Standard Features

- Flexible and modular hardware structure
- Line-ups and stand-alone cabinets
- Integrated automation system available
- 6- and 12-pulse configuration up to 18 MW / 23,000 HP
- Supply voltage from 230 V to 990 (1200) V
DCS800-A Enclosed Converters

**Latest Technology, High Performance and a User-Friendly Concept**

DCS800-A are DCS800 converter modules mounted in an enclosure. The series is a complete range of enclosed converters intended for the supply and control of DC machines. DCS800-A provides maximum flexibility in the firmware, the drive itself is programmable as well as a serial communication (e.g. Profibus) interface plus 12-pulse parallel, serial and sequential.

DCS800-A enclosed converters are fully digital. Optional equipment is available to meet different safety standards. The converter can be used for standard applications but has the flexibility to be customized for the most demanding applications.

**Comprehensive Product Range**

DCS800-A enclosed converters are available as 6-/ 12-pulse and in 2- or 4-quadrant, with current ranges from 18 to 9800/19600 A and supply voltages of 230...990 (1200) V AC. A selection of options is available to provide the user with a system meeting the most demanding technical requirements and performance expectations. Common control electronics throughout the product range reduces spare parts inventory and training requirements.

**DCS800-A Concept**

- A single drive control technology is available for a wide power range to reduce training costs and meets the requirements of various applications.
- Common AC busbar designs for group drives are available for the most cost-efficient and functional system structure.
- Incoming supply section for group drives can be equipped with air circuit breakers or insulation switches.
- Control cubicles offer various I/O solutions in combination with ABB controls e.g. AC800M.
- Approval for many application specific standards (e.g. ABS, DNV, Loyd, UL, CSA) can be ordered as option.
- Flexible design of power cable entry provide simple installation and minimum power down time especially for upgrades.

**Digital Control**

To meet the most stringent control requirements, the DCS800-A features speed control, which reduces the effects from gear backlash and torsional vibration arising in mechanical systems. High-performance speed and torque control will fulfill all requirements for rapid response and high control accuracy. Autotuning for armature, field current and speed controller simplifies the commissioning.

**What is a DCS800 DC drive?**

The DCS800 DC Drive is simple to buy, install, configure and use, saving considerable time.
- Precise delivery
- Quick installation
- Rapid start-up

The drive has common user and process interface with fieldbus, common software tools for sizing, commissioning, maintenance and common spare parts.

**Where can it be used?**

DCS800 can be used in the wide range of all industrial application of

- Metals
- Pulp & Paper
- Material handling
- Test rigs
- Food & Beverage
- Printing
- Plastic & Rubber
- Vessels
- Ski lifts
- Magnets
- Mining
- Electrolysis
- Battery Chargers
- and more

**DCS800 DC drive promises**

The drive meet the requirement of all demanding drive application like: testrig - mine hoist - rolling mill as well as none motoric applications like: electrolysis - magnetics - battery charger ... Embedded software functions offer the upgrades of all classic installations 12-pulse, shared motion, double motor operation, field reversal control.
Start-up and maintenance tool

DriveWindow Light 2
PC tool for ABB drives

DriveWindow Light 2 is an easy-to-use start-up and maintenance tool for ABB drives. Supported drives are ACS140, ACS160, ACS350, ACH400, DCS400, ACS550, ACH550, DCS800 and ACS800.

- Viewing and setting parameters in offline and online mode
- Editing, saving and downloading parameters
- Comparing parameters
- Graphical and numerical signal monitoring
- Drive control
- Start-up assistants
- DWL AP tool for DCS800
- All DCS800 DC drives are equipped with DriveWindow Light

Start-up, maintenance and integration

DriveWindow 2

ABB’s DriveWindow is an advanced, easy-to-use PC software tool for the start-up and maintenance of ABB DCS800 DC Drives. Its host of features and clear, graphical presentation of the operation make it a valuable addition to your system providing information necessary for troubleshooting, maintenance and service, as well as training.

With DriveWindow the user is able to follow the co-operation of several drives simultaneously by collecting the actual values from the drives onto a single screen or printout.

