog “ABB Industrial drives, ACS880, drive modules, 0.55 to 3200 kW”, code: 3AU000115038 EN.
ABB industry specific drives tailored to save energy and money

ABB industry specific drives provide our customers with dedicated drive solutions for AC motor control used in industries and applications such as HVAC and water and wastewater. Working closely with these industries, we have developed targeted functionality to help you improve your overall operating performance while also helping to reduce energy use. Extremely intuitive control panel with menus and assistants help you easily set up and tailor the drives to meet the needs of your processes.
All-compatible drives for water

Robust design securing optimal flow of water and wastewater

ACQ580

Highlights
- Optimized efficiency of the water and wastewater process
- Enhanced reliability with dedicated pump application functionalities
- Proven performance in demanding environments with robust and compact drives offering
- Seamless integration and operation with wide motor and communication protocol support
- Easy to commission, configure and use with intuitive Hand-Off-Auto control panel that speaks pump language

ACQ580 Ultra-low harmonic drive

Highlights
- THDi even less than 3%
- Power factor always 1.0 even with partial loads
- Ability to boost output voltage in weak networks
- Everything built in – no external filters or contactors required

Features
- Power range:
  - 0.75 to 500 kW (3-phase 380 to 480 V)
  - 0.75 to 75 kW (3-phase 200 – 240 V)
  - 0.37 to 37 kW (1-phase 200 – 240 V)
- Ultra-low harmonic drives power range:
  - 4 to 355 kW (3-phase 380 to 480 V)
- Wall-mounted drives, IP21 as standard (UL type 1), IP55 as option (UL type 12)
- Drive module, IP00 as standard, IP20 as option
- Cabinet-built drives, IP21 as standard, IP42 and IP54 as options
- Built-in pump application program with Intelligent multipump functionality, Sensorless flow calculation, Level control, Quick ramps, Pump cleaning and Pump protection functions
- Adaptive programming
- Intuitive and easy to use Hand-Off-Auto control panel available also with Bluetooth functionality
- Built-in choke and EMC filter, category C2
- Functional safety: Safe torque off (STO) as standard
- Extended connectivity to I/O
- Coated PCBs for humid and harsh environments

For further information, see catalog “ABB drives for water and wastewater, ACQ580, 0.75 to 500 kW”, code: 3AU0000194172 EN.
ABB drives for HVAC

Compact drive for HVAC pump and fan OEM applications up to 4 kW

ACS320

Highlights
- HVAC application specific features
- Seamless integration to BMS
- Saves energy in HVAC systems

Features
- Power range 0.37 to 4 kW (3-phase 380 to 480 V)
- BACnet MS/TP, N2, FLN and Modbus RTU built-in
- Advanced HVAC control macros incl. supply and return fans, cooling towers, condensers, booster pumps
- Two PID controllers
- Timers with real-time clock
- Energy optimizer feature
- Sleep function

For further information, see flyer “ABB drives for HVAC, ACS320, 0.37 to 4 kW”, code: 3AUA000125438 EN.
All-compatible HVAC drives family

Complete HVAC functionality in a compact package

ACH480

Highlights
• Complete set of HVAC functions
• Optimized for cabinet installations
• Easy to commission and use
• Flexible in programming
• Instant availability from ABB authorized partners and ABB regional and central stocks

Features
• Power range 0.75 to 22 kW (3-phase 380 to 480 V)
• IP20 as standard, UL type 1 with option
• EMC category C2
• Flexible I/O configurations
• Wide set of motor types supported, including induction motors (IM), permanent magnet (PM) and synchronous reluctance motors (SynRM)
• User friendly operation with HVAC control panel
• Optional Bluetooth enabled HVAC control panel and Drivetune app allow to operate the drive from a distance
• Embedded BACnet MS/TP, Modbus RTU and N2 for easy integration with BMS
• Certified safe torque off (STO) as standard
• PID controllers for controlling HVAC applications
• Real time clock and built-in timers for timed operation of the drive and external HVAC devices

For further information, see catalog “ABB drives for HVAC, ACHS80, 0.75 to 500 kW, 1 to 700 hp, ACH480, 0.75 to 22 kW, 1 to 30 hp”, code: 3AUA0000231852 EN.
COMPREHENSIVE CLIMATE CONTROL FOR COMFORTABLE, SAFE AND ENERGY EFFICIENT BUILDINGS

ACH580

Highlights

- Complete set of HVAC functions
- Multiple construction types and protection classes available
- Simple to select, install and use - all the essential features are embedded
- Seamless integration to applications and jobsites
- Improved power quality performance
- Widely available from ABB authorized partners and from ABB regional and central stocks

Features

- Power range 0.75 to 500 kW (3-phase 380 to 480 V), 0.75 to 75 kW (3-phase 200 to 240 V), 0.37 to 37 kW (1-phase 200 to 240 V)
- Wall-mounted drives: IP21 as standard, IP55 as option
- Drive modules: IP00 as standard, IP20 as option
- Cabinet-built drives: IP21 as standard, IP42 or IP54 as option
- Public networks compliant with standard EMC C2 filter and built-in choke
- Extendable I/O configuration, to cover the most demanding HVAC control needs
- Controls various motor types like induction, PM and high efficient SynRM
- User friendly operation with HVAC control panel
- Optional Bluetooth enabled HVAC control panel
- Embedded BACnet MS/TP, Modbus RTU and N2
- Certified safe torque off (STO) as standard, for safe operation and maintenance
- PID controllers for controlling even complex HVAC applications
- Real time clock and built-in timers
- Ultra-low harmonic drive variant to ensure reliable and efficient operation, even when the supply voltage is below nominal

For further information, see catalog “ABB drives for HVAC, ACH580, 0.75 to 500 kW”, code: 3AUA0000186691 EN.
ABB wind turbine converters

The wind turbine converter plays an important role in helping customers create the perfect wind economy. The selection of the right converter is critical in the turbine design and for a higher return on investment.

ABB offers wind turbine converters for small-scale and utility-scale wind turbines. ABB wind turbine converters, suitable for any of today’s turbine concepts, deliver durable, reliable performance and are backed by a complete set of life-cycle services.
The ACS880 smart grid converter is optimized to meet the requirements of the renewable industry.

**Highlights**
- The ACS880 smart grid converter is has been adapted from ACS880 drive family and optimized to meet the requirements of the renewable industry. It is based on a technology proven and tested in thousands of applications worldwide.
- Complete grid code compatible converter in a single, compact and customizable package
- Especially suitable for wind turbine retrofit cases when upgrading a fixed speed wind turbine into a variable speed wind turbine
- ATEX certification with ABB motors
- Easy troubleshooting and fast replacement thanks to modular components, such as control units and power modules. Possible faults are limited to one modular component.
- Improved stability of the renewable power supply conforming to user-defined settings with the optional integrated battery control, enabling connection to an external energy storage

**Features**
- Power range 250 to 3200 kW/380 to 690 V
- Air cooled
- IP22 as standard (UL type 1), IP42 and IP55 (UL type 12) as option
- Supports renewable market requirements to comply with the most stringent grid code requirements
- Standard Ethernet connection for PC browser
- Removable memory unit enabling fast replacement without compatibility issues
- ATEX certification with ABB motors for potentially explosive atmospheres enables use in gas turbine applications
- Drive application programming based on IEC 61131-3
- Supports various motor types including permanent magnet, synchronous reluctance motors and high-speed motors
- Marine type approved design
- Heaters for cabinet heating & dry-out sequences
- Integrated safety including safe torque off (STO) as standard with several safety functions as options
- Options include:
  - I/O extension modules
  - Fieldbus adapter modules
  - Integrated safety features
  - Speed feedback interfaces
  - EMC filter, braking chopper
  - Sin filter

For further information, see catalog “ABB Industrial drives, ACS880, single drives, 0.55 to 6000 kW”, code: 3AU000098111 EN.
The ACS880 converter is a full power converter engineered for onshore and offshore wind turbines.

