

Nexus[®]Pro brings the future of emergency lighting. Today.

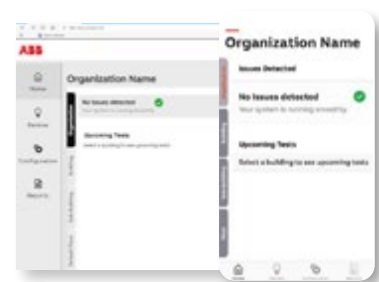

Through intelligent emergency lighting, ABB makes building safety more accessible. From office buildings and schools to hospitals and stadiums, Nexus[®]Pro brings the power of connected IoT emergency lighting to any environment.

By understanding market conditions and customer needs, ABB strives to exceed the required levels of cybersecurity without compromising operational performance. Our solutions are aimed at reducing business risk, providing comfort and confidence, as well as enabling compliance with standards and legal requirements.

Nexus[®]Pro App and web interface

View all devices with detected issues and any upcoming tests. The main menu is located at the bottom of the screen.

View defective and functional devices in a list format or on a map.

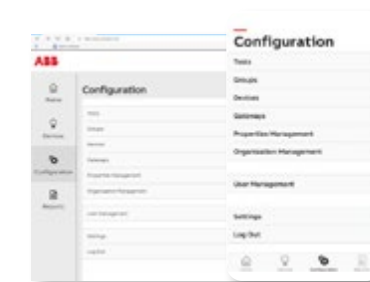

If you have a defective unit, simply click the unit to find the exact issue and part number you need to fix.

The map format provides a more visual view of your devices, so you know exactly where the devices are located on your floorplan.

Commission a gateway and devices (mobile app only), schedule monthly tests, manage your properties, invite users, upload floorplans and more.

All the detailed information regarding test results, maintenance history, offline devices and device locations.

Making your building safer than ever.