DriveOPC

Integration tool

DriveOPC is a software package which allows OLE for Process Control (OPC) communication between Windows applications and DCS800 DC drives. It allows Object Linking and Embedding (OLE) for Process Control (OPC) communication. This OPC server is an ideal tool for integrating DCS800 DC drives and commercial PC software and creating PC-based controlling and monitoring systems.
**DCS800-A enclosed converters**

DCS800-A enclosed converters are suitable for three-phase supply voltages from 230 V to 990 (1200) V, 50 or 60 Hz. The rated DC current range is from 18 to 9800/19600 A.

DCS800-A enclosed converters with rated DC current from 18 A up to 1850 A are available in two different layouts:
- Single drive configuration without horizontal busbars therefore AC cable connection
- Group drive configuration with horizontal busbars (size depending on rated amps)

Group drives from sizes D6 and D7 on request.

DCS800-A can be tailored to meet different needs by using combinations of the following options:
- Earth Fault Detection (current sensitive)
- Insulation Monitor (voltage sensitive)
- Motor Fan Starter
- Galvanic Isolation of converter voltage measurement
- Cabinet design according to EMC-regulations
- EMC Filters
- Protection Class IP 21- Standard
- Protection Class IP 31 with filter (insect screen) in air inlet and outlet
- Protection Class IP 42 with filter in air inlet; air outlet same as IP 21
- IP 54 on request
- Gland plate and bottom plate
- Special Colour (only outside) acc. to RAL standard
- Heater
- Lighting
- Horizontal Busbars

CE mark requires the options
- EMC procedure/part list check
- EMC filter or dedicated transformer (performed by the customer)
- Cable marking A2 plus

**Incoming Supply Sections for Group Drives**

Incoming supply sections (DCA 63x) are used to supply several group drives connected by horizontal busbars. The connection to the AC supply can be made by cables or busbars. The cable / busbar entry is at the bottom of the incoming supply section.

The incoming supply section can be located preferable left side of line-ups, but also right side and even in the middle of line-ups.

The cabinets standard protection class is IP21.

**Basic design**

- Rated voltage: 400, 500, 600, 690 V
- Rated frequency: 50 or 60 Hz
- Rated current: 1000, 2000, 3000, 4000 A AC
- Short circuit ratings: 50 kA (1 sec.) \(i_{\text{max}} = 105 \text{ kA (peak)}\)

**Options**

- Cabinet design according to EMC-regulations
- Isolation Switch (DCA 631)
- Breaker (DCA 632)
- Earthing switch
- Residual Current Detection
- AC Current Measurement
- AC Voltage Measurement
- Arc Detecting Relay
- Emergency stop relays, tripping circuits

**Important!**

EN61800-3 (IEC 1800-3) standard requires the options
- EMC procedure/part list check
- EMC filter or dedicated transformer (performed by the customer)
Field Exciters
Several Solutions available

- Ratings from 6 to 450 A
- Integrated, separate or external
- 2-phase or 3-phase versions
- 1-, 2-, 4-Quadrant
- Digital control
- Auto/manual operation

The field exciters are controlled via a serial DSL-link with a speed of 500 kBaud for fast and accurate control.

Internal field exciters
Field exciters from 6 A up to 25 A can be included in armature converter modules up to 500/525 V, 2000 A (size D5).

On board field exciters are 3-phase half controlled field exciters 6 A / 15 A / 20 A / 25 A in D1 up to D4 converter modules (525 V). These field exciters are directly supplied from mains circuit internally and do not require any autotransformer in three-phase operation.

FEX425 field exciter is also a 25 A 3-phase half controlled unit assembled in a D5 converter module. It can be supplied directly from mains circuit or from a separate field supply voltage.

DCF803: 0050 B
2-phase, 1-quadrant, half controlled, outside the converter module. An autotransformer is optional to reduce voltage ripple in the field circuit by adapting the AC voltage to a suitable level.

DCF804: 0050 B
2-phase, 4-quadrant, full controlled, field exciter for field reversal. An autotransformer is optional to reduce voltage ripple in the field circuit by adapting the AC voltage to a suitable level.