### Highlights
- The ACS880 wind turbine converter is has been adapted from ACS880 drive family and optimized to meet the requirements of the wind industry. It is based on a technology proven and tested in thousands of applications worldwide.
- The precise, fast control dampens drivetrain oscillations, minimizing stress on the gearbox. This results in a longer lifetime for the mechanical drivetrain.
- The converter can be installed as both nacelle and tower installations, either in-line or back-to-back cabinet with liquid cooling or combined cooling. Various cabling options enable adaption to different installations.
- Easy troubleshooting and fast replacement thanks to modular components, such as control units and power modules. Possible faults are limited to one modular component.
- Improved stability of the turbine's power supply conforming to user-defined settings with the optional integrated battery control, enabling connection to an external energy storage.

### Features
- Generator power range 1 to 12 MW
- Liquid cooling with totally enclosed cabinet
- Full power converter for permanent magnet and asynchronous generators
- Rated grid voltage 525 to 690 V AC, 3-phase, ±10%
- Rated generator voltage 0 to 750 V AC
- Nominal grid frequency 50/60 Hz
- Efficiency at converter’s rated point, typical value 97%
- Generator-side converter dv/dt, measured value 1.25 kV/μs
- Total harmonic current distortion, measured value 2.5%
- Ambient temperature:
  - Transport -40 to +70 °C
  - Storage -40 to +70 °C
  - Operation -30 to +50 °C
- Coolant inlet temperature +5 to +50 °C
- Totally enclosed cabinet IP21 and IP54 / UL type 12
- Cabling connections: Bottom
- Cooling connections: Left or right side
- Cabinet configuration: In-line, back-to-back or several separate
- Fieldbus interfaces: EtherCAT, PROFINET IO, PROFIBUS-DP, CANopen, Modbus, ControlNet, InterBus-S, DeviceNet
- Standard Ethernet connection for PC browser
- Supports wind turbines to comply with the most stringent grid code requirements
- Quality assurance system ISO 9001
- Environmental system ISO 14001
- Product approvals: UL61800-5-1, CSA C22.2 No 274, DNVGL-SE-0441
- Options include:
  - Sub-converter configuration
  - Cooling method Liquid or combined cooling
  - Online reconfiguration
  - Integrated energy storage
  - Output contactors on the generator side protection
  - High coolant inlet temperature up to +55 °C
  - High altitude up to 4000 m

For further information, see catalog “ABB wind turbine converters, 800 kW to 8 MW”, code: 3AUA0000231755 EN.
Superior system performance

PCS6000, wind turbine converters

**Highlights**
- The PCS6000 wind turbine converter is has been adapted from ABB's medium voltage frequency converters and optimized to meet the requirements of the wind industry. It is based on a technology proven and tested in thousands of applications worldwide.
- The converter is suitable for other high power renewable energy application such as tidal or wave
- Supports wind turbines to comply with the most stringent grid code requirements
- The converter can be installed as both nacelle and tower installations, either in-line, back-to-back, face-to-face or T-shape arrangement
- Easy troubleshooting and fast replacement thanks to modular components, such as control units and power modules. Possible faults are limited to one modular component.
- Very compact, light-weighted, fuseless and filterless design
- Very robust and reliable power conversion by IGCT semiconductors
- Efficient cable connections to generator and transformer due to MV technology
- The precise, fast control dampens drivetrain oscillations, minimizing stress on the gearbox. This results in a longer lifetime for the mechanical drivetrain.

**Features**
- Generator power range up to 15 MW (higher on request)
- Liquid cooling with IP54 enclosed cabinet
- Full power converter for permanent magnet and induction generators
- Rated grid voltage 3.3 kV AC
- Rated generator voltage 0 to 3.3 kV AC
- Nominal grid frequency 50/60 Hz
- Efficiency at converter’s rated point, typical value > 98%
- Ambient temperature:
  - Transport -25 to +70 °C
  - Storage -25 to +55 °C
  - Operation -10 to +45 °C
- Coolant inlet temperature up to +45 °C, higher temperatures possible on request.
- Cabling connections:
  - Generator-side connections from top or back (Pfisterer P3)
  - Grid-side connections from top (Pfisterer P3)
  - Braking resistor connections from top or back
  - Control connections from bottom (terminals inside control cabinet)
- Quality assurance system ISO 9001:2015
- Environmental system ISO 14001:2015
- Occupational health and safety system ISO 45001:2018

For further information, see catalog "PCS6000 wind turbine converter", code: 3BHS351272 E01.
Mobile drive solution for working machine and marine applications

Dependable heavy duty performance is essential to your operations. Our HES880 drives are designed with this in mind. They help you increase productivity, while reducing fuel consumption and emissions.
HES880 mobile drive modules

**Highlights**

- HES880 has three different firmware. One hardware can be configured to operate in three modes:
  - Inverter for traction motor and generator up to 510 kW continuous and up to 760 kW peak electrical power (500 V and $\cos \phi = 0.98$)
  - Bi-directional line converter for grid connectivity
  - DC/DC converter for super capacitor or battery interface, up to 620 kW
- Complete and compact regenerative drive modules with all important features built-in the drive
- Regenerative drives save energy compared to other braking methods as energy is fed back to the battery or super capacitor
- Does not need external braking devices, which makes drive installation simple
- The active supply unit can boost output voltage, which ensures reliable operation and guarantees full motor voltage even when the supply voltage is below nominal

**Features**

- Current range 233 A to 600 A
- Supply voltage 3-phase, 230 to 500 V
- Degree of protection IP 67
- Coolant temperature -40 to +70 °C (-40 to 160 °F)
- Ambient temperature – 40 to +85 °C (-40 to +185 °F)
- Vibration tolerance: IEC 60068-2, 4 g constant and 30 g shocks
- Integrated safe torque off (STO) as standard
- Intuitive control panel with USB connection for PC tool and support up to 20 languages
- Common PC tool, Drive Composer for commissioning and configuration
- Removable memory unit enabling fast replacement without compatibility issues
- Drive's energy efficiency information and the energy optimizer feature help to improve process efficiency
- Application specific control program for cranes and winches
- Drive application programming based on IEC 61131-3
- Supports various motor types including synchronous reluctance motors and high-speed motors
- Options include:
  - External filters
  - Chokes for DC/DC converter
  - LCL-filter for grid connection
  - Converter options
  - Internal brake chopper
  - Encoded power connection
  - Hazardous Voltage Interlock Loop (HVIL)

For further information, see flyer “Mobile drive solution for working machine and marine applications”, code: 3AU0000161471 EN.
ABB servo drives provide capability without complexity

ABB servo drives offer flexible technologies and high performance motor control to solve a wide variety of applications. The range includes powers from 0.1 kW to 7.5 kW. The drives enable operation with single and three-phase supplies for global markets, and have open communication options as well as real-time Ethernet technologies such as EtherCAT® and POWERLINK.

Our intelligent servo drives include programming options for single and multi-axis control applications or can be combined with our multi-axis motion controllers and PLC products for system solutions.
ABB servo drives

MotiFlex e180

Highlights
- Versatile servo drives with integrated safety function for the three phase power network
- Software selectable Ethernet protocols including EtherCAT, POWERLINK, Modbus TCP/IP, EtherNet/IP and PROFINET IO
- Advanced motion programming language Mint for multitask controls such as communication, logic, motion and HMI interaction
- Supports the HIPERFACE DSL one cable solution

Features
- Three phase operation voltage from 200 to 480 V AC
- 200% and 300% overload capacity up to 3 s
- Degree of protection IP20 for cabinet installation (UL open)
- Supports the protocols EtherCAT and POWERLINK via the ports E1 and E2, and supports the protocols EtherNet/IP, Modbus TCP/IP and PROFINET IO via the port E3
- Suitable for single axis and multi-axis servo systems
- Supports rotary and linear AC servo motors
- Integrates the safe torque off (STO) function which complies with the standard EN61800-5-2
- Supports the analog and PTO control modes
- Supports the second input for dual feedback
- Flexible options for function expansion
  - Various encoder adaptors for different kinds of encoders
  - AC chocks
  - EMC filters
  - External braking resistors

Complete motion control solutions

Highlights
The servo drives are part of ABB’s extensive range of motion control solutions. The solutions include human machine interfaces (HMI), Programmable Logic Controllers (PLC), functional safety technology, multi-axis motion controllers, rotary servo motors and linear motors. All of which seamlessly interface to provide a complete machine control solution.

For further information, see catalog "MotiFlex e180". Code: 3AXD50000751464 EN.

For further information, see catalog "PLC Automation AC500, CP600, Automation Builder", code: 3ADR020077C0204.
Compact servo drives with flexible Ethernet communication protocol options

MicroFlex e190

Highlights
- Compact servo drives with integrated safety function for the single/three phase power network
- Software selectable Ethernet protocols including EtherCAT, POWERLINK, Modbus TCP/IP, EtherNet/IP and PROFINET IO
- Advanced motion programming language Mint for multitask control such as communication, logic, motion and HMI interaction

Features
- Single/three phase operation voltage from 200 to 240 V AC
- 200% and 300% overload capacity up to 3 s
- Degree of protection IP20 for cabinet installation (UL open)
- Supports the protocols EtherCAT, POWERLINK and PROFINET IO via the ports E1 and E2, and supports the protocols EtherNet/IP and Modbus TCP/IP via the port E3
- Suitable for single axis and multi-axis servo systems
- Supports rotary and linear AC servo motors
- Integrates the safe torque off (STO) function which complies with the standard IEC61800-5-2
- Supports the analog and PTO control modes
- Supports the second input for dual feedback
- Integrated EMC bonding plate on the front panel makes it easy for grounding
- Flexible options for function expansion
  - Resolver splitter OPT-MF-200
  - Resolver adaptor OPT-MF-201
  - IO Expansion option OPT-SIO-1
  - EMC filters
  - External braking resistors

For further information, see catalog “ABB servo product – Servo drive and motor packages”. Code: 3AXD50000751464 EN.

Features
- The CP600 control panels platform offers touchscreen displays from 4.3” to 21.5”, portrait and landscape versions
- The comprehensive and scalable AC500 PLC platform is based on IEC 61131-3 and PLCopen
- A wide range of rotary servo motors and gearheads
- Safety technology with integrated drive features, safety PLC and safe I/O systems, as well as Jokab Safety sensors, actuators, safety relays, programmable safety controllers
Medium voltage drives

ABB offers an extensive portfolio of variable speed drives and soft starters for medium voltage applications in the power range from 250 kW to more than 100 MW.
They are used in a wide range of applications in industries such as metals, marine, mining, cement, power, chemical, oil and gas, water and wastewater, food and beverage, pulp and paper, and test stands.
ABB general performance drives offer ease-of-use with standard motors

Effortless energy efficiency for a wide range of applications

ACS580MV

**Highlights**
- Simple to select, order, commission and operate
- All essential features built into the drive
- Straightforward settings menu and assistants
- Bluetooth connection available
- Energy efficiency features for optimal energy use
- Universal connectivity
- Member of ABB’s all-compatible drives portfolio

**Features**
- Power range 200 kW to 6.3 MW (3.3 to 11 kV)
- Air cooling
- Cabinet-built drives, IP21 as standard, IP42 as option
- VSI – Voltage Source Inverter, multiple-pole diode rectifier, multilevel output
- In-line manual bypass panel for highest availability of any application that can operate direct on line (DOL)
- In-line synchronize bypass panel for softstarter applications with large motor as well as multi-motor starting
- Free entry level PC tool with USB connection on control panel
- Advanced diagnostics and monitoring system
- Wide range of fieldbus adaptors for all major automation networks
- Compliance with CE and EAC

For further information, see catalog “ACS580MV”, code: 3BHT490775R0001.
General purpose drives are suitable for a wide variety of applications such as pumps, fans, compressors, mixers, mills, propulsion and thrusters, test stands, mine hoists and conveyors in many industries. The drives are all-rounders that ensure energy-efficient and productive processes.

Reliable and safe operation of high-power applications

**ACS5000**

**Highlights**

- Built to order – every drive is customized to fit your needs
- Choose from a broad range of configurations with flexible transformer and cooling arrangement
- Smooth integration and easier operation throughout your entire installation
- Advanced process control
- Large variety of available fieldbus interfaces
- Arc resistant design based on “arc prevention” and “fast elimination” for the water-cooled version
- Electromechanically interlocked doors with DC grounding switch
- Certified functional safety
- ABB Ability™ condition monitoring for drives to monitor your drive condition all the time, anywhere in the world
- Low parts count and fuseless design – ABB IGCT technology proven to be the best choice for high power applications

**Features**

- Power range 2 to 36 MW and higher on request (6.0 to 6.9 kV)
- Air and water cooling
- Superior arc protection function for very fast arc detection and elimination in water-cooled drives (IAC classified)
- Low harmonic solution (36-pulse configuration)
- Water-cooled variant is suitable for single loop cooling (external heat exchanger or fin-fan)
- Available for induction and synchronous motors
- Options
  - Suitable for high speed applications up to 250 Hz
  - Hot standby for fast startup (precharged system with open MCB)
  - IP54 enclosure protection (water-cooled drives only)
  - Marine approved design for offshore applications (water-cooled drives only)

For further information, see catalog “ACS5000”, code: 3BHT490501R0001.
Proven technology for high powers

**MEGADRIVE-LCI**

**Highlights**
- Suitable for high power and high voltage applications
- Available as variable speed drives and soft starters
- For more than 40 years, MEGADRIVE-LCI drives and soft starters have proven their maximum reliability and availability in a wide range of industries and applications
- The MEGADRIVE-LCI features a simple, well-proven, fuseless drive design and robust thyristor components ensuring high reliability
- Benefit from the drive’s easy voltage scalability, minimized harmonic influence on the supply system and a converter efficiency of more than 99 percent

**Features**
- Air-cooled power range 2 to 40 MW
- Water-cooled power range 2 to 150 MW and higher on request
- Available as variable speed drives and soft starters
- 6, 12 or 24-pulse converters to minimize the harmonic influence on the supply system and on the motor
- Series connection of thyristors for the scalability of voltage and power as well as for the implementation of n+1 thyristor redundancy
- User-friendly control terminal
- For synchronous motors
- MPTC (Model Predictive Torque Control) for an optimized operation point and highest availability
- Arc resistant design to protect people and equipment