DCS800-A21: 18...400 A
18...400 A, 3-phase, 2-quadrant, full controlled, separate cabinet including overvoltage protection

DCS800-F01: 18...285 A
18...285 A, 3-phase, 2-quadrant, inside D6/D7 armature cabinet is possible; including overvoltage protection

DCS800-A22: 22...450 A
22...450 A, 3-phase, 4-quadrant, full controlled, for field reversal, separate cabinet; overvoltage protection included

DCS800-F02: 22...300 A
22...300 A 4-quadrant for field reversal, inside D6/D7 armature cabinet is possible; overvoltage protection included

DCS800 Converter modules

Basic design
All units are provided with the same digital control board and software. The DCS800 flexibility allows the user to configure functions of the drive easily, suitable for different applications. Functions of the DCS800 are normally activated by parameters.

The basic software includes following options:
- Processing the speed reference with a speed ramp generator (S-ramp capability, accel/decel ramp)
- Processing the speed feedback
- Speed controller
- Torque reference processing
- Current controller
- Field weakening
- Automatic/manual field reversal
- Autotuning of current controller
- Autotuning of speed controller
- Speed monitor
- Drive control logic
- Remote/local operation
- Emergency stop
- Electronic circuits are not sensitive to line phase sequence
- Motor overload protection
- Dual field
- Programmable analogue outputs
- Field supply
- Master/follower via fibre optics
- 12-Pulse link

Monitoring functions
- Self-test
- Fault logger
- Motor protection
- Power converter protection
- Incorrect supply protection

I/O's of the converter module
The I/O connections in the DCS800 converter modules are used for safety and other drive specific functions like emergency stop and motor temperature measurement:
- 1 analogue tachometer input
- 4 analogue inputs
- 2 voltage reference outputs
- 3 analogue outputs
- 1 actual armature current output
- 1 pulse encoder input (with I/OB-3 isolated)
- 8 digital inputs
- 7 digital outputs

More detailed information about SDCS-1OB-2x/3 see Hardware manual DCS800.

DCA 650 Control Cabinet

Advant controller AC 800 • Fieldbus interface FCI (AF100)
- Location of full range of S800 I/O modules.

Advant controller and S800 I/O System

The S800 I/O system consists of the control module (AC 800, FCI, AC 800M), digital and analogue I/O modules. The control module has a connection to several different bus systems and optical channels to connect the drives. The modules are attached to mounting rails (DIN).

AF 100 field bus interface FCI
Within this AF 100 interface up to 12 drives can be connected.

Advant controller AC 800M
Powerful controller with several fieldbus interfaces. Up to 12 drives can be connected with the optical module bus.

The above mentioned control modules can also handle up to 12/24 I/O modules.

Digital inputs and outputs
- 8 channels • input voltages from 24V...250V
- Analogue inputs and outputs (12 bit resolution) 8 channels

Drive Bus Communication
The Drive Bus Communication module CI854 provides another fast optical DDCS communication channel to the drives.

Engineering Tool for Individual Programming
The Advant controllers (AC 800M) are programmable controllers using ControlIT Control Builder.
- Graphical editor for creating and modifying program diagrams
- Function-oriented engineering
- Windows-based application programming
- Online editing
- Constant and parameter value changes
- Connection changes
- Deleting/Inserting function blocks or tasks
- Program downloading to AC 800M
- Temporary change of input terminal values
- Displaying actual values at terminals

**Table 1: DCS800-A types**

* Ratings are valid for IP 21; for IP 31 and IP 41 the current derating is calculated by DriveSize ○ Air circuit breaker on request = Air circuit breaker not available ○ Reduced current due to standard air circuit breaker. Larger air circuit breakers are available on request (1) with air exit (2) = plus 100 A @ 10kW @ 380 V, 50% load. 380 V A at 14% ΔP, 380 A at 7% V.

DCS800-A enclosed converters are suitable for three-phase supply voltages from: 230...990 (1200) V AC 50 or 60 Hz

Select the DCS800-A type from Table 1, according to the nominal supply voltage and the rated DC current.