For further information, see catalog “MEGADRIVE-LCI”, code: 3BHT490112R0001.
ABB industrial drives for process control and engineered solutions

Well-proven industrial drive ensures high productivity and efficiency of operations

ACS1000

Highlights
- Design flexibility for smooth integration
  - Easy and effortless integration
  - Can be configured with integrated or external transformer, air or water-cooled
  - Tailor the drive to your specific application by selecting from an extended choice of pre-engineered options
- High reliability through well-proven design
  - A low parts count and proven components contribute to high uptime and a long lifetime of your drive
  - Availability of your operations is ensured thanks to the simple fuseless design
- Highest level of personal safety
  - Your workforce and goods are protected from dangerous electric arcs due to the arc-resistant design
  - Certified functional safety features and integrated DC grounding switch make your systems safe and reliable
- Maximum motor compatibility
  - Thanks to the integrated output sine filter, you can drive standard induction motors, retrofit older motors and use long cables

Features
- Air-cooled power range 315 kW to 2 MW (2.3 to 4.16 kV)
- Water-cooled power range 1.8 to 5 MW (3.3 to 4.16 kV)
- Available with an integrated input transformer or for connection to external input isolation transformer
- Output sine filter for pure sinusoidal voltage and current outputs
- 12- or 24-pulse diode rectifier
- For induction motors
- Marine certification available for ABS, CCS, DNV
- IEC, EN and UL certified

For further information, see catalog “ACS1000”, code: 3BHT490400R0001.
These drives are engineered drives, typically used for high power, high speed or special application such as test stands, marine propulsion and thrusters, rolling mills, SAG and ball mills, large pumps, fans and compressors.

**Technology leading industrial drive for a broad range of applications**

**ACS2000**

**Highlights**

- Suitable for use with or without an input isolation transformer
- Available as low harmonic or regenerative drive
- Market specific design to comply with IEC and NEMA specific industry standards
- Flexible connectivity and various options offer an optimum solution for different applications

**Features**

- Power range 250 to 3.2 MW (4.0 to 6.9 kV)
- Controls asynchronous and permanent magnet motors
- Air cooling
- Available for transformerless operation allowing a direct connection to the line supply (direct-to-line), for connection to an external input isolation transformer or with an integrated transformer
- Available as a low harmonic drive for optimal low harmonic performance or as a regenerative drive for enhanced active braking and power factor correction
- For induction motors
- Two line side connection configurations, the diode front end (DFE) and the active front end (AFE)
- Optional output sine filter for pure sinusoidal output voltage and current outputs
- EN, IEC, CE, NEMA, IEEE and UL certifications

For further information, see catalog “ACS2000”, code: 38HT490640R0001.
Modular drive for demanding applications

**ACS6080**

**Highlights**
- Modular drive designed for the most demanding single or multi-motor applications
- Capability of providing full- or semi-redundancy for single motors
- Available as a regenerative drive for reduced harmonics, enhanced active braking and power factor correction
- Superior arc protection for high level of personal safety and drive availability

**Features**
- Power range 5 to 36 MW (2.3 to 3.3 kV)
- Water cooling
- Modular design for optimum configurations
- Common DC bus enabling multi-motor operation and energy regeneration as option
- Line Supply Unit (LSU) for two-quadrant operation with a constant power factor over the whole speed range
- Active Rectifier Unit (ARU) for four-quadrant operation and reduced harmonics with adjustable power factor
- Available for induction, synchronous and permanent magnet motors
- Marine type approved design available as an option

For further information, see catalog “ACS6080”, code: 3AUA0000221913.
DC drives

ABB DC drives are available as regenerative or non-regenerative drives. ABB offers digital DC drives from machinery applications all the way up to complete drive solutions in cabinets.
The latest product generation called DCS880 is built on ABB’s common all-compatible drives platform and comes with integrated functional safety (STO SIL CL 3/PL e) for DC drives as a standard.

The drives can be also used in revamp or upgrade solutions. The power range is from 9 up to 18000 kW in 12-pulse systems.
DC applications and industries

Whether you are looking to build new or retrofit an existing installation, the portfolio of state-of-the-art DC drives gives design flexibility and the proven dependable performance expected from an ABB drive. DC drives can be used in almost any industrial application, either as part of a new installation or as a cost-effective retrofit.
For hydrogen production, typical 24-pulse configuration of DCS converters can reach up to 36000 kW. With the DC power supplies, ABB offers its customers thyristor-based controllers for precise current and voltage control of electrolysis processes like hydrogen production.
DCS880 family
DCS880-S modules and DCS880-A cabinets

DCS880-S drives combine all compatible platform, integrated safety and Internet of Things connectivity

---

**Highlights**
- High power density save space in existing installations
- User-friendly due to start up assistance, auto-tuning functions and a multilingual assistant control panel
- Flexible connectivity using a common PC tool Drive Composer and remote monitoring
- Additional functions and features with IEC 61131 programming

**Features**
- Power 10 kW up to 18 MW
- 230 to 1200 V AC, 0 to 1500 V DC
- 20 to 20000 A DC
- Individually adaptable to customer requirements
- High power solutions in 6- and 12-pulse up to 20000 A, 1500 V
- Degree of protection IP21, IP22, IP31, IP42, IP54R
- Built-in safety functions (e.g., STO/SS1)

For further information, see catalog “DCS880-S modules”, code: 3ADW000465.

---

DCS880-A Complete delivery of a tested drive system in a compact enclosure

---

**Highlights**
- Wide range of power, max. 18 MW
- Proven type tested design
- Fully routine tested for short commissioning and downtime
- Approvals for different markets (e.g., marine or US)

**Features**
- Power 10 kW up to 18 MW
- 230 to 1200 V AC, 0 to 1500 V DC
- 20 to 20000 A DC
- Individually adaptable to customer requirements
- High power solutions in 6- and 12-pulse up to 20000 A, 1500 V
- Degree of protection IP21, IP22, IP31, IP42, IP54R
- Built-in safety functions (e.g., STO/SS1)

For further information, see catalog “DCS880-A Enclosed Converter”, code: 3ADW000531.
Further ABB DC solutions
DCS550-S modules and modernization solutions

Ideal drive for machinery manufacturers with its compact dimensions and robust technology

**Highlights**
- Compact drive for machinery manufacturers
- Suited for new installation and retrofitting
- Integrated high performance three-phase field exciter up to 35 A
- Control panel and PC assistant provide ease-of-use

**Features**
- Power 9 kW up to 545 kW
- 230 to 525 V AC, three-phase
- 20 to 1000 A DC
- Integrated high performance three-phase field exciter maximum 35 A
- Adaptive programmable with Drives AP
- Integrated Winder
- Built-in options
  - I/O extensions modules
  - Fieldbus adapter modules

For further information, see catalog “ABB DC Drives, DCS550”, code: 3ADW000378.

Modernization solutions for improved production performance and reliability

**Highlights**
- Enhance productivity and quality
- State-of-the-art communication via fieldbus
- Reuse proven long-life components (busbars, chokes, cables, etc.)
- Enhance connectivity and remote monitoring
- Solve spare part problem by partial upgrade

**Features**
- Upgrade of existing control electronics by reusing existing thyristors (DCS880-R)
- Fully mounted, cabled and tested panel solution for an existing cubicle, ready for insertion (DCS800-E)
- Prepared upgrade packages for classic and obsolete drives (e.g., DCS500, TYRAK)

For further information, see catalog “DC Drives Modernization – Expansion – Modernization”, code: 3ADW000007.
ABB thyristor power controllers offer precise control of heaters

With the DCT880 ABB offers its customers a thyristor power controller for precise control of resistive or inductive heaters and infrared heaters in applications for annealing, drying, melting or heating in glass, plastic or metal industry.
With a variety of control methods, it is ideal for controlling electro-thermal processes

**DCT880-W**

**Highlights**
- Ideal for controlling electro-thermal processes
- Suitable for all resistive and inductive loads, infrared heaters and ultraviolet lamps
- Integrated temperature controller and free process controllers
- Reduces energy costs by load optimization and multitap
- Programmable (IEC 61131-3) and flexible
- Support of all common fieldbuses including PROFINET and Ethernet
- Large, high contrast display with USB port

**Features**
- 16 A to 4200 A
- 110 to 1200 V
- 2-phase, 3-phase and 3 × 1-phase
- Phase angle, full-wave burst and half-wave mode
- U, I, P, I² or direct temperature control
- All common load configurations incl. star, delta, open, transformer load and multitap
- Integrated load monitoring (true RMS) and compensation of aging heating elements
- PC tool Drive Composer for startup, configuration and process tuning is connected via Ethernet or USB interface

For further information, see brochure “ABB Thyristor power controller DCT880”, code: 3ADW000429.
Programmable Logic Controllers

ABB offers a comprehensive range of scalable Programmable Logic Controllers (PLCs) and robust HMI control panels. Since its launch, the AC500 PLC platform has achieved significant industry recognition for delivering high performance, quality and reliability. ABB delivers scalable, flexible and efficient ranges of automation components to fulfill all conceivable requirements of the most diverse automation applications.

ABB’s automation devices deliver solutions with high performance and flexibility to be effectively deployed within various industries and applications including water, building infrastructure, data centers, renewable energy, machinery automation, material handling, marine and many more.

The AC500 PLC platform offers different performance levels and is the ideal choice for high availability, extreme environments, condition monitoring, motion control or safety solutions.

AC500 PLC platform
PLC Automation product family
Connectivity

ABB’s PLC and control panel portfolio provides a high number of scalable products, communication protocols and connectivity options, from the field layer right through to the management and visualization layers.

AC500 PLC platform

**Highlights**
- The AC500-eCo, AC500, AC500-XC and AC500-S scalable PLC ranges provide solutions for small, medium and high-end applications
- Our AC500 PLC platform offers different performance levels and is the ideal choice for high availability, extreme environments, condition monitoring, motion control or safety solutions
- Our AC500 PLC platform offers interoperability and compatibility in hardware and software from compact PLCs up to high-end and safety PLCs

**Features**
- **AC500-eCo**: Compact PLC for economical automation solutions in smaller applications
- **AC500**: Powerful PLC featuring a wide range of performance, communications and I/O capabilities for industrial applications. For complex, high-speed machinery and networking solutions
- **AC500-XC**: Extreme Condition PLC variant with extended operating temperature, immunity to vibration and hazardous gases, use at high altitudes and in humid environments
- **AC500-S**: Integrated safety PLC (SIL3, PL e) for safety applications in factory, machinery or process automation area. For simple and complex safety solutions.

For more information, please see www.abb.com/plc

CP600 control panels platform

**Highlights**
- CP600-eCo, CP600 and CP600-Pro control panels offer a wide range of features and functionalities for maximum operability
- ABB control panels are distinguished by their robustness and easy usability, providing all the relevant information from production plants and machines at one single touch
- Ideal choice for visualization of AC500 PLC platform automation solution

**Features**
- **CP600-eCo**: Economical control panel aimed for standard functions and high usability for clear interaction with the operation process
- **CP600**: Robust HMI with high visualization performance, versatile communication and representative design for machines and systems
- **CP600-Pro**: HMI with high end visualization performance, multi-touch operation, versatile communication and representative design
- PB610 Panel Builder 600 is the engineering tool for the entire CP600 control panels platform. PB610 Panel Builder 600 software is integrated in the ABB Ability™ Automation Builder engineering suite.
AC500-eCo PLC

**Highlights**
- Ethernet communication with MQTT protocol and OPC UA server for IoT applications, optional communication on IEC 60870, IEC 61850 (1), BACnet (1), KNX (1)
- HTML5 web server, FTP server, Modbus TCP or Ethernet/IP (1) for communication to other system or remote I/O
- Meets the demands for cost-efficiency of the compact PLC market whilst offering total interoperability with the core AC500 range
- Up to 10 I/O modules can be connected to the CPU, onboard extension with up to 3 option boards for I/O or interface extension
- Motion capability with fast onboard I/O (A/B encoders, counters up to 200 kHz), up to 4 PTO (100/200 kHz) pulse train outputs for multi-axis positioning
- Simple motion for up to 4 axis or option PLCopen motion (1) for synchronized axis
- Large user program memory and high performance

**Features**
- AC500-eCo CPU variants with 128 kByte up to 8 MB user program memory, web server and HTML5 visualization with up to 7 MB memory
- Large remanent data up to 100 kB without battery
- Large secured communication capability with integrated or optional protocols like Modbus RTU/TCP, OPC UA, IEC 60870, IEC 61850 (1), Ethernet/IP (1), BACnet (1), KNX (1)
- Processing time per instruction down to 0.02 μs, processor with FPU for fast calculation
- Up to 3 serial interfaces, up to 2 independent Ethernet interfaces with switch
- Micro memory card or memory card slot for program/firmware update or data saving
- Up to 12 digital inputs, 8/6 digital outputs transistor or relay, 2 digital configurable in/output, motion capability with integrated fast I/Os
(1) License required and/or in preparation

AC500 PLC

**Highlights**
- IoT protocols MQTT and OPC UA
- Integrated web server with HTML5 and IEC 60870-5-104 remote control protocol for all Ethernet versions
- Large memory and high performance for motion applications using PLCopen motion library and EtherCAT realtime fieldbus
- Complete range of I/O modules can be used as remote I/O with controllers supporting Modbus TCP, PROFIBUS DP, PROFINET, EtherCAT or CANopen

**Features**
- CPUs with high performance and large memory configurations up to 160 MB user program memory including up to 8 GB of internal flash disk for data storage
- Up to 6 communication modules in any configuration which can communicate with fieldbuses like PROFIBUS DP, CANopen, EtherCAT, Modbus TCP and PROFINET
- One or two Ethernet interfaces on CPU for programming via PC, internet protocols (web server, FTP, e-mail, time sync and more), OPC DA/AE, IEC 60870-5-104, Modbus TCP, MQTT, OPC UA or licensed Ethernet/IP (1), IEC 61850 (1), BACnet (1) or KNX (1)
- Up to 2 serial interfaces (RS232/RS485) with different protocols as ASCII protocol, Modbus RTU (master or slave), CS31 bus (master)
- Onboard CAN interface for CANopen master, CAN 2A/2B or J1939 communication on AC500 V3 CPU
- Programming with IEC 61131-3 standard languages or with C and C++
- Digital and analog S500 I/O modules to offer local and/or remote expansion options using most industry standard communication protocols
- Hot swappable I/Os for increased availability
(1) License required and/or in preparation
PROGRAMMABLE LOGIC CONTROLLERS (PLCs)

AC500-SC PLC

**Highlights**
- Extreme condition PLC variant
- With extended operating temperature, immunity to vibration and hazardous gases, use at high altitudes and in humid environments
- Many of the traditional practices are not required, such as HVAC for the panel, shock absorbers, door sealing, etc.
- All the benefits from AC500 range: Automation Builder engineering suite, I/O modules, same high performance communication, libraries and web services

**Features**
- Operation in extremely humid environments
  - Increased resistance against 100% humidity and condensation
- Reliable in high altitudes
  - Operation in altitudes up to 4000 m above sea level or air pressures up to 620 hPa
- Extended immunity to vibration
  - 4 g rms random vibration up to 500 Hz
  - 2 g sinusoidal vibration up to 500 Hz
- Extended operating temperature
  - -40 °C up to +70 °C operating temperature
- Extended immunity to corrosive gases and salt mist
  - G3, 3C2 / 3C3 immunity
  - Salt mist EN 60068-2-52 / EN 60068-2-11
- Extended EMC requirements
  - EN 61000-4-5 surge immunity test
  - EN 61000-4-4 transient / burst immunity test
- Hot swappable I/Os for increased availability

For more information, please see www.abb.com/plc

AC500-S PLC

**Highlights**
- The AC500-S is the PLC of choice for applications where uncompromised flexibility, comprehensive integration and seamless communication are a must
- ABB Ability™ Automation Builder seamlessly integrates your safety application in ABB PLC, safety, drives, motion and HMI
- Through integrated standard languages, such as IEC 61131-3, Automation Builder is easy to use thus allowing you to get started in virtually no time at all
- Intuitive system configuration using one single tool ensures optimal transparency

**Features**
- The AC500-S safety PLC facilitates the implementation of even most complex safety applications
- Support of safety-relevant calculations, such as COS, SIN, TAN, ASIN, ACOS and LOG makes the AC500-S the ideal solution for crane engineering, wind power generation, robotics and hoisting applications
- Safety programming with Structured Text (ST) and full support for Function Block Diagram (FBD) and Ladder Diagram (LD) programming and advanced features in PROFIsafe over PROFINET communication, like Shared Device functions, gives you greater flexibility and simplifies safety application development
- PROFINET/PROFIsafe interface for safety CPU to CPU communication, decentralized safety I/Os, safe position and speed monitoring as well as triggering of safety drive functions
- Both simple and complex safety functions can be easily implemented: Safely limited acceleration, deceleration, force, orientation, position, speed and torque
- The AC500-S Safety PLC is also available in a version for extreme conditions
**S500 remote I/O**

**Highlights**
- The availability of different fieldbus communication interfaces makes it easy to use S500 I/O modules as remote I/O for nearly any PLC and PC
- The S500 remote I/O station consists of a communication interface and I/O modules
- The smallest configuration can be just the communication interface with the onboard I/O channels
- Hot swap capable for continuous plant operation

**Features**
- Communication interfaces are available for the following fieldbuses:
  - PROFIBUS
  - PROFINET/PROFIsafe
  - EtherCAT
  - Modbus TCP
  - CANopen
  - ABB CS31 System Bus
- The electronic configuration files that are provided by ABB for different fieldbus systems make it easy to configure the S500 remote I/O station in your engineering tool
- The files such as GSD and GSDML are available for download at www.abb.com/plc.
- For Modbus TCP remote I/O stations a dedicated configurator is included in ABB Ability™ Automation Builder and for larger applications a Bulk Data Manager tool can be used

**Condition monitoring system CMS**

**Highlights**
- Optimize your assets with a condition monitoring system (CMS) based on the proven AC500 PLC platform
- The FM502 module can help you to improve your operations resulting in greater efficiency and higher reliability while minimizing service and operating costs

**Features**
- Planned maintenance rather than spontaneous repair ensures predictable performance
- Approaching damage is identified very early
- Protection against spontaneous failures and operation in critical conditions
- Reduction of costs in maintenance and lost production time
- Plant availability is increased
- Optimum utilization of the aggregates until real end of life
- Simple to use, maintain, adapt or expand
- Stand-alone CMS or control integrated
- Expandable by AC500 communication modules and S500 I/O modules
- Proven and future proof, as based on AC500 PLC platform
- Fast data logger, e.g. for production quality
- Condition monitoring and fast protection (vibration, current, voltage, speed/encoder)
- Extreme conditions XC version available

For more information, please see [www.abb.com/plc](http://www.abb.com/plc)
ABB Ability™ Automation Builder

**Highlights**
- Automation Builder is the integrated software suite for machine builders and system integrators requiring state-of-the-art productive machine and system automation
- Automation Builder connects the engineering tools for PLC, safety, control panels, SCADA, drives and motion
- Automation Builder combines the tools required for configuring, programming, debugging and maintaining automation projects from one common intuitive interface
- Efficient commissioning and maintenance by extensive diagnosis, available from Automation Builder or any operator panel
- Advanced simulation allows to simulate all kinds of applications with minimum effort. Even complete systems can be tested before involving real hardware.

**Features**
- Improve your productivity with seamless engineering, common data storage, a single project archive, time-saving library blocks for device integration, and one common software installer
- Automation Builder combines PLC engineering with the proven ABB tools Drive Manager, Drive Composer pro, MINT WorkBench, zenon Editor and Panel Builder
- Build combined PLC and drives solutions with Drive management, configuration and diagnosis with common process data editor and Drive engineering in Drive composer pro
- Speed up your project with the powerful ECAD and MS EXCEL interfaces of Automation Builder.
- Support of professional IEC 61131-3 application development, e.g. by multi-user engineering or static code analysis
- Download Automation Builder from www.abb.com/automationbuilder

For more information, please see www.abb.com/plc
Application descriptions
Condition Monitoring with AC500 PLC

Controller integrated or stand-alone condition monitoring
The AC500 condition monitoring module FM502 is a natural part of the AC500 platform and ABB Ability™ Automation Builder, and can be used in different condition monitoring concepts, stand-alone or control integrated.

Due to the easy programming in PLC languages, it is usable for a variety of use cases and is especially suitable for plant, line and machine builders as easy extension of their offering.

If controller integrated
• it enables at very reasonable cost
• the best prediction horizon as it can measure online, when best measurement quality is given without scheduling production interruptions
• while continuously protecting the application in real time, e.g. with the same or other sensor(s).
• Further inputs can be used as fast data logger e.g. precisely documenting process quality.

Therefore it is not only able to continually check the mechanical components but also gives fast protection for spontaneous and large failures even while measuring. The condition monitoring mode creates a database internally or externally for predictive maintenance. Automatic and user assisted responses can be enabled to prevent costly consequences including total failures.

As many as 16 vibration sensors + 2 encoder counters can be connected.

The recorded condition monitoring data can be stored in the CPU flash disk before communication or directly analyzed. Higher level indicators can be calculated and communicated to a local or remote HMI or database system.

Predictive performance for your process or machines
• Easy and cost saving integration of condition monitoring into the AC500 platform.
• Early detection of mechanical damages.
• Fast protection from spontaneous failures.
• Even complex C-code analytics can be used locally for meaningful own performance indicators.
• Leads to optimized planning of maintenance instead of fixed, scheduled service and spontaneous repair.
• No additional system or fixed software for diagnostics and visualization needed.
• Easy storage of the data, locally (4GB) or in remote servers and databases.
• Ideally suited also for retrofit of older equipment, as it can make use of mechanical reserves of still valuable equipment.
Example: Cold rolling mill in steel processing:
- One FM502-CMS module can execute differently configured measurements at the same time and can be reconfigured at runtime.
- Several critical and unique components can be protected and condition predicted: Motors, gearbox, process (cold rolling mill).
- Production quality can be logged in parallel in real time.
- Remote diagnostics expertise and detailed analysis and reports only in case of warnings.

Please watch our videos on our ABB PLC YouTube channel:
www.youtube.com/user/abbplc
Application descriptions
Machine controllers based on AC500 PLC

From simple to high end motion applications
- Convenient PLC portfolio for diverse applications
  - Simple machine control with AC500-eCo PLC
  - Point-to-point motion with PTO outputs or Modbus communication with the drive
  - Mid-range applications with AC500 PLC
  - EtherCAT communication with the drive or remote I/O and cam-switch for synchronized motion
  - High-end motion application with PM595
  - Axis interpolation e.g. for Delta robot
- Easy integration and excellent scalability using ABB Ability™ Automation Builder
- Motion library for complex applications

Multi-axis motion coordination with EtherCAT
ABB’s AC500 PLC using EtherCAT real-time bus delivers high performance for multi-axis control applications.

The AC500 PLC provides an industry solution with IEC 61131-3 programming and PLCopen motion functions in combination with ABB drives such as ACS880-M04 fitted with the FECA-01 EtherCAT module for higher power axes or ACS380 drives or with MicroFlex e190.

This popular high-performance motion bus provides simple ‘daisy chain’ connection.
EtherCAT AC500 machine controller kits
In order to simplify your application, ABB offers products for the implementation of machine control or motion control applications. These products can be purchased individually or as a kit. Two available EtherCAT kits contain the components required for your application.

Depending on the required performance, the kit provides a powerful CPU, an EtherCAT master communication module and the respective terminal base. The kit can be expanded using standard I/Os, other communication products or software solutions.

For further information, see catalog “PLC Automation AC500, CP600, Automation Builder”, code: 3ADR020077C0204.
Connectivity and software tools

ABB drives are connected to automation systems using embedded protocols and fieldbus adapters. All major fieldbus protocols are supported allowing flexibility and compatibility with the automation system. Different software tools and remote monitoring solutions offer support throughout the drive’s life cycle.
**Fieldbuses**
- BACnet MS/TP and IP
- CANopen®
- ControlNet
- DeviceNet™
- EtherCAT®
- EtherNet/IP™
- EtherNet POWERLINK
- LonWorks®
- Modbus RTU
- Modbus/TCP
- PROFIBUS DP
- PROFINET IO

**Tools for remote connection**
**NETA-21 for remote monitoring**
NETA-21 allows access to a drive via a local internet connection and a standard web browser. This enables easy application and drive diagnostics, monitoring, configuration and even drive control when needed.

**Bluetooth control panel for safe access**
The optional Bluetooth control panel *) enables connection with the Drivetune mobile app. The app is available for free from Google Play and the Apple App store. Together with the Drivetune app and the Bluetooth control panel, users can, for example, commission and monitor the drive remotely.

**Ability™ Mobile Connect for drives **)** is an online platform consisting of the Mobile Connect web portal and Drivetune mobile application. The platform offers partners an opportunity to provide online technical support to their customers without any complex connectivity infrastructure – just a mobile phone and Bluetooth keypad on the drive is needed.

*) Check compatibility with the product
**) Check the availability with your local partner and ABB representative

**Software tools**
ABB drives are supported by a selection of software tools used for drive selection, commissioning, programming, daily operation and maintenance, monitoring, and process tuning.

**Engineering and sales tools**
- Drive and Motor selector
- Ecodesign tool
- DriveSize
- EnergySave calculator
- Functional safety design tool
- ABB Ability™ Virtual Commissioning

**Startup and maintenance tools**
- Drive Composer entry/pro
- DriveWindow Light
- Drive Manager

**Integration and programming**
- Drive Application Builder
- Automation Builder
- Mint WorkBench
- ABB Ability™ Operations Data Management – zenon

**Mobile tools**
- Drivetune
Drive Composer

Drive Composer is a start-up and maintenance tool for ABB’s common architecture drives. The tool is used to view and set drive parameters, and to monitor and tune process performance.

The entry version of Drive Composer provides basic functionality for setting parameters, basic monitoring, taking local control of the drive from the PC, and event logger handling. The entry version is available for free and can be downloaded from below.

Drive Composer pro is the full-fledged commissioning and troubleshooting tool. Order Drive Composer pro through ABB sales channels. Existing license holders can upgrade to latest version of Drive Composer pro by downloading the installation package from below.

| Control diagrams for parameter setting and diagnostic purposes              | ☑                    | ☑                     |
| Creation, configuration and execution of Macro scripts                       | ☑                    | ☑                     |
| Configure the optional safety functions modules (FSO)                       | ☑                    | ☑                     |
| Firmware loader (Update drive, FSO safety module)                           | ☑                    | ☑                     |
| Drive text editor (manage user editable texts in a drive)                    | ☑                    | ☑                     |
| Create EDS export files of a connected drive                                | ☑                    | ☑                     |
| Display contents of an event logger (Faults and warnings)                   | Partly               | ☑                     |
| Display and analyze of data logged in a drive                               | ☑                    | ☑                     |

**Maintenance**

| Display of System info (basic information about the drive and its options)  | ☑                    | ☑                     |
| Connect to Drive installed base (DIB) service portal (register, search, report) | ☑                    | ☑                     |
| Backup/restore functions                                                    | ☑                    | ☑                     |
| Advance restore (restore a set of components/parameter settings)            | ☑                    | ☑                     |
| Create backup of all connected drives in a computer network                 | ☑                    | ☑                     |
| User interface available in different languages                            | ☑                    | ☑                     |
| Virtual drive launcher available                                            | ☑                    | ☑                     |
| Use an OPC-based commissioning and maintenance tool                         | ☑                    | ☑                     |
Drive application programming lets you create cutting-edge advantages in your machines, thanks to the built-in PLC functionality of ACS880 drives. The application program runs on top of the drive’s standard drive firmware. This allows seamless implementation of custom control algorithms in addition to the standard drive functionality, access to the drive peripheral I/O and customization of the drive user interface.

Drive application programming is accomplished with the Drive Application Builder tool and based on the well-known IEC 61131-3 standard. This standard allows to start a program development with minimal training and to transfer customized programs to other platforms.

Benefits and Features of Drive Application Programming include:
• Cost savings and higher reliability, due to fewer system components and simpler installation work because no external PLC is needed
• Compact solution requires less cabinet space, as the PLC is inside the drive enclosure, with the same IP class
• Performance and productivity improvements, since decentralized machine control enables faster control loops
• No need for a separate HMI, as a drive control panel can be used instead in some applications
• Creation of intelligent applications with several drives, using the drive-to-drive communication

Drive Application Builder is a tool for developing IEC 61131-3 programs in a drive-embedded PLC.

Standard features:
• IEC 61131-3 programming
• 160KB of program memory
• Running application program in parallel drive FW in tree configurable tasks (1ms-1000ms)
• Interface to standard drive parameters
• Adding customer parameters
• Adding customer events
• Drive I/O programming
• Drive-to-drive communication

For more information, please see new.abb.com/drives/software-tools/drive-application-programming
Virtual engineering and commissioning allow machine builders and system integrators to develop and simulate entire industrial processing lines and machines, including ACS880 drives, without actually running the hardware. This gives valuable benefits in the phases of designing, commissioning and operating machines.

**Design safely and efficiently**

Engineers can start configuring and programming drives well before receiving them from ABB production line, since the same software tools like Drive Composer Pro can be used with virtual and real drives. Virtualization can also cover the kinematical and physical behavior of the machine and the overriding automation. Virtual drives can also be used with the Drive Application Builder and ABB Automation Builder programming tools to build more complete virtual machines and processing lines.

After deploying the virtual machine in use on-site, any future improvements can be virtually tested before implementing them in the process. This all supports safety and quality in the engineering process.

**Benefits**

Throughout the value chain from sales, marketing, and training to field engineering and product development, virtual commissioning makes drive applications more easily understood and helps to:

- Design, test and learn drive applications virtually with the same software tools as for the actual hardware
- Train users and engineers with application simulation
- Tune up drive parameters easily off-site before going into more demanding on-site testing
- Find and solve potential problems earlier
- Save time and money due to faster drive commissioning
- Assist the dimensioning and energy optimization of electromechanical drive systems

ABB Ability™ Operations Data Management – zenon

**Highlights**
- zenon integrates your technology by connecting drives, motors, PLCs, and electrical devices to complete automation and electrification
- It enables supervision, control, data acquisition, scheduling and performance reporting for your machines and factories
- zenon hosts ABB Ability™ solutions on premises and connects to other remote solutions
- The platform’s security is designed to be smartly integrated into all processes and systems in critical infrastructure
- Turning data into information, zenon provides insight into production processes via its more than 300 communication protocols and drivers, enterprise resource planning capability, and cloud interfaces
- Its extensive lifecycle, backward compatibility and ability to engineer mixed version environments, ensures low total cost of ownership and cost-effective extensions for factories

**Features**
- Control and supervision for factory assets
- Connectivity through more than 300 communication protocols and drivers
- IoT from machines to multi factory
- Secure data storage and communication
- Certified ISO 50001 Energy Data Management System
- Freely definable KPIs
- Alarm management
- Realtime Management Dashboards
- Extensive production data analytics
- Audit Trail
- Batch and recipe handling – ANSI/ISA–88.01 compliant
- Equipment Model – ISA S95 compliant
- Production scheduler
- Soft PLC
- HTML5 Webserver
- FDA CFR 21 Part 11 compliant
- GAMP 5 compliant
- Weihenstephan pack and food standard compliant
- Certified SAP ERP and MS Azure interface

ABB Ability™ Digital Powertrain
Condition monitoring for drives

Accurate, real-time information about powertrain events. When you have the facts, you can make the right decisions.

Condition Monitoring gives you fact-based insight into your powertrain assets, such as drives and motors, via KPIs and signal data, to identify irregularities before they become problems. This helps you make proactive decisions, built on real-time information – and saves you money!

The service can be tailored to fit your needs
Our standard package gives you industry leading monitoring capabilities – whether you want to view the drive status through ABB’s Internet portal or integrate this data with your existing monitoring systems.

The standard package includes the following services:
- Condition Monitoring
- Alarm Management
- Asset Health
- Team Support
- Backup Management

The standard package can be supplemented with optional services:
- Condition-Based Maintenance
- Offline Data Collection
- Expert Reports
- Remote Assistance
- Condition monitoring of your entire powertrain

Solid fact-based decision making
Get the facts, and the history, to help run your operations better and more safely.

Always stay one step ahead of problems
Recognize early signs of possible failures and assess the risks, before they turn into serious operational issues.

Find the root cause of process issues
Remotely access data from ABB drives built-in sensors to track the cause of problems. Get back to smooth operation quickly with data back-ups.

Remotely analyze and optimize drives
Get critical drive information anywhere anytime – even in difficult to access sites, or when a site visit is impossible.
NETA-21

NETA-21 connects the drive to the cloud via the Internet or local Ethernet network.

- The module comes with a built-in web server and requires no Flash/Java plugins
- In the absence of a customer local area network, it can be connected via a mobile network router (either Ethernet or USB network adapter)
- One module can be connected to several drives at the same time

RMDE reliability monitoring device

The RMDE reliability monitoring device facilitates the installation of the connectivity device (NETA-21) on drives that are already installed.

- The RMDE device can contain two or four NETA modules and can connect up to 18 or even 36 drives
- The cabinet consists of the NETA-21 connectivity devices, a modem and environmental sensors that enable the collection of measured ambient temperature and humidity values
- The cabinet includes a compact IP54 enclosure, making it suitable even for harsh environments

Customers can configure powertrains and customize the digital service plan
We keep your world turning

Whatever your needs are, we offer the most extensive service offering for drives, motors and generators from spare parts and technical support to cloud-based condition monitoring solutions to keep your equipment running.

The global ABB service units complemented by external Value Providers form a service network on your doorstep. Maximize performance, uptime and efficiency throughout the life cycle of your assets.

With you every step of the way
Even before you buy a generator, drive, motor, bearing or softstarter, ABB’s experts are on hand to offer technical advice from dimensioning through to potential energy saving.

When you’ve decided on the right product, ABB and its global network of Value Providers can help with installation and commissioning. They are also on hand to support you throughout the operation and maintenance phases of the products life cycle, providing maintenance programs tailored to your facility’s needs.

ABB will ensure you are aware of any service opportunities. If you’ve registered your drives and motors with ABB, then its engineers will proactively contact you advising on your most effective service options. All of which helps maximize performance, uptime and efficiency throughout the lifetime of your powertrain.
Global service network 24/7

“I need operational excellence, rapid response, improved performance and life cycle management.”

Agreements
Comprehensive bundling of relevant services into one contract to suit your needs.

Advanced services
Gain the unique ABB Ability™ digital advantage through data collection and analytics with advanced services.

Extensions, upgrades & retrofits
Up-to-date systems and devices with the best possible performance level.

Engineering & consulting
Ways to identify and improve the reliability, usability, maintainability and safety of your production processes.

Spares & consumables
Authentic, high-quality ABB spares and consumables with quick delivery.

Technical support & repairs
Quick and accurate response during emergencies and efficient support during planned production breaks.

Installation & commissioning
Highly-trained and reliable installation and commissioning experts at your service.

Training
Comprehensive and professional training either at ABB premises or your own.
# ABB Drives Life Cycle Management

**A life time of peak performance**

You’re in control of every life cycle phase of your drives. At the heart of drive services is a four-phase product life cycle management model. This model defines the services recommended and available throughout drives lifespan.

Now it’s easy for you to see the exact service and maintenance available for your drives.

<table>

Keeping you informed throughout the life cycle

We notify you every step of the way using life cycle status statements and announcements.

Your benefit is clear information about your drives’ status and precise services available. It helps you plan the preferred service actions ahead of time and make sure that continuous support is always available.

Sales release
Details about product portfolio and release schedule.

Sales ramp-down announcement
Last time buy and last deliveries dates, informed well in advance.

Life cycle phase change announcement
Early information about the upcoming life cycle phase change and affects on the service availability. Informed well in advance, minimum six months prior to the change.

Life cycle phase statement
Information about the current life cycle status, product and services availability and recommended actions. Plan for the next life cycle phase transition.
